Design Flexibility

Fujitsu General creates high-quality and environmentally-friendly products that provide a comfortable environment by using its continually improving air conditioning technology, innovation and creativity, which we started over 35 years ago.

High Quality Development and Production Environment

The Headquarters-JAPAN R&D Center is equipped with a wide range of testing equipment envisioning a variety of operating conditions. This includes a testing tower with a 198 ft. (60m) height difference for buildings. We provide high quality & reliable products that meet the customers' needs from all over the world through this advanced R&D center and 6 factories based in China and Thailand.

JAPAN R&D center and 198 ft. (60m) height testing tower (Kawasaki, Japan)
Central R&D center for global air conditioner development. Advanced products are developed and next generation technologies are researched.

FUJITSU GENERAL CENTRAL AIR-CONDITIONER(WUXI)CO.,LTD(China)
VRF Main factory. ISO9001 and ISO14001 certified. This factory has high quality and high reliability systems for manufacturing VRF systems.

FUJITSU GENERAL's VRF AIRSTAGE Series has been developed based on our long-term air conditioning technology know-how that was first introduced 16 years ago. Since then, the Airstage series has been serving the market's HVAC needs in applications ranging from large residential to commercial in addition to a large variety of other installations.

INVERTER

A World Leader in Heating and Cooling Solutions

Support Team

Fujitsu features an expert team of Regional Sales Managers and Sales Engineers located around North America to provide customer support. Additionally, blended Rep Agencies support Plan and Spec Consulting Engineers, as well as wholesale distribution, to provide product knowledge and support. We pride ourselves in having one of the most educated and qualified teams in the HVAC industry.

Technical Support

The Fujitsu support experience is top notch and our highly trained technicians are equipped with the tools and resources to answer any question that may come your way. Fujitsu offers remote technical support, and when needed, can dispatch local support to solve field issues. **Our Tech support wait time is the lowest in the industry with the highest level of expertise and limited return calls.**

Wireless phone headsets provide mobility to techs so they can physically access any tools they may need to solve the problem.

Installed equipment allows techs to simulate situations contractors have in the field, making calls go faster and smoother.

Quality Control is pertinent to customer satisfaction. Every piece of equipment that is sent back to Fujitsu is tested and evaluated, bringing our failure rate to a record low .01%.

Variable Refrigerant Flow System
For Small and Large Buildings

- Extensive lineup from 3 to 24 tons
- Connectable capacity ratio up to 150%
- 45 different indoor units available in 11 styles
- Up to 45 indoor units per one VRF system
- Three outdoor V-Series units may be combined with twinning kits to create up to 24 tons
- 10-Year Parts and Compressor Warranty. See Warranty Statement for details.
- Connect up to 36 tons of indoor units to a single VRF refrigerant circuit.
- Extensive training for Engineers, Architects, Contractors and Distributors

TABLE OF CONTENTS

![AIRSTAGE™]

# HIGH ENERGY EFFICIENCY *J*-SERIES   *V*-SERIES
All inverter compressor

Airstage outdoor units are equipped with DC Inverter Control of compressors. Inverter control is like having cruise control for your heating and cooling system. DC twin rotary compressors only run as fast as they need to handle the cooling or heating demand. This provides smoother and more stable operation while improving comfort and reducing energy consumption.

Inverter Benefits
• Soft start resulting in low inrush current
• High efficiency operation
• Lower RPM = quieter operation
• Built in protections improve compressor life
Inverter System   Conventional System

High efficiency compressor speed control
Provides comfort by making small temperature changes. This reduces energy usage by controlling the compressor speed in 1000 increments.

Up to 0.1Hz

Capacity

Inverter frequency

Large capacity DC inverter compressor

Large capacity high efficiency DC twin rotary compressor with excellent part load performance.
Single Twin Rotary Compressor

Some manufactures use scroll compressors, or multiple compressors consisting of one variable and one fixed. Using this older technology makes the outdoor unit heavier and more expensive.

Fujitsu uses twin rotary technology which is more efficient with up to 7% improved COP over older scroll compressors.

Improved rotary comp. efficiency 7% (against scroll compressor)

Over compression loss at part load operation (For scroll compressor)

Under compression loss at high load operation (For scroll compressor)

Compressor COP

DESIGN VERSATILITY

Long piping length

Broad range of installation by long piping capability.

J-SERIES

Height difference between outdoor and indoor units:

J-II:
O.U. is higher than I.U. - **164ft.** (50m) max.

O.U. is lower than I.U. - **131ft.** (40m) max.

J-II S:
98ft. (30m) max.

Height difference between indoor units:

49ft. (15m) max.

Total Pipe Length:
J-II: **590 ft.** max.
J-IIS: **262 ft.** max.

Piping length from first separation tube to the farthest indoor unit:
131ft. (40m) max.

Actual piping length:
J-II: **393ft.** (120m) max.

J-II S: **164ft.** (50m) max.

Overall piping length 3,280 ft.

V-SERIES

World's longest total pipe length
3,280 ft. max.

Height difference between outdoor and indoor units
164 ft. max.

For the outdoor unit installed below the indoor units: 131 ft. max.

Actual pipe length
541* ft. max.

*Airstage V-II 208/230V series is up to 492 ft.

Pipe length from first separation tube to the farthest indoor unit
196* ft. max.

*Airstage V-II 460V series is up to 295 ft.

Height difference between indoor and indoor units
49 ft. max.

High static pressure

Outdoor unit static pressure is adjustabke up to 0.32 in WG. This facilitates mechanical room and hood installations.

0.32 in. WG as standard

V-II series Installation Example
High static pressure is achieved using large diameter fan and a DC motor.

Wide operating range

Installation in wide temperature conditions is possible due to an increase in operational range.

J-SERIES Heat Pump type *1

14	-10	14°F(-10°C) 14°F(-10°C)
-4	-20	-4°F(-20°C)

*1 VRF Heat Pump system operates in non-simultaneous heating or cooling.

*2 Operation range based on a single condensing unit; when multiple condensing units are used on a single refrigerant circuit (12 ton thru 24 ton) the cooling lower operating range is limited to 23°F (-5°C).

*3 When cooling operation will be required at outdoor air temperature below 23°F (-5°C), the outdoor unit must be installed higher than or equal to the elevation of the indoor units.
7

EASY INSTALLATION

Easily transported *J-SERIES* *V-SERIES*

Easily craned into position using lifting belt hooks

Can be transported in a small elevator

Design of outdoor unit allows for lifting straps to be used

Slots in base of the unit allow for easy transportation by forklift.
Simple signal line connection *J-SERIES* *V-SERIES*

Communication wiring can be connected continuously to any component, making installation easier.

Up to maximum length 11,811 ft / 3,600 m

Other wiring method   Simple wiring method

## High capacity connection

J-SERIES   *V-SERIES*

Various combinations from 6 Tons to 24 Tons with 45 indoor unit models, 11 types, can be selected. A minimum of 50% to a maximum of 150% indoor unit connectible capacity.

Number of connectible indoor units	Connectible indoor unit capacity range	Compatible indoor unit
3Ton : 1 to 6 units 4Ton : 1 to 8 units J-II: 5Ton : 1 to 9 units	50 % to 130 %	11 Types of Airstage indoor units ranging in size from 7 kBTU to 60 kBTU

Connectible indoor unit capacity range
50% to 150%
For VR-II series and V-II 460V series

Wide variation indoor units
11 types, 45 models

Connectible indoor unit number
up to 45
Note: When total indoor unit capacity is greater than 100%, individual indoor units will operate at a slightly lower capacity when maximum capacity is required.

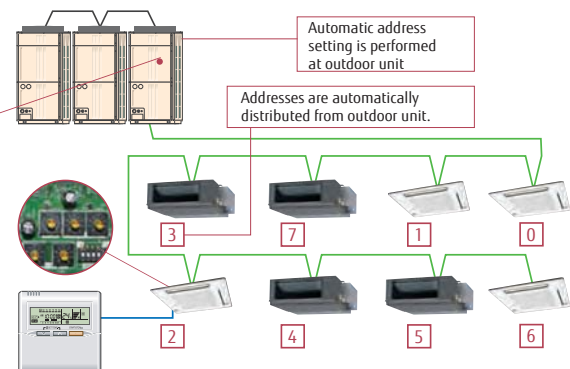

Automatic address setting *J-SERIES* *V-SERIES*

The address of each indoor unit can be automatically set by the touch of a button on the outdoor unit.
Press the pushbutton switch of outdoor unit.

Automatic address setting is performed at outdoor unit

Addresses are automatically distributed from outdoor unit.

3   7   1   0

2   4   5   6

Manual address setting from indoor unit and remote controller is also possible.

# HIGH RELIABILITY

Refrigerant circulation control *V-SERIES*

Innovative compressor control logic balances refrigerant flow rate of each outdoor unit by controlling inverter speed.

Load Level

ON	ON	OFF
DC 1	DC 2	DC 3

Master Slave 1 Slave 2

Unbalanced operation condition

ON	ON	ON
DC 1	DC 2	DC 3

Master Slave 1 Slave 2

Balanced operation condition

Easy access *V-SERIES*

By adopting a removable L-Shape front panel, working space is greatly enlarged improving installation and servicing of the outdoor units.
Life-extending operation *V-SERIES*

Lead outdoor unit rotation
The rotation of the lead outdoor unit provides equal runtime for all units, extending equipment life.

Rotation

Rotation   Rotation

Note: The inverter compressors start in priority. Rotate operation is alternated by the start / stop timing of the compressors.

Fujitsu Mobile Technician App

This free app is a handy, troubleshooting tool for heat pump and heat recovery systems. The app helps contractors troubleshoot error codes, thermistors and pressure sensors. It also includes a built-in flashlight. Fujitsu Mobile Technician is available as a troubleshooting system performance aid 24/7/365 and requires no phone call or waiting on hold.

The Mobile Technician App requires iOS 6.0 or later and is compatible with iPhone, iPod touch and iPad, it's optimized for the iPhone 5. An Android version for 4.0 or later is also available through Google Play.

HEAT PUMP

AIRSTAGE™
J-IIS / J-II

The J-Series provides air conditioning systems for a wide range of applications from small office buildings and stores to large houses.

Connectable indoor unit capacity up to 130%.

A large number of J-Systems can be connected to a single VRF communication network offering a variety of central and remote communication and BMS options.

Applications

Small Commercial

Space-saving design and long piping design allow for flexible installation on the roofs or balconies of small and medium-size buildings.

Large Residential

Multiple indoor units of various capacities and types can be connected.

J-IIS OFFERS SPACE SAVING DESIGN

The compact size with a height of less than 3.3ft (1m) allows it to be installed under windows and in tight spaces

Small and light-weight outdoor unit

J-II SYSTEM CONFIGURATION EXAMPLE

• The J-II system offers a long pipe length of 590 ft. total.
• Connection of multiple indoor units using separation tubes and headers.

ADVANCED HIGH EFFICIENCY TECHNOLOGY

J-IIS

J-II

LARGE HEAT EXCHANGER
Heat exchange performance is substantially improved by by adding a 3rd row to the heat exchanger.

DC INVERTER CONTROL
Efficiency is improved by mounting of new active filter module.

HIGH EFFICIENCY DC FAN MOTOR
Using low noise dual DC fan motors offers better control and efficiency.

LARGE PROPELLER FAN
High performance and low noise realized by large propeller and optimization of angle.

HIGH EFFICIENCY DC TWIN ROTARY COMPRESSOR
DC twin rotary compressor provides great performance under all load conditions. Its performance is optimized for part-load operation.

SMOOTH AIRFLOW GRILLE
This grille was aerodynamically designed for good efficiency with little blow loss.

HEAT PUMP

AIRSTAGE™ V-II series

For 208 /230V	For 460V
3 Phase	

Smart and cutting edge design
Extensive lineup from 6 to 24tons in 2Ton increments
Connectable indoor unit capacity up to 150%
A large number of Airstage systems can be connected to a single
VRF communication network offering a variety of central and remote
communication and BMS options.

System Outline

Excellent energy savings

Heat pump inverter control improves system operation efficiency in part-load conditions when one or many indoor units are in operation.

Lower life-cycle cost

System operates with minimum energy usage. Only service the zones that need it, which allows for less required operating energy and maintenance.

Easy installation and maintenance

The flexible communication method and piping connections makes installation and maintenance easy even for large systems.

Large Office

SPECIFICATIONS

System configuration example

• This system is used for medium-sized and large buildings. Connecting each outdoor unit makes it possible to create a high-capacity system.
• Connection of multiple indoor units using separation tubes and headers.

ENERGY SAVING TECHNOLOGY THAT BOOSTS OPERATION EFFICIENCY

Powerful large propeller fan
By using CFD*[1] technology, a newly designed fan achieves high performance and low noise operation.

*1. CFD = Computational Fluid Dynamics

3 phase DC fan motor
Efficiency is substantially improved by high efficient motor with sophisticated driver control. In addition, low noise is realized by DC fan motor.

Subcool heat exchanger
High Heat Exchange efficiency is achieved by using an internal projection shape double pipe construction.

Sine-wave DC inverter control
High efficiency is realized by adoption of reduced switching loss IPM.

High efficient compressor
Large capacity DC inverter compressor
Large capacity high efficient DC twin rotary compressor with excellent intermediate capability.

4-face heat exchanger
Heat exchange efficiency is significantly improved by the introduction of a new 4-face heat exchanger that increases effective surface area.
Front intake port
(corner cut air inhaling structure)
In multiple outdoor unit installations, the unique front intake design improves airflow into the Heat Exchanger.
MULTIPLE OUTDOOR OPERATION CONTROL

When multiple outdoor units are connected a sophisticated operation is performed by each compressor. Rather than running one compressor at full load and distributing refrigerant to one heat exchanger, this control method operates all compressors at part load and distributes refrigerant to all of the heat exchangers which allows for the overall system efficiency to be improved.

Compressor Load level

High efficient operation

Inefficient operation
HEAT EXCHANGER REFRIGERANT CONTROL

The heat exchanger in the outdoor unit is split into two parts (Top and Bottom). The efficiency of the heat exchanger has been improved by adopting an optimum refrigerant path control where the refrigerant is distributed more into the top heat exchanger as this is where there is a greater air flow intake.

HEAT RECOVERY

AIRSTAGE™ VR-II series

For 208 /230V   For 460V

3 Phase

Smart, cutting edge design
Extensive lineup from 6 to 24 tons in 2Ton increments
Connectable indoor unit capacity up to 150%
A large number of Airstage systems can be connected to a single
VRF communication network offering a variety of central and remote
communication and BMS options.

Benefits

Simultaneous cooling and heating operation using 1 refrigerant system

Cooling and heating can be freely selected for each indoor unit to provide simultaneous cooling and heating in rooms with large temperature differences.

Lower life-cycle cost

System operates with minimum energy usage. Only service the zones that need it, which allows for less required operating energy and maintenance.

Handles changes in temperature differences

The operation mode can be freely changed when there are large temperature differences during the day, such as between seasons.

Heat exchanger
Indoor unit
EEV
Cooling   Heating

Our Heat recovery systems achieve high operating energy efficiency by drawing heat from the room to be cooled and transferring it as energy for rooms that are to be heated.

Energy savings have been improved as heating and cooling modes can be operated at the same time on the same air conditioning piping system.

FLEXIBLE PIPING CONNECTION

A more flexible refrigerant piping work is possible by the use of various piping and RB Unit connections, for adjustments to the floor layout and building structure.

Separation tube

RB Unit (Single type)

RB Unit (Multi type)

Max.3 or 8 indoor units

Max. 8 indoor unit

Single connection	Group connection	Single connection	&	Group connection	RB Unit less connection*2
Individual cooling and heating	Simultaneous cooling and heating	Individual cooling and heating		Simultaneous cooling and heating	Cooling only

Application
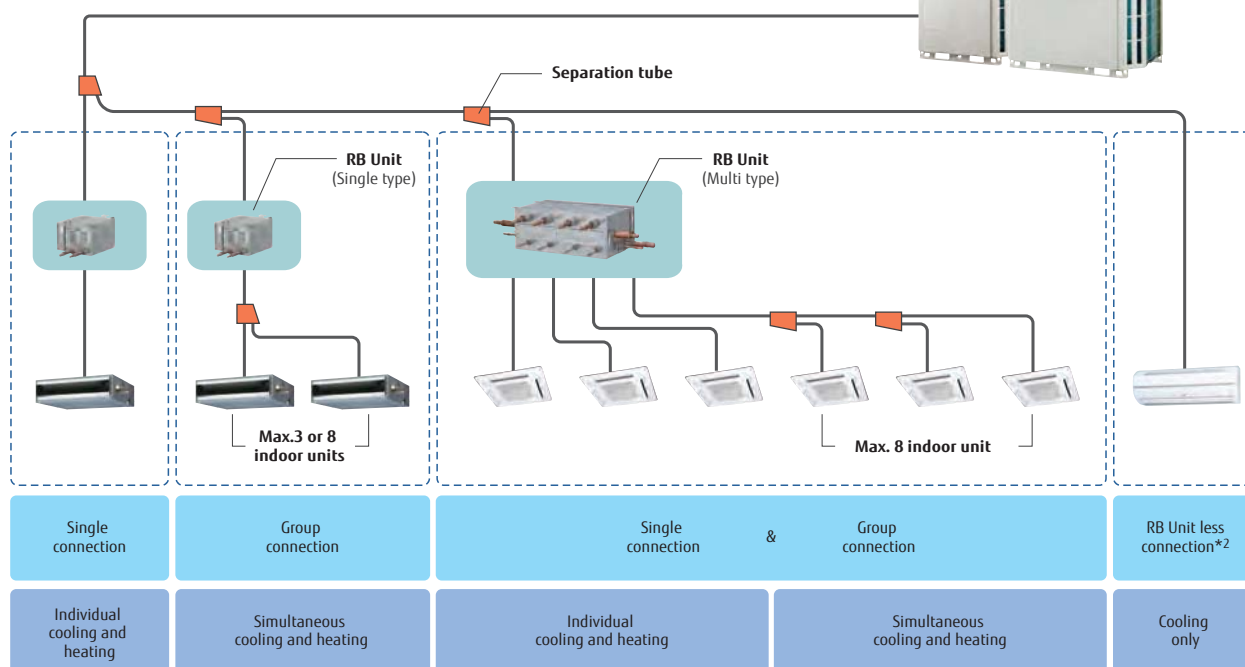

• The RB unit can be freely positioned between the first branch and the indoor unit.
• The maximum height difference between RB units is 49ft.(15m).
* 2. RB Unit is not necessary for cooling only use.

FLEXIBLE INSTALLATION OF REFRIGERANT BRANCH (RB) UNIT

See specifications of RB units on pg 78.

Height
7-13/16 in.
(198mm)

RB unit (single type)   RB unit (multi type)
• Small & slim design saves space

• A drain pipe is not required

• The control box position can be changed to meet the installation conditions

Single RBUs offer flexible installation orientation to accomodate space requirements.

Simple installation series connection design

• 2-way connection

• Reducing overall piping length

• Up to 2 units can be connected in series.
Easy to maintain in a narrow space.
• Maintenance can be performed from the side.
• No top-access service needed.

• Electronics enclosure can be temporarily slid down for service access.

• Parts can be replaced easily even in a narrow ceiling space.

ARUM24TLAV
ARUM30TLAV
ARUM36TLAV

SLIM & COMPACT DESIGN

In the case of bottom return air connection, not only does the indoor unit design allow for installation in a narrow ceiling space of 10-5/8in (270mm), further space savings have been achieved by mounting the electrical control box internally inside the chassis.

44-11/16in (1,135mm)

10-5/8in (270mm)

Control box is now included as part of the main chassis

One touch operating and easy to install long life filter (Optional Parts)

EASY MAINTENANCE

Structural improvement is attained by making the bottom panel two pieces, front and rear. The internal fan casing is also manufactured in two pieces, namely upper and lower. The maintenance of the motor and fan can be easily carried out by removing the rear panel and the lower part of the casing while leaving the main chassis installed.

1.Control box
2.Fan casing
3.Fan
4.Motor

Bottom panel: 2 pieces

High Static Pressure Duct (3, 4, 5 ton)

ARUH36TLAV
ARUH48TLAV
ARUH60TLAV

High Static Pressure Ducted Units combine efficient casing design with non metallic fan wheels and casings to reduce noise levels; units are capable of delivering hot or cold air at static pressures up to 1 in.WG. These units are perfect for conditioning hard-to-reach areas and are able to meet the needs of many different types of applications.

EASY INSTALLATION (COMPACT SIZE & LIGHTWEIGHT)

Equipped with a compact and lightweight chassis to simplify installation and provide better flexibility for tight installation spaces.

High Static Pressure Duct (6, 8 ton)

ARUH72TLAV1
ARUH96TLAV

ARUH72TLAV1

High static pressure ducted units combine efficient casing design and powerful DC blower fans to deliver efficient high static pressure up to 1.2 in.WG

ARUH96TLAV

*Connectable combination.

FLEXIBLE LINE-UP WITH WIDE CAPACITY RANGE AND HIGH STATIC PRESSURE

- Selectable capacities from 1 to 5 tons.

- Broad static pressure range for a wide range of applications.

- Durable powder-coated thick steel gauge cabinet.

- Acoustical and thermal insulation is upgraded from 1/2" to 1" thick to reduce heat loss.

- Equipped with standard MERV 3 filter.

- Easily retrofitted into existing installations.

Static pressure range
0.1 to 0.8 in.WG
(25 to 200Pa)

*Except ARUV12TLAV
0.1 to 0.7 in.WG
(25 to 175 Pa).

Makes the Fujitsu Airstage platform an even more flexible solution.

Ceiling

ABUA30TLAV
ABUA36TLAV

Powerful ceiling-hung indoor units are easy to install and can provide plenty of warm or cold air to a large space. Ceiling-hung units are the perfect solution for large spaces such as classrooms, restaurants, and kitchens.

Note: IR Receiver is standard for communicating with optional Wireless Remote Control.
INSTALLATION

Open
General installation pattern which suspends the indoor unit from the ceiling.

Concealed

Installation pattern where part of the indoor unit is embedded into the ceiling.

Wall mounted (Locally purchased)

Installation which fixes the indoor unit to the wall by the use of wall brackets (field supplied). This type of installation can be used when the ceiling space is insufficient.

Compact Wall Mounted

ASUA7TLAV
ASUA9TLAV
ASUA12TLAV
ASUA14TLAV

Compact (Only 8.5" inches deep) and stylish design.

Note: IR Receiver is standard for communicating with optional Wireless Remote Control.

FILTER FEATURES

High performance filter provides high quality heating and cooling.

Long-life* Ion Deodorization Filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

(*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)
Apple-catechin Filter

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

Deodorizing effect (Odor reduction rate)

Ammonia

Trimethylamine

Hydrogen sulfate

High performance filters have been thoroughly tested by the Environmental Sanitary Inspection Center using an advanced Deodorization Test.

Note : Specifications are based on the following conditions.
Cooling : Indoor temperature of 80°F(26.7°C)DB/67°F(19.4°C)WB,and outdoor temperature of 95.0°F(35°C)DB/75°F(23.9°C)WB.
Heating : Indoor temperature of 70°F(21.1°C)DB/60°F(15.6°C)WB,and outdoor temperature of 47°F(8.3°C)DB/43°F(6.1°C)WB.
Pipe length : 25ft.(7.5 m), Height difference : 0ft.(0 m) (Outdoor unit - Indoor unit).
Built-in protective functions may limit capacity or shut off unit if unit is operated outside of unit design operating temperature ranges.

COMPACT SIZE

Powerful output in a compact design

Though the indoor unit is compact, it features a large, high pressure cross fan (3-1/2in./90mm diameter) in a center mounted configuration and a Lambda type heat exchanger to provide plenty of power.

Width
31-1/8 in. (790mm)

SYMMETRICAL DESIGN

Symmetrical, clean design that suits all interiors.

HIGH POWER DC FAN MOTOR

• High power
• Wide rotation range
• High efficiency
• Compact size

AUTO SWING LOUVER

The Auto Swing Louver function ensures that the air direction corresponds to the mode selected.

① ② ③ ④

Swing

EASY MAINTENANCE

Improved drain pan design simplifies cleaning and maintenance.

AIR CONDITIONER FILTER FEATURES

Ion Deodorization Filter

Organic coating
fin used heat
exchanger

Apple-catechin
Filter

Air Filter

Antibacterial deodorizing pre-filter with special ceramic powder
Long-life*[1] Ion Deodorization Filter

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

Apple-catechin Filter*[2]

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

*1 The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.

*2 Using different filters at both sides.

Touch Remote Control
(2-WIRE): UTY-RNRUZ1

Max. controllable
16
indoor units
Easy operation by high-definition large STN-LCD touch screen
- Built-in temperature sensor
- Built-in weekly/Daily timer(ON/OFF(Occupied/Unoccupied),Temp.)
- Backlight enables easy operation in a darkened room
- Room temperature display
- Administrator temperature set point limitation
- Corresponds to 12 different languages (English, Chinese, French, German, Spanish, Russian, Polish, Italian, Greek, Portuguese, Turkish and Dutch)

HIGH PERFORMANCE AND COMPACT SIZE

- In addition to the individual control, various energy saving controls can be realized using one remote controller only.

Individual control + Thermo sensor + Weekly timer + Auto off timer

ACCURATE AND COMFORTABLE CONTROL
- Indoor temperature can be detected accurately by the inclusion of a thermo sensor in the body of the wired controller.
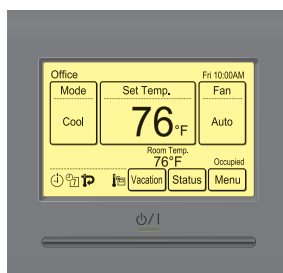

Room temperature sensor

Room temperature display

BACKLIGHT
- Backlight enables easy operation in a dark room.
- Backlight display time of 30 or 60 seconds can be set.

VARIOUS ENERGY SAVING SETTINGS
Auto OFF Timer
- The indoor unit automatically turns off after a set time has passed.
- The time interval for which auto off works can be set.

Ex) At interval time hour (17:00 to 24:00) to prevent forgetting to turn off

Set interval time hour (17:00 to 24:00)

▼ ON   ▼ Auto OFF

Set off time
(30 to 240 minutes)

OFF

17:00   24:00
2 schedules Weekly Timer
- 2 schedules such as for the summer and winter can be set.
- 8 setting changeable per day of week (Setting items: ON / OFF (Occupied/Unoccupied), Temperature, Time)
Schedule 1 (Summer schedule)

Setting temp.

ADDITIONAL FUNCTIONS

Away mode

• Cooling / Heating is automatically started when the room temperature reaches a setting temperature even if the indoor unit is off.

| In summer | Room temp. |
| Setting temp. | |

Setback-Heat
function operation

Heat function set   Automatically start   Automatically stop

| In winter | Room temp. |
| Setting temp. | |

Setback-Cool
function operation

Cool function set   Automatically start   Automatically stop

Displays setting status and Limitations

• The remote controller settings can be easily checked

Child lock

• Lock / unlock method: Push the ON/OFF button and the screen (4 seconds)

Daylight savings time (Summer Time)

• Provides Daylight Savings adjustment option for regions that uses it.
Name registration

• Indoor unit names can be registered in the remote control screen. This makes it easy to identify the indoor unit.

SIMPLIFIED INSTALLATION

Uses non-polar 2-wire type

• The faulty wiring can be prevented by using non-polar 2-wire.
Auto Address Setting/Setting Position Notification

• Reduce errors and install time compared with manual addressing

Address →   1   2   3   4

The appropriate indoor unit performs the air blow and LED lamps blink.
EASY MAINTENANCE

Error History Display

• The errors that occur in the indoor unit or remote control are saved.

• A maximum of 32 error incidents can be saved.
SPECIFICATIONS

Model name	UTY-RNRUZ1
Power source	DC 12V
Input Power	4-3/4 × 4-3/4 × 13/16 (120 x 120 x 20.4)
Airflow Rate	8 (220)

DC12V is supplied by the indoor unit.

54

Wired Remote Control

(3-WIRE) UTY-RNKU

Max. controllable
16
indoor units
The room temperature can be controlled by detecting the temperature accurately from the built-in sensor

• Simple operation with Built-in Weekly / Daily Timer.

• Control up to 16 indoor units.

• Up to 2 wired remote controls can be connected to a single indoor unit.

ACCURATE AND COMFORTABLE

Indoor temperature can be detected accurately by the inclusion of a thermo sensor in the body of the wired controller.

This wired remote controller and the optional remote sensor allows flexibility in sensor location, suitable for all requirements.

Example of changing sensor:

Remote Sensor in the bedroom

Wired Remote Controller in the living room

Displayed temperature is set temperature.

BUILT-IN TIMERS

A weekly timer with up to four different On/Off and temperature settings per day
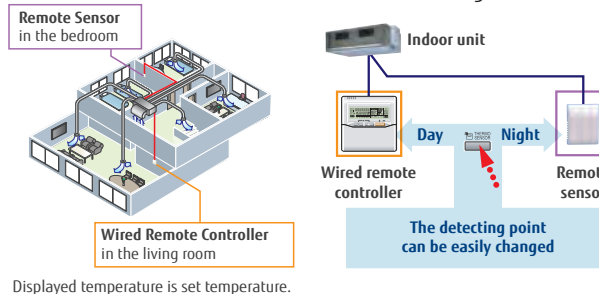

SIMPLE INSTALLATION

Designed for flush mount or usage of standard electric box.

Indoor unit

Day   Night

Wired remote controller   Remote sensor

The detecting point can be easily changed

Simple Remote Control

(2-WIRE) UTY-RSRY / UTY-RHRY (WITHOUT OPERATION MODE)

Compact wired remote control unit provides access to basic functions

• Built-in temperature sensor

• Backlit display

• Equipped with Remote control prohibition

• Suitable for hotels, classrooms or offices as it is easily operated with no complex functions.

Max. controllable
16
indoor units

UTY-RSRY   UTY-RHRY

With operation mode   Without operation mode
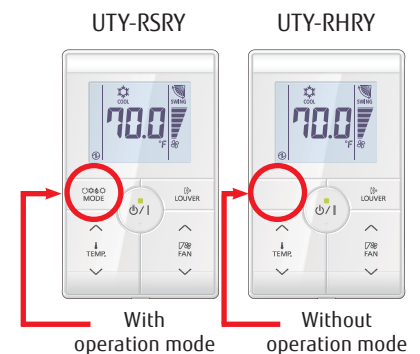

VERTICAL LOUVER CONTROL

Offers vertical louver movement control for ducted and cassette units.
ROOM TEMPERATURE SET POINT LIMITATION

The Simple Remote Control can manage set point limitation in small buildings without the central controller requirement.

DC12V is supplied by the indoor unit.

Wireless Remote Control

UTY-LNHU

Simple and sophisticated operations with a choice of 4 daily timers

• A single controller controls up to 16 indoor units.

Max. controllable
16
indoor units

Selectable
4
daily timers

ACCURATE AND COMFORTABLE

Select from 4 different timer programs: On / Off / Program / Sleep

Program timer: The program timer operates the ON and OFF timer once within a 24 hour period.

Sleep timer: The sleep timer function automatically corrects the set temperature according to the time setting to prevent excessive cooling or heating during sleep hours.

EASY INSTALLATION AND OPERATION

• Code selector switch prevents indoor unit mix-up. (Up to 4 codes can be set.)

• Wide and precise transmitting range.

• IR Built-in receiver is standard in compact cassette, ceiling/floor, and wall mounted indoor units.

ADDRESS SETTING

During installation, address setting can be performed using the Wireless Remote Control, thus eliminating manual switch setting.

WI-FI INTERFACE FOR VRF
Control your fujitsu airstage VRF indoor unit from anywhere

HOW DOES IT WORK?

• The indoor units are controlled from a webpage or using an iOS or Android APP in a very intuitive way.

• A wired device installed near each unit controls its operation and communicates over Wi-fi to the Internet router.

• A server in the cloud manages the whole process.
Remotely manage your VRF indoor unit using a smartphone, tablet or PC via the Internet.

FEATURES

• Manages the VRF indoor unit using the iOS or Android app.

• Programs the indoor unit operation schedule.

• Offers access to several indoor unit settings including Mode, temperature set point, and much more.

• Offers early startup that brings the space to the desired set point before arriving.

• Also, offers delayed setback after leaving.

• Provides instant alarm notifications.

• Error reporting, available in several languages

TECHNICAL FEATURES

Enclosure UL Approval	ABS (UL 94HB)
Dimensions	2-3/4 x 4-1/4 x 1-1/8 (70 x 108 x 28)
Weight	0.17 lbs (80g)
Color	White
Power Supply	12V, 55mA Can be powered through indoor unit.
Mounting	Wall
LED indicators	1 x Device status
Operating Temperature	32°F ~ 104°F (0°C ~ 40°C)
Operating humidity	<93% HR, no condensation
RoHS conformity	Compliant with RoHS directive (2002/95/CE).
Certifications	CE confirmity to EMC directive (2004/108/EC) and Low-voltage directive (2006/95/EC) • EN 60950-1 • EN 301489-1 v1.8.1 • EN 301489-17 v2.1.1

Touch Panel Controller with Internet

UTY-DTGYZ1

High visibility and easy operation via high resolution 7.5 inch TFT-LCD touch panel screen

- Controls up to 400 indoor units*
- Provides Internet/LAN remote control and operation
- Indoor units can be grouped for batch monitoring and setting
- Schedules are programmable with up to 20 settings per day
- Easy-to-understand Graphical User Interface (GUI)
- Data can be transfered to USB for further analysis
- Does not require a 4X4 electric box. Mounts flush to the wall.
- Large-sized 7.5-inch no-glare TFT color touch screen
- Selectable 2 display types (Icon / List) in monitoring mode
- Supports 7 different-languages ,English, Chinese, French, German, Spanish, Russian, Polish.

Max. controllable 400 indoor units

* For Heat Recovery network systems the limit is 320 indoor units, consult the D&T manual for proper wiring and the use of signal amplifiers.

FUNCTIONS

EASY MAINTENANCE

- Flat touch screen is easily cleaned
- Non-glare coating on touch panel controller minimizes fingerprint marking
- Easy-to-remove front cover

REMOTE MONITORING AND OPERATION FUNCTIONS

- Internet/LAN remote monitoring and control of the VRF system using a web browser. (Operation status monitoring, Operation mode setting, and Error history display)
- Automatically emails errors.

Operation status monitoring
Tablet
Error notification by E-mail
LAN or Internet
PC
Operation mode setting
VRF network system
EASY OPERATION

- Easy-to-understand icon-driven Graphical User Interface (GUI)

- Operation can be selected using your finger or the dedicated touch pen by pressing the appropriate on-screen icon
- Up-to-date status display
- Background color identifies current control operation; Blue for monitoring, green for operational control

OPTIONAL: ELECTRICITY CHARGE APPORTIONMENT

Electricity Charge Apportionment optional add-on USB drive can be added to help users be energy aware and help building owners apply sub-tenant billing.

- UTY-PTGXA must be ordered separately

UTY-DTGYZ1 cont'd

UP TO 400 INDOOR UNITS CAN BE CONTROLLED

System Controller

UTY-APGXZ1 · Software

System Controller provides the advanced integrated monitoring & control of VRF network system from small scale buildings to large scale buildings.

- Up to a maximum of 4 VRF network systems, 1600 indoor units, and 400 outdoor controlled.

- In addition to air conditioning precision control function, central remote control, electricity charge calculation, schedule management, and energy saving functions are strengthened and building manager and owner needs are met.

Energy recovery ventilator system

Outdoor air unit system

Supply & Exhaust fan

DIVERSE OPERATION MANAGEMENT & DATA MANAGEMENT

Schedule management

• Annual schedules can be set for each remote control group / user defined group.

• Start / stop, operating mode, remote control prohibition, and temperature settings can be set up to 143 times per day at 10 minute intervals for up to 101 configurations for each remote controller group.

• Allows programming of special settings for holidays, including public holidays, for a complete year.

• Low noise operation of outdoor unit can be scheduled.

Diverse control of indoor unit

• Indoor unit operation state, operation mode, etc. are displayed

• Indoor unit start / stop and operation mode switching

• Room temperature set point limitation

Remote control prohibition

This prohibits changes to the operation mode, temperature, start/stop, etc.

Automatic clock adjustment

The time setting of each controller can be set in batch automatically.

Error display & E-mail notification

Errors provide popup messages, audible sound and e-mails. Errors for the past year are logged and can be reviewed later.

Database import/export

Imports/exports registration data, layout data, and image data.
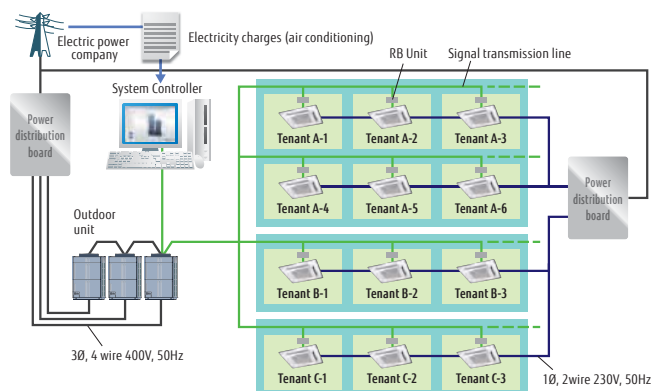

Only the administrator can use this setting.

Operating & control record

Displays the history of operation status and control.

ELECTRICITY CHARGE APPORTIONMENT

System Configuration Example

Standard for System Controller
Option for System Controller Lite UTY-PLGXA1

Electricity charge apportionment calculation framework

Suppose you want to find the power consumed by the air conditioners of each tenant from the electricity charge for each month. With Electricity Charge Apportionment function, used energy apportionment ratio will be provided, calculating in detail the energy consumed by the units used by each tenant. This information is then used to calculate the charges for the electricity consumed for air conditioning by each tenant from the total electricity charges in the bill from the electric power company. (See figure at right)

The detailed calculation takes into consideration such things as unused rooms and nighttime electricity charges and shows them in a charges calculation sheet.

Weight (lbs.oz.(g))	3lbs. (1,500)

External Switch Controller

UTY-TERX

Air conditioner switching can be controlled by connecting other sensor switches

• In combination with a field supply Card-Key Switch or other sensor, the External Switch Controller allows control of the ON / OFF, Room temperature, Fan speed and Master control functions. This makes this product suitable for installations such as hotel rooms.

• Card-key or other sensor switches are available as a field supplied parts.

The set temperature can be specified for cooling and heating individually

Occupancy sensors can be used to setback temperature and fan speed when room is unoccupied. These setbacks are reverted when people come back to the room.

SYSTEM OVERVIEW
BACnet® Gateway (Hardware)

UTY-VBGX

- BACnet® Gateway connects a VRF system to a BMS via BACnet® IP.

- A maximum of 128 indoor units and 32 refrigerant systems can be connected to a single BACnet® Gateway.

- Compatible with BACnet® (ANSI / ASHRAE-135-2012) application specific controller (B-ASC).

- Compatible with BACnet®/IP over Ethernet.

SPECIFICATIONS

Model name	UTY-VBGX
Number of controllable indoor units	128
Number of controllable refrigerant system	32
Number of controllable VRF network	1
Number of connectable Gateways / one VRF network	4

Model name	UTY-VBGX
Power supply	208-240V 50/60Hz, single phase
Input power (W)	4
Dimensions (H x W x D) (in.(mm))	10-1/4 × 2-5/16 × 5-11/16 (260 × 59 × 145)
Weight (lbs.oz.(g))	39oz (6100)

BACnet® Gateway

UTY-ABGXZ1 [Software]

- Connect VRF network system to BMS via BACnet IP, a global standard for open networks.
- A maximum of 1600 indoor units with 4 VRF network systems (a maximum of 400 indoor units & 100 outdoor units for one network system) can be connected to one BACnet® Gateway.
- Compatible with BACnet® (ANSI / ASHRAE-135-2012) application specific controller (B-ASC).
- Compatible with BACnet®/IP over Ethernet.
- Scheduling function, Alarm & Event functions as well as Electricity Change Apportionment function are provided in BACnet® Gateway.
- Connection between VRF network system to personal computer is possible via small U10 USB interface. However, both U10 USB interface & personal computer are field supplied items.
- Corresponds to 7 different languages, English, Chinese, French, German, Spanish, Russian, Polish.

AIRSTAGE™

Service Tool

UTY-ASGXZ1 [Software]

Extensive monitoring and analysis functions for installation and maintenance

- Operation status can be checked and analyzed to detect even the smallest abnormalities
- Offer secure remote monitoring and control
- Storage of data on system operation status on a PC allows access even from off site.
- Up to 400 indoor units (a single VRF network system) can be controlled and monitored for large scale buildings or hotels
- This software can be connected to any point of transmission line with USB adaptor (Locally purchased).

Max. Monitor and controll
400 indoor units

Max. Monitor and controll
100 outdoor units

* The saved data can be displayed offline.However, the data saved by the following model cannot be displayed.
  • UTR-YSTB/UTR-YSTC (Service Tool)
  • UTR-YMSA (Web Monitoring Tool)

AUTOMATIC OPERATION CHECK FOR REFRIGERATION CYCLE

After product installation, operation check can be performed automatically. Self-diagnosis function automatically judges whether each sensor value is normal, so the operation check work can be reduced. The diagnosis can also be output as a report.

[Note] Use only as a guide and judge for yourself finally.

Whether each sensor value is normal is judged automatically.

☑ Discharge temperature normal value OK
☑ Super heat volume normal value OK
☑ High pressure pipe normal value OK
☑ Low pressure pipe normal value OK
  ...etc.

REMOTE TECHNICAL SUPPORT & MAINTENANCE

On-site check screen can be shared with the skilled person in a remote location. When visiting for troubleshooting on-site, operation status can be shared in real time and get assistance easily.

Online chat function helps to support on-site staff.

On-site
Off-site
Internet
Technical support
Installer / Administrator
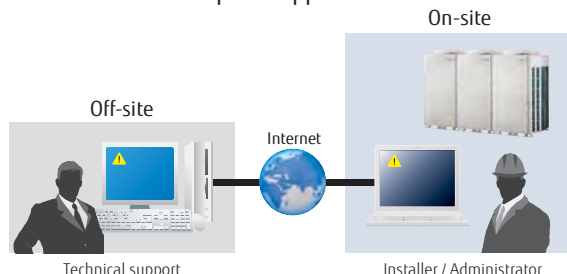

MULTIPLE TREND GRAPH DISPLAY AND COMPARISON

- Multiple graphs can be displayed in Service Tool depending on the situation.
- Up tp two offline data files can be viewed and compared simultaneously

PERSONAL COMPUTER SYSTEM REQUIREMENTS

Operating system	• Microsoft® Windows® 7 Professional (32-bit or 64-bit) SP1 • Microsoft® Windows® 8.1 Pro (32-bit or 64-bit) • Microsoft® Windows® 10 Pro (32-bit or 64-bit)
CPU	1 GHz or higher
Memory	• 1 GB or more (for Windows Vista®, Windows® 7 [32-bit], Windows® 8.1 [32-bit], and Windows® 10 [32-bit]) • 2 GB or more (for Windows® 7 [64-bit], Windows® 8.1 [64-bit], and Windows® 10 [64-bit])
HDD	40 GB or more of free space
Display	1366 x 768 or higher resolution

Interface	• 2 USB ports
	  - 1 USB port is required for software protection key connection
	  - 1 USB port is required for Echelon® U10 USB Network Interface

Software	Internet Explorer® 11 or Microsoft Edge / Adobe® Reader® 9.0 or later

Packing List	Quantity	Application
WHITE-USB-KEY (Software protection key)	1	Software protection key to be connected to USB port on the Service Tool-installed PC. These products runs only on a PC with WibuKey.

•Personal computer that satisfies the following system requirements
•Echelon® U10 USB Network Interface – TP/FT-10 Channel (Model number: 75010R) (Required for each VRF Network.)
SERVICE & MONITORING

FUNCTIONS

1) System List

Displays the overall operation status of all or specified units in the system in a list form.

2) Equipment Detail (Diagram)

Displays the detail information for sensor values, electrical components etc. for the specified units in schematic. The information here can be used along with the detail information in list form, to check the operation status of units and make detail analysis on the cause, in case an error occurs.

3) Equipment Detail (List)

Displays the detail information for sensor values, electrical components etc. of units in a specified refrigerant system in list form. The information here can be used along with the detail information in diagram form, to check the operation status of units and make detail analysis on the cause, in case an error occurs.

4) Operation History

The indoor units or outdoor unit operation history can be recorded. The displayed operation history can be printed out and saved to a CSV file.

5) Error History

Displays the error information for each unit. The error information can sequentially be displayed up to 50 items as they occur starting with the latest error.

6) Remote File Download

Operation and error history can be downloaded. User can choose which data download by specifying the system, unit and time frame.

7) Commissioning Tool

During a test run, the outdoor unit/indoor unit sensor data can be saved for completing the commissioning report. After the end of test running, this data can be exported in CSV file format.

8) Network Topology Analyzer

A list of units connected to the VRF system network is displayed in network segments in tree form.

9) Remote Setting

Setting of the indoor unit can be performed remotely.

10) System Time Setting

Time of day setting, for all controllers in a system, can be performed simultaneously.

11) Software Version

The software version of units are acquired and displayed.

12) Central Release

Limitations on individual indoor units can be released from the central controller (remote controller limit, temperature limit).

13) Model Name Writer

A custom model name can be given for an indoor unit.

14) Error Memory Reader

When an error occurs in an indoor unit, the system records the operation data before the error and saves to a CSV file.

Note: To perform "Error Memory Reading", the Service Tool must be connected directly to the corresponding outdoor unit. Refer to the Operation Manual of the Service Tool for detail.

15) Time Guard Information

Data for determining maintenance schedule (integrated time for compressor, fan, etc.) for the indoor and outdoor units can be output to a CSV file.

Web Monitoring Tool

UTY-AMGXZ1 [Software]

Product features

- Troubleshooting is performed by monitoring each air conditioning unit remotely during periodical system checks.
- Error notification can be automatically transmitted to several locations using the internet.
- Requires a dedicated internet connection.
- Determination of an error occurrence can be made through error warnings and equipment status information obtained from a remote location.
- The monitoring data in a remote side can be optionally downloaded. And, this data can be displayed in offline mode of the service tool.
- Monitoring side computer is not required to install special software, requires only general web browser.

Design Simulator

EASY EQUIPMENT SELECTION, COMPLETE SELECTION OUTPUT, RELIABLE PROJECT MANAGEMENT

Design Simulator makes it easy to design and select equipment for complex building HVAC systems. The software output contains all important design data including: Equipment Schedule, Piping and Wiring Layout, etc. (all of the documentation needed to estimate a project.) Design Simulator simplifies the design process. To design a system, just select the indoor unit types for each system, and the software will automatically select the outdoor unit and create the piping and wiring diagram. Design Simulator also checks all of the equipment information to ensure proper installation.

Step 1 Select the model

Choose the model for each system.
Step 2 Select the Indoor Unit

Choose the unit types and the conditions and the software will select the correct indoor unit. Indoor unit can also be selected manually.
Step 2b Select the Outdoor Air Unit

If desired, choose the "Outside Air Unit" option. Outside Air Units are selected based on required airflow.

Step 3 Select the Outdoor Unit

Using the Drag & Drop function, connect the indoor unit to the appropriate outdoor unit.
Step 4 Piping Length / Piping Diagram

Piping diagram is created automatically. As piping lengths are entered, system automatically calculates refrigerant charge.
Step 5 Wiring / Remote Control Diagram

Automatically creates the wiring diagram. Simple grouping functions create a custom wiring diagram for the project.

Step 6 Select BMS Gateways and Central Controllers

Choose additional devices to meet the needs of the project.
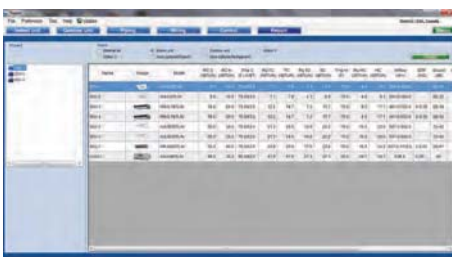

Step 7 Report Output

Design Simulator creates a project output with all of the project schedules and schematic drawings.

Setting

Software can be customized for any geographic location.

- Units (US conventional / Metric)
- Language Setting
- Custom Database Function
- Output Settings

Airstage Project Manager (APM)

For Distributors and Reps

APPLIES TECHNOLOGY TO SIMPLIFY PROJECT MANAGEMENT AND ENSURE A SUCCESSFUL VRF INSTALLATION.

- Central Project Host for Sales Team
- Track all project status
- Upload project files and equipment list
- Automated quotes and Submittal packages creation
- Get price support and place orders
- Upload Commissioning documents
- Print Extended Warranty

THE APM INTEGRATES WITH THE DESIGN SIMULATOR

- Project users can generate Engineering Submittal Packages using only a few mouse clicks.
- Users can use this integration to create numerous customizable quotes.
- Purchasing can be easily managed through the quoting system.

AIRSTAGE™ Resources

Airstage Website (for building owners)

http://www.airstagevrf.com

A PLACE TO LEARN THE BASICS

Go to airstagevrf.com to learn more about Fujitsu's Airstage VRF products and programs such as:

- Basic Product Overview
- Specifications & Downloads
- Service & Support
- Locate a Contractor Distributor
- Contact Us
- Portal Login
- Case Studies
- Locate a Sales Rep

Airstage Portal (for Engineers and Contractors)

https://portal.fujitsugeneral.com

A CENTRAL PLACE FOR PROJECT MEMBERS TO COORDINATE

The Airstage Portal provides a single source for all information for Fujitsu Airstage VRF Systems. From the Airstage Portal, all registered users have access to a wealth of information including manuals, technical information, diagrams, online training and more.

Who has access to the Portal?

- Engineers
- Contractors
- Fujitsu Distributors/Personnel
- Independent Airstage Sales Reps

To create a Portal account, go to http://portal.fujitsugeneral.com and click on "Register Now".

AIRSTAGE PROJECT MANAGER (APM) ON THE FUJITSU PORTAL
(for Reps and Distributors)

A PLACE TO SUPPORT PROJECTS ALL THE WAY TO COMPLETION

The APM ensures clear and effective communication between all members of the Fujitsu channel by applying technology to simplify project management and ensure a successful VRF installation. For access to the APM, contact your Airstage Rep. Here's what you can do inside the APM:

- Manage your Fujitsu Airstage projects large and small.
- Create a project and track its progress from the design stage, to quote generation, order processing and deliverytracking to submittal and commissioning.
- Import equipment schedules from the Fujitsu Design
- Simulator as well as piping and wiring diagrams.
- Request and manage job pricing.

AIRSTAGE™

Applications

There are many applications for Airstage VRF systems including such markets as education, healthcare, hospitality, utilities, office buildings, apartment buildings, condominiums, and restaurants.

Note: VRF Heat Recovery system provides simultaneous Heating and Cooling. System operates both Heating mode and Cooling mode.

MEDICAL AND HEALTHCARE FACILITIES

VRF gives each patient individual control of their room temperature. Central control ensures that air conditioning is only delivered to rooms that are occupied.

INDIVIDUAL CONTROL

VRF systems give each patient or each room individual control of their room temperature.

MAINTENANCE

Since each refrigerant circuit has the ability to operate independently, a properly designed VRF system can add a layer of security to a HVAC system. If an individual unit needs to be shut down for repairs, the rest of the system can operate normally.

CENTRAL CONTROL

Powerful central control ensures that heating and cooling are delivered to rooms that are occupied. This provides enormous savings for facilities with revolving occupancy.

CLEAN AIR

VRF systems can use ductless indoor units reducing the time and expense of maintaining a HVAC system and eliminating the risk of duct-borne molds and bacteria.

HEALTHIER FACILITY

VRF systems can be integrated with fresh air systems to ensure that air quality meets the needs of the occupants. VRF provides the most comfortable environment for all occupants.

OPTIONAL

Build Management System (BMS) using BACnet, LonWorks or Modbus.

See Airstage VRF case studies on our site at
www.airstagevrf.com/applications.htm
or on our YouTube channel FujitsuGeneral_USA

EDUCATIONAL AND RELIGIOUS FACILITIES

In a school, an investment in VRF is an investment in your community. VRF is more efficient than conventional systems, providing financial savings to the school for many years. Also, a quiet VRF system creates a much better learning environment for students.

HEALTHIER FACILITY

VRF systems can be integrated with fresh air systems to ensure that air quality meets the needs of the teachers and students.

CENTRAL CONTROL

Powerful central control can monitor and control individual schools, or an entire college campus, from a single location.
ZONING

Save energy by heating and cooling the classrooms that are occupied. Set temperature can pre-programmed to meet the energy budget for the school district.

COMFORT

VRF helps achieve a healthier, quieter, more comfortable and productive learning environment.

OPTIONAL

Build Management System (BMS) using BACnet, LonWorks or Modbus. Subtenant billing and Energy Charge apportionment.

See Airstage VRF case studies on our site at
www.airstagevrf.com/applications.htm
or on our You Tube channel FujitsuGeneral_USA

OFFICE BUILDINGS AND RETAIL SPACES

VRF provides a comfortable work environment for all employees. Zoning ensures that energy is only used to cool/heat occupied offices. Quiet indoor units and precise temperature control creates the most comfortable and productive work environment.

FLEXIBLE

As tenants and office configurations change, VRF system configurations can also be modified (within original design constraints) to meet the needs of new tenants.

ZONING

Save energy by only heating and cooling occupied offices. No more hot/cold calls since each zone or tenant has individual control of the set temperature.

EASE OF INSTALLATION

Can be installed in occupied office spaces with minimal disruption to occupants. Can even be installed without disrupting the existing HVAC system.

QUIET

Indoor units and outdoor units creates a pleasant work environment and reduces noise complaints.

CONTROL

Powerful controls options can manage and monitor entire building from a single location.

COMFORT

VRF provides a comfortable work environment for all employees. Quiet indoor units and precise temperature control creates the most comfortable and productive work environment.

OPTIONAL

Building Management System (BMS) using BACnet, LonWorks or Modbus. Subtenant billing and Energy Charge apportionment.

www.airstagevrf.com/applications.htm
or on our You Tube channel FujitsuGeneral_USA

MULTI-TENANT DWELLINGS

VRF improves the quality of multi-tenant buildings while reducing tenant complaints. High quality VRF systems let owners save on energy costs and reduced maintenance costs. With VRF, each tenant has individual control over the temperature setting for the comfort of their home.

QUALITY
By delivering quiet, efficient heating and cooling, VRF improves the quality of multitenant buildings and reduces tenant complaints.

ENERGY SAVINGS
Efficient VRF systems reduce the total energy costs for buildings over most other options. High quality systems reduce maintenance and service costs.

INDIVIDUAL BILLING
Using the Energy Charge Apportionment feature, landlords can easily bill each tenant for the percentage of total energy the individual tenant consumes.

INDIVIDUAL COMFORT
With VRF, each tenant can have their own controller to set their room temperature for their maximum comfort.

CONVENIENT CENTRAL CONTROL
Landlord can monitor and control all indoor units from a central location. Landlord can even troubleshoot or solve tenant complaints remotely.

QUIET
Indoor units ensures a quiet, comfortable living environment for all tenants.

OPTIONAL
Subtenant billing and Energy Charge apportionment.

FUJITSU COMMERCIAL FINANCING

For any commercial HVAC installation, you can turn to Fujitsu with confidence for equipment that's not only readily available, but also thoughtfully engineered to install with ease and save energy on utility bills.

THE FUJITSU COMMERCIAL FINANCING PROGRAM IS JUST AS EFFICIENT AND SMART:

QUICK, EFFICIENT APPROVAL PROCESS

• No cost, recourse or credit check for contractors

• End user credit approvals in 2 – 6 hours

• Contractor paid within 24 – 48 hours of install

• Single point of contact, from beginning to end

SOLUTIONS AVAILABLE FOR MOST PROJECTS

• Commercial units eligible, as well as controls and installation

• Churches, nonprofits and non-building owners qualify

TAKE ADVANTAGE OF CONVENIENT QUOTE OPTIONS:

For residential installations, please inquire with your Distributor or Fujitsu Sales Engineer about consumer financing options.

THINGS TO KNOW BEFORE YOU BUY A FUJITSU SYSTEM

COMPLETE SYSTEM WARRANTY

Standard warranties vary depending on model:

All Fujitsu Airstage systems come standard with a 2-Year Compressor/1-Year Parts warranty.

Fujitsu Airstage systems that have been properly commissioned have a warranty of 10-Year Parts/10-Year Compressor. For more details, see Airstage Warranty Statement.

For full details, see Airstage Warranty Statement.

TRADEMARKS

The Fujitsu logo is a registered trademark of Fujitsu Limited. The Airstage logo and name is a trademark of Fujitsu General America, Inc. ENERGY STAR® is a registered trademark of the EPA and DOE. Copyright © 2017 Fujitsu General America, Inc.

NON-INTERNET RETAIL POLICY

Internet sales are strictly prohibited and unauthorized. Any HVAC systems purchased on the Internet, from an online retailer or any similar e-tailing website, OR where the original factory serial numbers of the display have been removed, defaced, or replaced in any way WILL NOT BE COVERED BY WARRANTY.

Note: Condensing units come pre-charged from factory. Additional refrigerant may be required, be sure to check installation manual for more details.

THINGS TO KNOW BEFORE YOU INSTALL A FUJITSU SYSTEM

WARNING

Always use a licensed installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion. Use only parts and accessories supplied or specified by Fujitsu. Ask a licensed contractor to install parts and accessories. Use of unauthorized or improper installation of parts and accessories can result in injury or property damage. Read the installation manual carefully before using this product. The installation manual provides important safety instructions and warnings which should be followed closely. For any questions or concerns, please contact Fujitsu General America, Inc. Proper sizing and installation of equipment is critical to achieve optimal performance.

HEAT PUMP DISCLAIMER

In most climates a heat pump will handle all of your heating needs. However, this system sometimes requires some other additional source of heat to satisfy heating requirements in the coldest environments. All of Fujitsu's heat pumps use inverter technology and as such offer a wider operating range and more heat capacity than a standard heat pump but will not provide adequate heating if improperly sized or operated outside of its operating range. Specifications vary by model; please consult your contractor before choosing a heat pump as your only source of heat. Systems will maintain temperature up to +/-4 degrees relative to set temperature. To increase energy efficiency on multi-type systems, you should turn off the evaporators when heating or cooling is not needed.

DISCLAIMER

Fujitsu's products are subject to continuous improvements. Fujitsu reserves the right to modify product design, specifications and information in this brochure without notice and without incurring any obligations.

CERTIFICATIONS

ISO

ISO14001 is the standard defined by the International Organization for Standardization (ISO) related to environmental management systems. Fujitsu General America, Inc. has been acknowledged by an internationally accredited compliance organization as having an appropriate program of environmental protection procedures and activities to meet the requirements of ISO14001. The air conditioners manufactured by Fujitsu have received ISO9001 series certification for quality assurance.

ETL LISTED US
Intertek

- **ISO9001**
- **ISO14001**

ASTM

Our outdoor units shall withstand 1,000 hours of salt spray tested per procedure ASTM B117.

ROHS COMPLIANT

Fujitsu participates in the RoHS Directive, which is the Restriction of Hazardous Substances in electrical and electronic equipment. It is an EU directive intended protect the environment by forcing manufacturers to eliminate or severely curtail the use of cadmium, hexavalent chromium, and lead in all products from automobiles to consumer electronics.
