

Filter Depth (FPM)	Medium Velocity (FPM)	Initial Resistance Medium Velocity (in w.c.)	High Velocity (FPM)	Initial Resistance High Velocity (in w.c.)
1"	375	0.18	500	0.38
2"	375	0.13	500	0.19
3"	500	0.12	625	0.18

The Series MERV 8 Pleated Filters are designed for applications requiring higher levels of air filtration such as in the protection of HVAC components from dust/dirt or in the prevention of airborne irritants in sensitive settings. An expanded metal grid on the air exiting side and a die-cut frame provides exceptional strength during both installation and operation. The 100% synthetic media inhibits biological growth and allows for low resistance operation making the DF8 a practical, cost-effective filtration option. The frame is constructed of 100% recyclable moisture resistant paperboard.

FEATURES

- Low resistance improves air flow and can greatly reduce energy costs
- 100% recyclable moisture resistant paperboard frame
- 100% synthetic media inhibits biological growth
- MERV 8
- Initial resistance of 0.19" w.g. @ 500 fpm

APPLICATIONS

Designed for use in commercial buildings, hotels, industrial filtration, airports, schools and universities.

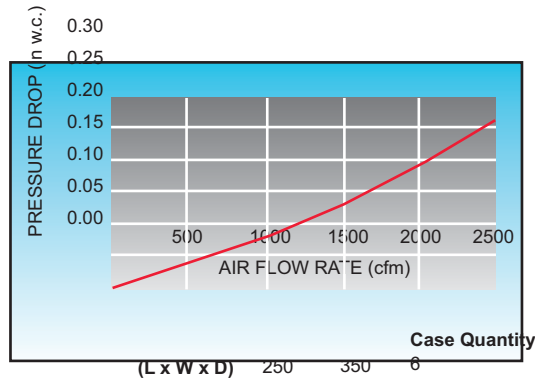

SPECIFICATIONS

Service: Air.

Filtration Efficiency: MERV 8.

Max. Temperature: 200°F (93.3°C) continuous operating temperature.

Recommended Final Resistance: 1.0" w.g.
