

D-FROST

Aircraft Quality Ice Melt For Home Heating Fuel Oil and Diesel Engines

If your fuel system is contaminated with water during cold weather applying D-Frost will prevent ice from forming. If your tank is already iced up, D-Frost will melt existing ice and then keep working to prevent the free water from re-freezing.

- Premium Aircraft Quality De-Icer
- Compatible with Biofuel blends to B20 and Ultra Low Sulfur (15ppm) fuels
- Reduces ice plugging and frozen filters
- Eliminates the need for on site heating equipment
- Will not harm fuel tanks, equipment or fuel lines
- Melts tank ice blockages in 10 to 30 minutes, depending on the thickness of the ice
- Emulsifies water, therefore removing it from the tank through the combustion process
- Prolongs fuel line, filters and equipment life
- Reduces equipment downtime and maintenance costs
- EPA Registered
- Safe for Diesel Engines
- Comes in convenient 16 oz. bottle
- 16 oz. treats up to 275 gallons (1 oz. treats 17.1875 gal.)
