AllStyle, so much more than just another coil company

AllStyle Coil Company, L.P., commenced operations in May of 1990. From the year of 1990, factory operations grew from 40,000 sq.ft. to over 750,000 sq.ft., making *AllStyle* Coil Company the largest independent coil manufacturer in the United States.

AllStyle is owned and operated in its entirety by Mr. Lendell Martin and his family. Lendell has over 60 years of experience in the air conditioning and refrigeration industry, holds numerous design patents, and still to this day, continues working to develop new products.

Being the founder of the **Red-T Coil Company** and having operated an HVAC contracting company, Mr. Martin has a firm understanding of both the customer and contractor. Over the years, *AllStyle* has become the leader in HVAC innovation and the premier independent coil manufacturer in the AHRI Certification Program. With each innovative product, *AllStyle's* production continues to increase. *AllStyle* continues to build products of quality and durability at a competitive price.

Product inventory has increased for both multi-family and residential applications. There is a broad range of air handlers from hydronic to heat pump products, gas furnaces, condensers, and package units.

Manufacturing Process

The manufacturing of quality products requires a clear understanding of the market, and its needs. *AllStyle* defines a quality coil as one that meets or exceeds the manufacturers matched system design specifications. Our products begin with material that meets stringent quality control objectives.

AllStyle suppliers are selected by their ability to supply quality material as specified, and before shipment all materials must be inspected by the vendor to ensure they meet the necessary specifications.

Quality Coils

AllStyle coils are built to last, and are pressure tested to provide reliability. We use durable copper or aluminum tubing, and corrosion resistant aluminum end plates, which are flared instead of punched. Drain pans are made from heavy duty polymer, and are resistant to corrosion and mold growth. A choice of cabinet material is available and dual drain ports are standard. *AllStyle* units are rated for both R-22 and R-410a refrigerants. A variety of coils are available to match nearly all conditioners and heat pumps. At *AllStyle* Coil Company, L.P. we take a personal interest in every product we design, test, and manufacturer. We ensure that your home or office is comfortable, while saving you money in operating costs.

AllStyle products result from a combination of high quality material, efficient manufacturing, and superior personnel. Our fabrication machinery is regularly calibrated according to preset cycle schedules, and in-house training is provided for production personnel regularly. Our products are tested internally to ensure they meet established specifications before being shipped to the customer. The management of AllStyle is involved in the daily supervision of product fabrication, assembly, and testing.

All products are date coded, and are able to be tracked to the wholesale distributors. In the event a product failure is identified, the units are immediately returned to the factory for re-analysis. Any testing failures are traced directly back to their original source, and production adjustments are made, at which time a safe guard is put in place to prevent future problems. *AllStyle* recognizes how crucial the contribution of each individual employee is when it comes to successfully implementing and realizing its commitment to provide a quality product. Production personnel are trained to properly fabricate and assemble the components from start to finish. Each product goes through a stringent inspection process to ensure the highest quality component is being provided to each customer.

Proudly Made in **U.S.A.**

Long Term Goals

AllStyle will continue to provide innovative products to fit the needs of the current and future market. Factory expansion to support increased growth is underway with future innovations being considered.

AllStyle is a privately held corporation and invests in the future to improve the manufacturing, testing, design, and the development process. This ensures superior products reach the market in a timely fashion. Looking into the future, Mr. Martin is excited to pass along his ideas and work ethic to the next generation of his family, ensuring the company's success for many years to come. *AllStyle* has many brand names that went through the changes of innovation; Meridain, Texas Furnace, LLC., and now Broadair. These brand names incorporates the new styles in HVAC.

AllStyle Coil Company, L.P. looks forward to many continued years of growth and success because of the solid foundation upon which the company has been built on.

BCRT*, BCRP*GP*, SPR 40 - 41

Evaporator Coils

AllStyle has a variety of evaporator coils to rival any manufacturer. Each coil is carefully engineered and crafted to complement all OEM condensing units.

A-Coil

Features:

- Pitched polymer drain pan
- Left hand refrigerant drain connections
- Coil elevated from condensate
- Long Life Aluminum or Copper tubing
- Aluminum fins and end plates
- Pressure tested to 500 PSI
- Quick-Connect fittings are optional
- (AERO-QUIP #6 & #11) ** Add "QC" to Model Number
- 3/8" Liquid Line Connections
- 3/4" or 7/8" Suction Line Connections

Counter-flow (Down-Flow) Models

Air seals must be placed on the inside of the evaporator's drain pan to prevent water blow off in several counter-flow model installations.

Our Splash Guard kit is available from the local distributor. The kit contains four air seals, enough to complete two counter-flow installations.

All supply ducts must be ducted below the drain pan. The drain connection should be kept 4" to 6" above the floor line to allow for rotation of a pipe fitting and for pitch of a drain line to a floor drain. It is not recommended that any coils be used in a counter-flow model if the system is located directly over objects which could be damaged by condensate, such as in an installation on a second floor over a finished ceiling. If such a location is unavoidable, it is suggested that a water tight, galvanized auxiliary pan at least 2" deep and at least 2" larger in all directions than the supply plenum, be installed beneath the supply plenum. A separate drain line from auxiliary pan to an open drain should be provided. This open drain should be visible so that any water coming from the auxiliary drain can be seen as an indicator that the primary drain is plugged.

5 - Year Limited Warranty

Evaporator Coils

Up-Flow Cased Coil

**Cased Up-Flow (Patent Product)
Sits on Matched Manufactured
Furnace**

Features:

- Embossed, galvanized steel case
- Pitched polymer drain pan
- Left hand refrigerant drain connections
- Coil elevated from condensate
- Long Life Aluminum or Copper tubing
- Corrosion resistant aluminum fins and end plates
- Insulated cabinet with reduced fiberglass exposure
- Easy opening front access panel
- Pressure tested to 500 PSI
- 3/8" Liquid Line Connection
- 3/4" or 7/8" Suction Line Connection
- Metering device accessible from cabinet exterior

Optional Features:

- Painted Case in Executive Grey
- Left/Right Hand or Dual Port Drain Connections
- Left/Right Hand Refrigerant Connections
- A Choice of Thermal Expansion Valves
- Heat Pump Compatible
- Different Cabinet Sizes Available

Evaporator cased coils have a variety of cabinet width sizes to fit OEM furnace manufacturers for up-flow or draw-through applications.

Evaporator Coils

Horizontal Slab Coil

Features:

- Insulated galvanized steel case
- Polymer drain pan
- Long Life Aluminum or Copper tubing
- Corrosion resistant Aluminum fins and end plates
- Insulated cabinet with reduced fiberglass exposure
- Easy opening front access panel
- Pressure tested to 500 PSI
- Dual Rated for R-22 and R-410a
- 3/8" Liquid Line Connection
- 3/4" or 7/8" Suction Line Connection
- Metering device accessible from cabinet exterior

Coil length sizes varies on cabinets

Evaporator Coils

Horizontal Plenum Coil

Features:

- Cleanable, mold-resistant interior surface
- Fiberglass removed from the air stream
- Pitched, polymer drain pan elevates coil from the condensate
- Top Left and Right Refrigerant drain connections
- Superior air flow compared to other Horizontal coils
- Easily removable top panel with locking air seal for UV light

Plenum Coil with cut-outs
Patent Product

Plenum duct holes are cut by contractors per building specifications

- Factory installed Thermal Expansion Valve
- Rated for R-22 and R-410a
- Long Life Aluminum or Copper Tubing option
- Enhanced Aluminum Fins and End Plates
- Pressure tested to 500 PSI
- Plenum coil combines an adjustable inlet adapter, cooling coil, and supply plenum into one easy install
- Fits furnace 17" to 23" wide (Adjustments plates included)

Plenum coils feature convenient modular construction to facilitate installation & maintenance
May be also combined with an AllStyle blower housing with optional electric heat, hydronic, or installed with a gas furnace

Evaporator Coils

New StyleQuest Multi-Position Coils

Features:

- Multi-Position: Up-Flow, Horizontal Right or Horizontal Left (Order the desired configuration)
- Fully insulated embossed, galvanized cabinet
- Polymer drain pans (Horizontal Left, Right, and Vertical)
- Dual drain connections on each drain pan
- Long Life Aluminum or Copper tubing option
- Aluminum fins and end plates
- Orifice refrigerant metering, Standard

Optional Features:

- Painted Case in Executive Grey
- Slash Guards
- A Choice of Thermal Expansion Valves
- Heat Pump Compatible
- Different Cabinet Sizes Available

New StyleQuest Multi-Position Coil
The AllStyle Patent Product is the Only
Evaporator Coil that is Multi-Position
Left, Right, or Up-Flow

New StyleQuest Multi-Position Coil
May be applied with combined units:
AllStyle Modular Air Handler with
Electric Heat or Gas Furnace

Single or Multi-Family Air Handlers

Ceiling Mounted Air Handler

**Mounted "AB" Air Handlers
Patent Product**

Features:

- Designed for installation in a furred down or dropped ceiling area with a End Discharge or Triple Discharge Option
- Cooling Only, Cooling and Electric Heating, Heat Pump, or Hydronic Applications
- Optional factory installed electric heat of either 3, 5, 6, 8, or 10kW
- Orifice refrigerant metering is standard with Thermal Expansion Valves optional

*Patent Ceiling Mounted Air
Handler with End Discharge*

*Patent Ceiling Mounted Air
Handler with Left Discharge*

*Patent Ceiling Mounted Air
Handler with Right Discharge*

- Polymer drain pan
- Standard built-in Internal filter rack in louvered panel Only
- Pre-punched side mounting tabs for easier installations
- Long Life Aluminum or Copper tubing
- Aluminum fins and end plates
- Powder coated, hinged access panels must be ordered separately
- Fully insulated embossed galvanized steel cabinets

- Specifications may change without notice
- *Ceiling mounted air handlers may be manufactured for triple or end discharge (Specify when ordering)
- When ordering Hydronic ceiling mounted air handlers, ONLY end discharge is available.

Single or Multi-Family Air Handlers

Ceiling Mounted Double Blower Air Handler

Features:

- Designed for concealed installation in furred down ceilings
- Applications in Cooling and Heat Pump
- Requires a Sealed Return Air Space
- Optional Long Life Aluminum or Copper tubing
- Unique polymer blower scroll separates for easy blower wheel and motor removal
- Corrosion resistant polymer drain pan with optional side or blower side drain connections
- DX Coil, electric heat, motor, blower wheel, and polymer drain pan are all serviceable from the bottom
- Rugged, durable, and easy to service

Optional Features:

- White, powder coated solid or louvered hinged access panels with mounting screws
- Insulated housing, factory or field installed, allows for ducted return air plenum
- Cooling or heat pump TXV in R-22 or R-410a, factory or field installed
- Optional factory installed electric heat of either 3, 5, 6, 8, or 10kW

Single or Multi-Family Air Handlers

Wall/Stud Mounted Air Handlers

Features:

- Vertical Up-Flow application
- Front Return Air
- Fully insulated cabinet
- Tabs for stud or wall mounting are stamped to cabinet
- Long Life Aluminum or Copper DX Coils
- Aluminum fins and end plates
- 1.0 - 4.0 Tons Cooling, Heat Pump, and Hydronic Applications
- 3/4" MPT Primary and Secondary drains
- 3/8" Liquid refrigerant line
- 3/4" or 7/8" Suction refrigerant line
- 208/230 VAC operation
- Polymer drain pan

Optional Features:

- Factory or field installed Cooling or Heat Pump TXV
- Front return grilles
- Factory installed electric heat, disconnect, and float switch
- Freeze-Stat or Enter Water T-Stat

VL Stud Mounted Air Handlers are shipped with hanging brackets with front return and may be installed between studs or above a water heater, or closet*

Single or Multi-Family Air Handlers

Multi-Position Air Handlers

Features:

- Multi-Position - Up-Flow, Horizontal Right, or Horizontal Left
- 3x Polymer drain pan
- Attractive, powder painted exterior
- Fully insulated cabinet
- 208/230 VAC operation
- Multi-Speed direct drive blower
- SLN* air flow from 600 to 1600 CFM
- BLN* air flow from 1600 to 2000 CFM
- BLD* air flow from 1600 to 2000 CFM

Optional Features:

- Cooling, Heat Pump, or Hydronic Applications
- Factory installed TXV
- Optional factory or field installed electric heat
- 3, 5, 6, 8, 10, 15, or 20 kW
- Electric breakers is standard with 15kW and 20kW
- Slide in Long Life Aluminum or Copper DX coils available

Multi-Position Air Handlers Patent Product

The AllStyle Multi-Position Air Handler is a Patent Product that has 3x Durable Polymer drain pans for Left, Right, and Up-Flow

The multi-position air handler provides you with various options for installation when encountering size restrictions

Deeper Coil - More Efficiency

Single or Multi-Family Air Handlers

Multi-Position Modular Air Handlers

Features:

- Multi-Position Modular Air Handler
- Cabinet matches with AHRI Rated Coils
- Powder painted exterior
- Compact design
- 208/230 VAC operation
- 24V control transformer
- Fully insulated cabinet interior
- Aluminum or Copper tubing
- Modular air handlers may be combined with other units

Optional Features:

- Factory or Field installed electric Heat 3, 5, 6, 8, 10, 15, or 20kW
- Twin Circuit protection provided on 15 & 20kW models
- Optional painted cabinet or galvanized steel

Martin Mobile Home Air Handlers

Martin Mobile Home Air Handler has the filter on top

Down-Flow

Up-Flow

Features:

- Designed specifically for mobile home use a/c, heat pump, or hydronic
- Down-Flow and Up-Flow applications
- 2.0 - 5.0 Ton Capacity
- Available with electric heat up to 20 kW
- High efficiency Long Life Aluminum or Copper DX coils
- Attractive, powder coated painted exterior
- Filed installation heat kits available

Martin Mobile Home Products

Martin Mobile Home Un-Cased Coils

Features:

- Designed specifically for mobile home use a/c or heat pump
- Down-Flow application
- Coil elevated from condensate
- Pitched polymer drain pan
- Left hand refrigerant and drain connections
- Flexible tube drain connection
- Field installed TXV
- Long Life Aluminum or Copper tubing
- Aluminum fins and end plates
- Pressure tested to 500 PSI
- R-410a Compatible

- Quick-Connect fittings are optional
(AERO-QUIP #6 & #11)
** Add "QC" to Model Number
- 3/8" Liquid Line Connection
- 3/4" or 7/8" Suction Line Connection

Martin Mobile Home Products

Broadair Mobile Home/Commercial Piggyback Package

**A new product manufactured by
AllStyle A/C Manufacturing.**

**BCP*
Patent Product**

Features:

- Light commercial applications
- Side discharge application
- Compact high efficiency design
- Corrosion resistant, powder painted galvanized steel casing, Fully Louvered
- Long Life Aluminum tubing
- High efficiency compressor
- 208/230 VAC operation
- Multi-speed direct drive blower
- Two internal filter racks
- A/C or Heat Pump Available

Up-Flow Commercial Coil

Features:

- Choose between 8 to 20 Ton Nominal Capacity
- Copper tubing
- Heavy, aluminum fins and end plates
- Single or Dual refrigerant circuits
- Galvanized, corrosion resistant steel drain pan
- Coils are pressure tested to 500 PSI before assembly
- Attractive, corrosion resistant painted steel casing
- May be combined with additional units
- Match units with two gas furnaces for up to 140,000 BTU or an electric airhandler with heat strips 20kW - 30kW
- Commercial electric air handler package available with optional heat strips 20kW - 30kW

Condenser

Aluminum Coil Series

R-410A

Features:

- Compact high efficiency design A/C or Heat Pump
- Single and Multi-Family residential applications
- One foot print 1.5 to 5.0 Tons
- Sound absorbing injection molded top cap
- Corrosion resistant, powder painted, galvanized steel casing. Fully louvered
- High efficiency compressor
- Liquid Line Drier (Not Installed)
- Liquid Line Connection
 - 3/8" on 1.5 to 5.0 Tons
- Suction Line Connection
 - 3/4" on 1.5 to 3.0 Tons
 - 7/8" on 3.5 to 5.0 Tons
- Easy access brass service valves
- Easy serviceability, a single screw opens the electrical access panel
- Grille/Motor mount for quiet fan operation
