

B2007 & B2008 Chassis

Product Features:

- **Permanent Split Capacitor motor (PSC)**—lower amp draw, cooler operation, fewer failures, ball bearings for longer life and increased static pressure
- **Beckett igniter**—higher output voltage for more reliable ignition, lower input amps reduces energy costs and electrodes last longer without adjustment
- **Beckett CleanCut pump**—smoother, cleaner shutdowns and light-offs
- **Beckett R7184 B and P controls**—interrupted ignition, pre-purge “valve-on” delay (B2007 & B2008) and post-purge “motor-off” delay (B2008), limited recycle and reset, communications port and diagnostic LED, alarm contacts (B2008)
