

## Opportunities for Contract Manufacturing

Sid Harvey's has historically utilized its manufacturing capabilities to meet the needs of its own distribution network. With a new, fully trained work force in place, quality and efficiency levels continually exceeding expectations; the company has been expanding utilization of its hydronic, hydraulic and electronic manufacturing capabilities.

If your organization has an interest in utilizing Sid Harvey's Engineering and/or Manufacturing capabilities to help achieve your business objectives, we would be pleased to discuss opportunities for partnership.

### KEY STATISTICS **Andrews SC Manufacturing Facility:**

- 120,000 SF production space.
- Process trained labor force between 80 and 110, based on seasonal demand.
- Currently capacity includes 750 remanufactured components and over 1,700 heating and air conditioning service products including:
  - Pump Remanufacturing: hydraulic fuel pumps up to 300 PSI; hydronic pumps up to 1,000 GPH; and condensate pumps up to 1,000 GPH.
  - Motor Remanufacturing: Electric motors up to 35 HP.
  - Remanufacture of advanced electronic and micro-electronic controls.
  - Assembly of oil filters.
- Additional Assets/Capabilities include:
  - 3 CNC machine centers – X-axis.
  - I/C board testing and refurbishment (through hole).
  - Dip soldering.
  - Spray painting.
  - Motor winding and lacquer dipping.
  - Machine shop services – milling, lapping, grinding capability, metal welding.
  - Ultrasonic welding.
  - Burnout ovens and bead blasting.
  - Assembly and packaging.
  - Final test and inspection.
  - Product Development and Process Development Engineering.
- On-site Fuel Testing Lab.
- On-site Quality Control Lab.
- All above supported and sustained by a financially stable management structure.
