AllStyle Coil Company, L.P.

www.allstyle.com Houston, TX 77041 713.466.6333

AllStyle, so much more than just another coil company

IIStyle Coil Company, L.P., commenced operations in May of 1990. From the year of 1990, factory operations grew from 40,000sq.ft. to over 750,000sq.ft., making **AllStyle** Coil Company the largest independent coil manufacturer in the United States.

AllStyle is owned and operated in its entirety by The Martin Family. Mr. Lendell Martin had over 60 years of experience in the air conditioning and refrigeration industry and held numerous design patents. The Martin Family continues his legacy working to develop new products.

Being the founder of the **Red-T Coil Company** and having operated an HVAC contracting company, Mr. Martin had a firm understanding of both the customer and contractor. Over the years, **AllStyle** has become the leader in HVAC innovation and the premier independent coil manufacturer in the AHRI Certification Program. With each innovative product, **AllStyle's** production continues to increase in building products of quality and durability at a competitive price.

Product inventory has increased for both multi-family and residential applications. There is a broad range of air handlers from hydronic to heat pump products, gas furnaces, condensers, and packaged units.

Manufacturing Process

The manufacturing of quality products requires a clear understanding of the market, and its needs. **AllStyle** defines a quality coil as one that meets or exceeds the manufacturers matched system design specifications. Our products begin with material that meets stringent quality control objectives. **AllStyle** suppliers are selected by their ability to supply quality material as specified, and before shipment all materials must be inspected by the vendor to ensure they meet the necessary specifications.

Quality Coils

AllStyle coils are built to last, and are pressure tested to provide reliability. We use durable copper or long life aluminum tubing, with corrosion resistant aluminum end plates, which are flared instead of punched. Drain pans are made from heavy duty polymer, and are resistant to corrosion and mold growth. A choice of cabinet material is available and dual drain ports are optional. **AllStyle** units are rated for both R-22 and R-410a refrigerants. A variety of coils are available to match nearly all condensers and heat pumps. At **AllStyle** Coil Company, L.P. we take a personal interest in every product we design, test, and manufacture. We ensure that your home or office is comfortable, while saving you money in operating costs.

Relative training is provided for products are tested internally to ensure they meet established specifications before being shipped to the customer. The management of AllStyle is involved in the daily supervision of product fabrication, assembly, and testing.

All products are date coded, and are able to be tracked to the wholesale distributors. In the event a product failure is identified, the units are immediately returned to the factory for re-analysis. Any testing failures are traced directly back to their original source, and production adjustments are made, at which time a safe guard is put in place to prevent future problems. **AllStyle** recognizes how crucial the contribution of each individual employee is when it comes to successfully implementing and realizing its commitment to provide a quality product. Production personnel are trained to properly fabricate and assemble the components from start to finish. Each product goes through a stringent inspection process to ensure the highest quality component is being provided to each customer.

Proudly Made in Texas

Long Term Goals

AllStyle will continue to provide innovative products to fit the needs of the current and future market. Factory expansion to support increased growth is underway with future innovations being considered.

AllStyle is a privately held corporation and invests in the future to improve the manufacturing, testing, design, and the development process. This ensures superior products reach the market in a timely fashion. Looking into the future, Mr. Martin has passed along his ideas and work ethic to the next generation of his family, ensuring the company's success for many years to come. **AllStyle** has many brand names that went through the changes of innovation; Meridain, Texas Furnace, LLC., and now Broadair. These brand names incorporates the new styles in HVAC.

AllStyle Coil Company, L.P. looks forward to many continued years of growth and success because of the solid foundation upon which the company has been built on.

Evaporator Coils

AllStyle has a variety of evaporator coils to rival any manufacturer. Each rated coil is carefully engineered and crafted to complement all OEM matched/rated condensing units.

Features:

- Un-cased coils are un-rated replacement coils
- Manufactured to fit replacement size restrictions
- Un-cased coils manufactured in "A" or "M" Coil application
- Long Life Aluminum or Copper tubing
- Pressure tested to 500 PSI
- Dual rated for R-410a or R-22
- Pitched polymer drain pan
- Expansion valves are optional

A-Coil

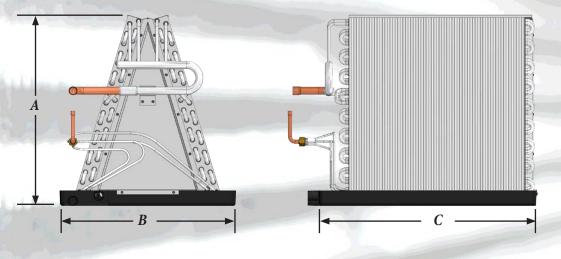

Counter-flow (Down-Flow) Models

Air seals must be placed on the inside of the evaporator's drain pan to prevent water blow off in several counter-flow model installations.

Our Splash Guard kit is available from the local distributor. The kit contains four inserts, enough to complete two counter-flow installations.

All supply ducts must be ducted below the drain pan. The drain connection should be kept 4" to 6" above the floor line to allow for rotation of a pipe fitting and for pitch of a drain line to a floor drain. It is not recommended that any coils be used in a counter-flow model if the system is located directly over objects which could be damaged by condensate, such as in an installation on a second floor over a finished ceiling. If such a location is unavoidable, it is suggested that a water tight, galvanized auxiliary pan at least 2" deep and at least 2" larger in all directions than the supply plenum, be installed beneath the supply plenum. A separate drain line from auxiliary pan to an open drain should be provided. This open drain should be visible so that any water coming from the auxiliary drain can be seen as an indicator that the primary drain is plugged.

5 - Year Limited Warranty

Evaporator Coils Up-Flow Cased Coil

Cased Up-Flow (Patent Product)

Features:

- Manfactured for Rated/Matched Systems
- Cased coils manufactured in "A" or "M" Coil
- Un-painted embossed, galvanized steel case
- Insulated cabinet with reduced fiberglass exposure
- Easy opening front access panel
- Pitched polymer drain pan
- Long Life Aluminum or Copper tubing
- Pressure tested to 500 PSI
- Dual rated for R-410a or R-22
- Metering device accessible from cabinet exterior

Optional Features:

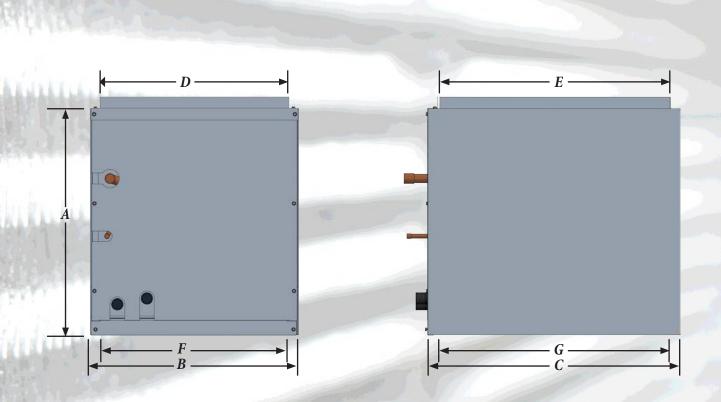

- Un-rated replacement coils available
- Painted case in executive grey
- Left/Right hand or dual port drain Connections
- A choice of refrigerant thermal expansion Valves
- Heat Pump compatible
- Different cabinet sizes available

Evaporator cased coils have a variety of cabinet width sizes to fit Rated/ Matched OEM furnace manufacturers for up-flow or draw-through applicatons.

Superior quality and efficiency

Evaporator Coils

Horizontal Plenum Coil

Features:

- Manufactured as Rated/Matched Plenums
- Cleanable, mold-resistant interior surface
- Fiberglass removed from the air stream
- Pitched, polymer drain pan elevates coil from the condensate
- Top left and right refrigerant drain connections
- Superior air flow compared to other horizontal coils

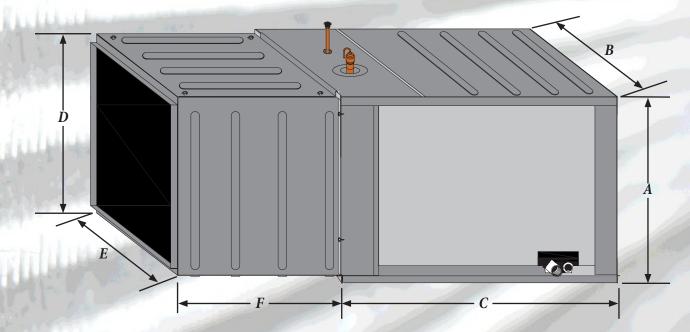

Plenum Coil with cut-outs Patent Product

Plenum duct holes are cut by contractors per building specifications

- Easily removable top panel with locking air seal for UV light
- Factory installed thermal expansion valve
- Rated for R-22 and R-410a
- Long Life Aluminum or Copper Tubing option
- Enhanced aluminum fins and end plates
- Pressure tested to 500 PSI
- Plenum coil combines an adjustable inlet adapter, cooling coil, and supply plenum into one easy install
- Fits furnace 17" to 23" wide (Adjustments plates included)

Plenum coils feature convenient modular construction to facilitate installation & maintenance May be also combined with an AllStyle blower housing with optional electric heat or installed with a gas furnace

Evaporator Coils

New StyleQuest Multi-Position Coils

Features:

- Manufactured for Rated/Matched Systems
- Multi-Position: Vertical, Horizontal Right or Horizontal Left (Order the desired configuration)
- Fully insulated embossed, galvanized cabinet
- Polymer drain pans (Horizontal Left, Right, and Vertical)
- Dual drain connections on each drain pan
- Long Life Aluminum or Copper tubing option
- Orifice refrigerant metering, Standard
- Slash Guards

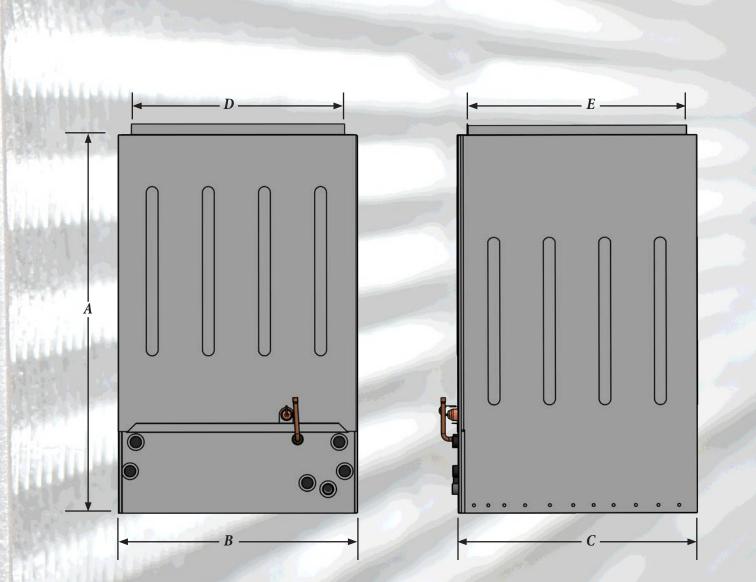

Optional Features:

- Painted Case in Executive Grey
- A Choice of Refrigerant Thermal Expansion Valves
- Heat Pump Compatible
 - Different Cabinet Sizes Available

New StyleQuest Multi-Position Coil The AllStyle Patent Product is the Only Evaporator Coil that is Multi-Position Left, Right, or Vertical

Single or Multi-Family Air Handlers Ceiling Mounted Air Handler

Mounted "AB" Air Handlers Patent Product

Features:

- Designed for installation in a furred down or dropped ceiling area with a End Discharge or Triple Discharge Option
- Cooling Only, Cooling and Electric Heating, Heat Pump, or Hydronic Applications
- Optional factory installed electric heat of either 3, 5, 6, 8, or 10kW
- Orifice refrigerant metering is standard with thermal expansion valves optional

Patent Ceiling Mounted Air Handler with End Discharge Patent Ceiling Mounted Air Handler with Left Discharge

- Polymer drain pan
- Standard built-in internal filter rack only in louvered panel
- Pre-punched side mounting tabs for easier installations
- Long Life Aluminum or Copper tubing
- Aluminum fins and end plates
- Powder coated, hinged access panels must be ordered separately
- Fully insulated embossed galvanized steel cabinets

• When ordering Hydronic ceiling mounted air handlers, <u>ONLY</u> end discharge is available.

000

Single or Multi-Family Air Handlers Ceiling Mounted Double Blower Air Handler

Features:

- Designed for concealed installation in furred down ceilings
- Applications in Cooling and Heat Pump
- Requires a sealed return air space
- Optional Long Life Aluminum or Copper tubing
- Unique polymer blower scroll separates for easy blower wheel and motor removal
- Corrosion resistant polymer drain pan with optional side or blower side drain connections
- DX Coil, electric heat, motor, blower wheel, and polymer drain pan are all serviceable from the bottom
- Rugged, durable, and easy to service

Optional Features:

- White, powder coated solid or louvered hinged access panels with mounting screws
- Insulated housing, factor or field installed, allows for ducted return air plenum
- Thermal expansion valve in R-22 or R-410a, factory or field installed
- Optional factory installed electric heat of either 3, 5, 6, 8, or 10kW

Single or Multi-Family Air Handlers Wall/Stud Mounted Air Handlers

Features:

- Vertical Up-Flow application
- Front return air
- Fully insulated cabinet
- Tabs for stud or wall mounting are stamped to cabinet
- Long Life Aluminum or Copper DX Coils
- Aluminum fins and end plates
 - 1.0 3.0 Tons Cooling, Heat Pump, and Hydronic Applications
- Polymer drain pan

Optional Features:

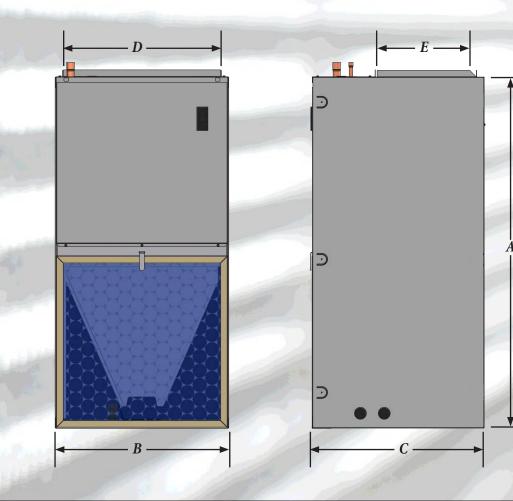

- Factory or field installed thermal expansion valve
- Front return grilles
- Factory installed electric heat, disconnect, and float switch
- Freeze-Stat or Enter Water T-Stat

VL* Stud Mounted Air Handlers are shipped with hanging brackets with front return and may be installed between studs or above a water heater, or closet

LEFT HAND HORIZONTAL

SUPPLY

Features:

- Multi-Position Vertical, Horizontal Right, or Horizontal Left
- Manufactured for Rated/Matched Systems
- 3x Polymer drain pan
- Attractive, powder painted exterior
- Fully insulated cabinet
- Multi-Speed direct drive blower
- SLN* air flow from 600 to 1600 CFM
- BLN* air flow from 1600 to 2000 CFM
- BLD* air flow from 1600 to 2000 CFM

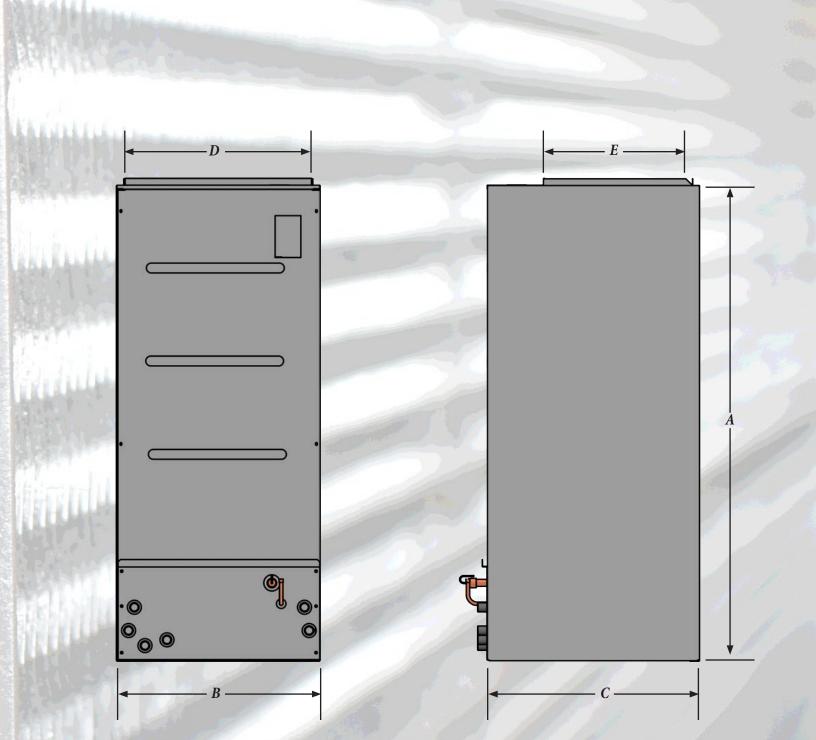

Optional Features:

- Cooling, Heat Pump, or Hydronic Applications
 Factory installed TXV
- Optional factory or field installed electric heat
 3, 5, 6, 8, 10, 15, or 20 kW
- Electric breakers is standard with 15kW/20kW

SUPPLY

Slide in Long Life Aluminum or Copper DX coils available

The AllStyle Multi-Position Air Handler is a Patent Product that has 3x Durable Polymer drain pans for Left, Right, and Vertical The multi-position air handler provides you with various options for installation when encountering size restrictions Deeper Coil - More Efficiency

Single or Multi-Family Air Handlers Multi-Position Modular Air Handlers

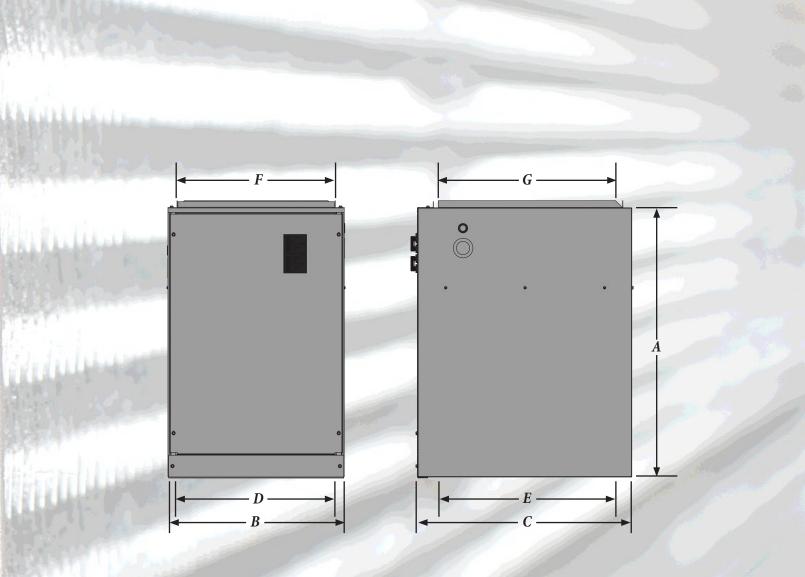

- Multi-Position Modular Air Handler
- Cabinet size matches with AHRI Rated Coils (Rated coils required for extended warranty)

- Powder painted exterior
- Compact design
- 208/230 VAC operation
- 24V control transformer
- Fully insulated cabinet interior
- Modular air handlers may be combined with other units

Optional Features:

- PSC or ECM motor available
- Factory or Field installed electric Heat 3, 5, 6, 8, 10, 15, or 20kW
- Twin Circuit protection provided on 15 & 20kW models
- Optional painted cabinet or galvanized steel

Martin Mobile Home Products Martin Mobile Home Un-Cased Coils

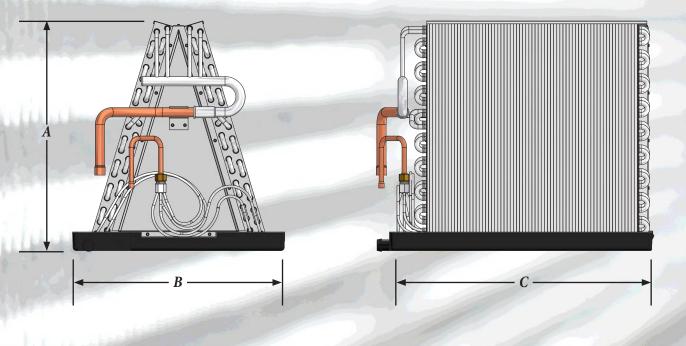

Features:

- Manufactured as un-rated replacement coils
- Designed specifically for mobile home use a/c or heat pump
- Down-Flow application
- Coil elevated from condensate
- Pitched polymer drain pan
- Left hand refrigerant and drain connections
- Flexible tube drain connection
- Field installed TXV
- Long Life Aluminum or Copper tubing
- Pressure tested to 500 PSI
- Dual rated for **R-410a** and **R-22**

- Quick-Connect fittings are optional
- (AERO-QUIP #6 & #11)
 - ** Add "QC" to Model Number
- 3/8" Liquid Line Connection
- 3/4" or 7/8" Suction Line Connection

Broadair Mobile Home/Commercial Piggyback Package

A new product manufactured by AllStyle A/C Manufacturing. BCP* Patent Product

Features:

- Light commercial installation
- Side dischage application
- Compact high efficiency design
- Corrosion resistant, powder painted galvanized steel casing, Fully Louvered
- Long Life Aluminum tubing
- High efficiency compressor
- 208/230 VAC operation
- Multi-speed direct drive blower
- Two internal filter racks
- A/C or Heat Pump Available

Condenser Aluminum Coil Series

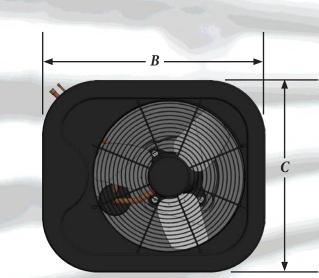

Patent Product

Features:

- Compact high efficiency design A/C or Heat Pump
- Single and Multi-Family residential applications
- Sound absorbing injection molded top cap
- Corrosion resistant, powder painted, galvanized steel casing. Fully louvered
- High efficency compressor
- Liquid Line Drier (Not Installed)
- Liquid Line Connection 3/8" on 1.5 to 5.0 Tons
- Suction Line Connection 3/4" on 1.5 to 3.0 Tons 7/8" on 3.5 to 5.0 Tons
- Easy access brass service valves
- Easy serviceability, a single screw opens the electrical access panel
- Grille/Motor mount for quiet fan operation
- 3.50" Polymer Condenser Pad for easy installation

Commercial Condenser

AllStyle Broadair Twin Condensing Units

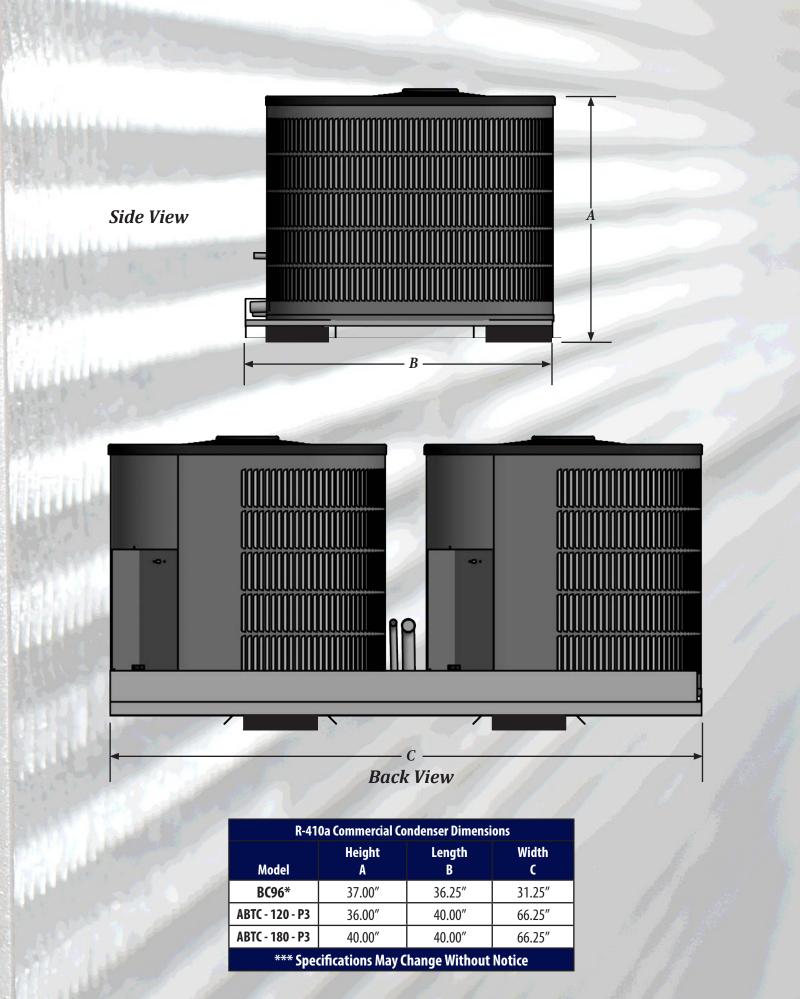

Features:

Patent Product

- 3PH Voltage
- Low/High Pressure 3PH Surge Protector
- Commercial applications
- Compact high efficiency
- Sound absorbing injection molded top cap
- Corrosion resistant, powder painted, galvanized steel casing. Fully louvered
- High efficency compressor
- Liquid Line Drier (Not Installed)
- Easy access brass service valves
- Easy serviceability, a single screw opens the electrical access panel
- Grille/Motor mount for quiet fan operation

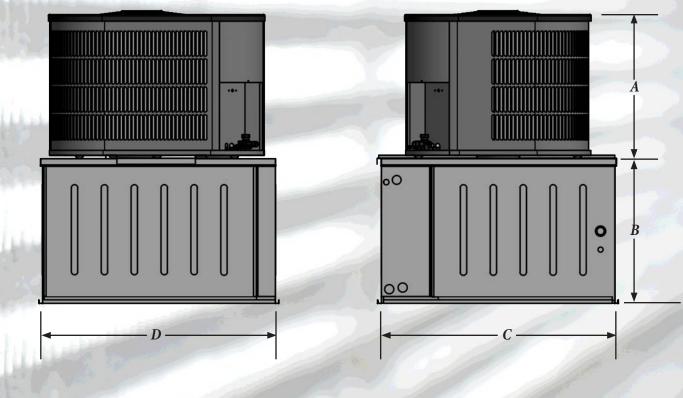

Commercial Condenser Broadair Commercial Roof Top

A new product manufactured by AllStyle A/C Manufacturing. BCRT* Patent Product

Features:

- Rooftop Voltage Single and/or 3PH Voltage
- Low/High Pressure 3PH Surge Protector
- Down-Flow Commercial application with A/C or Heat Pump available
- Corrosion resistant, powder painted, galvanized steel casing. Fully louvered
- High efficency compressor
- Liquid Line Drier (Not Installed)
- Easy access brass service valves
- Easy serviceability, a single screw opens the electrical access panel
- Lifting brackets for easier install
- Curb sold separately
- P-Trap (Not Installed)
