

NYLOG WHITE

NYLOG WHITE is a non-hardening and non-drying sealant used to prevent high pressure leaks on threaded connections, gaskets, PEX, and o-rings. Using the newest and most advanced pipe dope sealant technology based on a custom blend of Silicones and Teflon, this product is designed for use on compressed air, water, gas, and glycol systems. Simply apply the product using the brush top applicator built into the cap for a permanent and tight seal.

- Sealant for Air, Gas, Water, and Glycol
- -50°F to 500°F
- NSF Registered for use in food areas
- Non-Corrosive and Non-Toxic

NYLOG WHITE is NSF registered for incidental food contact making it ideal for potable drinking water systems, ice machines, and food packaging equipment.
