

REMANUFACTURED Beckett CleanCut Oil Pump

For Faster, Cleaner, More Reliable Cut-Offs and Cut-Ons

FEATURES

- **The CleanCut Solenoid Advantage**
This new Remanufactured pump combines the “clean burning” benefits of a solenoid valve with the hefty lift capabilities of traditional American pumps. Remanufactured units are sold less the solenoid coil. This coil is field replaceable. See ordering information below.
- **Cleaner Operation**
The solenoid valve cuts oil flow almost instantly when power is cut to the motor, eliminating coasting stops that can cause soot formation on shut-down. Pre-purge type controls work hand-in-hand with this pump to establish airflow and bring pump pressure up to full operating levels before light-off ensuring smoother and cleaner light-offs.
- **Greater Reliability**
There are fewer moving parts, compared to conventional pumps and fewer troublesome oil fittings to cause problems. All of the moving parts in the Remanufactured CleanCut pump have been in use for years either in the US or in Europe.
- **Increased Capacity**
The unique design of the Remanufactured CleanCut pump delivers up to 4 gal. per hour at 100 PSI.
- **Protection from Leaks**
The Remanufactured CleanCut pump utilizes the same piston valve used in traditional pumps, to provide the same level of protection from leak-through in gravity feed situations.
- **2 Year Warranty**
This is your assurance and reliable performance on the job and is the same as the OEM warranty.

REPLACEMENT PARTS

21755U 115V replacement solenoid coil
21877U Replacement valve stem

ITEM# P4-198R
BECKETT# 2184404U
SUNTEC# A2EA-6520-8

HYDRAULIC DATA

Capacity	4 GPH @ 100 to 150 PSI 3 GPH @ 150 to 200 PSI
Nozzle Pressure	100 - 200 PSI
Factory Set Pressure	100 PSI
Operating Fluids	- #2 and lighter fuel oils - Viscosity 1.4 - 12 cSt - 32 -77°F (0 - 25°C) in the pump
Inlet Pressure	10 PSI max.
Return Pressure	10 PSI max.
Suction Height	1 pipe: 8 ft. max. 2 pipe: 14 ft. max.
Rate Speed	3600 RPM max.
Breakaway Torque	36 in.-oz. max.
