

**America's First Spray Cleaner!**

# Spray Nine®

**Give us  
your worst...  
you'll love  
the results!**

**Cleans • Disinfects • Degreases  
Deodorizes • Removes Stains**

## **Spray Nine's Profit Leverage:**

- 1. Fast Turns At Healthy Margins** – **Spray Nine's** demand is entrenched with an extremely high loyalty factor. 4 out of 5 customers from our recent survey indicated they will become repeat buyers.
- 2. Pure Add-On Sales** – **Spray Nine** creates new incremental business without jeopardizing current sales because its brand-loyal users destination shop. This pool of new customers is exposed to impulse items at the store on their way to pick up a bottle.
- 3. Word Of Mouth** – Expand your customer base at a much lower acquisition cost than advertising. **Spray Nine's** proven, word of mouth buzz drives new foot traffic to the store.

**Blast through the toughest cleaning tasks FAST...  
even when other products fail. And with less effort!**

Today's world of antibiotic-resistant germs, record-breaking hurricane seasons and pandemic flu scares brings more need for disinfecting surfaces than ever before. **Spray Nine** kills viruses\* in 30 seconds and bacteria† in 45 seconds (*E. faecalis* (VRE) one minute contact time). Also helps control mold/mildew.

Salmonella contaminated area (simulated depiction)

Salmonella contaminated area after cleaning/disinfecting with Spray Nine Multi-Purpose Cleaner/Disinfectant (simulated depiction)

When used under normal cleaning/disinfecting procedures in accordance with product directions, Spray Nine is not expected to be toxic to humans.

## **In The News**

# **Staph bug sounds alarm**

## **Drug-resistant germ killing more than AIDS virus**

BY ROB STEIN

*The Washington Post*

WASHINGTON – A dangerous germ that has been spreading around the country causes more life-threatening infections than public health authorities...

## **Health Facts**

- MRSA kills more people every year than AIDS.
- 80% of common illness is spread by hand contact with eyes, nose or mouth.
- The average desk has over 20,000 germs per square inch – 400 times more bacteria than the average toilet seat!
- Only 10-100 particles of the common cold are needed to cause illness. They can survive on surfaces for up to 3 days!

## What Our Customers Have To Say...

"For the heck of it I decided to spray some **Spray Nine** on an old corrugated steel fence that was full of mold, dirt, and had not been painted in over ten years. To my amazement it took off all the dirt and crud and made it look like I just painted it. My next door friend asked me if I was painting the fence." Springfield, MA

"I have got a **Spray Nine** experience for you to tell. My Dad was a smoker for 40 years in the same apartment and so was my Grandmother when she was alive. Back in February of this year I needed to put my Dad in a nursing home, after a fall and broken hip. Now I had the task of cleaning his apartment and 40 years of cigarette smoke that encrusted everything. My choice was **Spray Nine**, from my past experience with your product. I sprayed the walls, windows and anything that was going to be saved with your product, and the nicotine did not stand a chance. When I got to the kitchen walls they had wall paper on them, and not wanting to stop working I used **Spray Nine** to remove the wallpaper glue. If you would like I will send you my 'Before **Spray Nine** and After **Spray Nine** and many coats of paint' photos. Thanks again for the great product." Richard Tobias

"I recently used the product **Spray Nine** to clean the gutters on our home. It's a bi-level that has white aluminum gutters/down spouts. I used the product as per your directions. It did a great job. It cleaned the grime off the gutters with little effort. Rarely do I comment on a product, but **Spray Nine** deserves this acknowledgement. I will certainly recommend the product." Long Beach, CA

### **Before Spray Nine Was Created...**

People had to mix their own cleaning solutions by adding powders or concentrated chemicals into a bucket full of water. This often proved to be messy, inconvenient and ineffective.

### **The Breakthrough That Changed It All...**

In 1956, a young duo of entrepreneurs from upstate NY – one an innovative chemist, the other an astute corporate lawyer – introduced the world's first ready-to-use cleaning solution that could also degrease and disinfect surfaces. They named their creation **Spray Nine**, which grew to become our flagship product and corporate namesake.
