A HISTORY OF RECIP LEADERSHIP

LENOX® now has over a century of cutting expertise, delivering solutions that make our end users more productive. LENOX defined performance in the reciprocating saw blade category since inventing the first bi-metal blade in 1977. LENOX has continued to lead the way in recip performance and is redefining performance levels in the bi-metal reciprocating category with the introduction of WAVE EDGE™ Saw Blade Technology.

LENOX METALMAX® CUT-OFF WHEELS

A NEW ALTERNATIVE TO ABRASIVE CUT-OFF WHEELS

1,000+ CUTS

METALMAX® delivers 1,000 or more cuts with no need for wheel changes.*

LONG LIFE

Diamond technology provides extreme durability in metal cutting applications, leading to fewer wheel changes, when compared to thin bonded cut-off wheels.

PRECISION AND REACH

METALMAX® is designed to maintain a consistent cutting depth through the duration of its life, unlike a bonded abrasive wheel.

1000+ CUTS

LENOX METALMAX® wheels deliver 1,000 or more cuts with no need for wheel changes. That is 30 times longer life than thin bonded cut-off wheels.

*Average performance in 1" carbon steel square tube

†This blade uses manufactured diamonds engineered for cutting
