

Technical Data Sheet

Viper Maximum Strength Evaporator Cleaner – Venom Pack

Part# RT320V, 36oz (1065ml)

Overview: Viper Max' Evaporator Cleaner is a super-concentrated version of our Viper Evap+. It is the industry's only Non-Rinsing Evaporator Coil Cleaner utilizing Enzymes in a synthetic detergent base. Enzymes are the most effective cleaning agents for cold water environments. Imbedded soils that resist conventional detergents are successfully removed with our evaporator coil cleaners. Viper Max' delivers complete deodorization and deep cleaning performance when allowed to remain on the coil and self-rinse overtime with condensate production. Safe for all metals, plastics and rubber. OEM approved for use on aluminum micro-channel coils.

Application: Dilute this product according to the instructions on the label. Minimum dilution is 12oz or 1-1/2 cups (325ml) per gallon (4L). Maximum dilution is 4oz. or ½ cup (118ml) per gallon (4L). Apply using conventional manual or pump style spray equipment. The unit/system can then be placed back into operation. The solution remains active for about 72 hours and is gradually rinsed by condensate production.

Chemical Description: Proprietary aqueous enzyme composition in a detergent base containing degreasing and soil release agents. Biodegradable and EPA compliant. This product does not contain any VOC's, HAP, TAC or CA Prop 65 ingredients. Please refer to SDS for more information.

Properties: Viper Max' Evaporator Cleaner is a non-toxic, non-flammable and non-odorous product. Suitable for use on indoor evaporator coils or use as a multipurpose cleaning and degreasing compound.

Certifications: NSF P1 registration number 126062 for use in food establishments. Kosher certified by OK Kosher.

Storage and Handling: Use standard precautionary measures when handling any chemical such as wearing gloves and eye protection. Never mix or combine this product with any other product or ingredient. Keep container closed and store away from heat or direct sunlight. Use in well ventilated areas. Rinse any affected areas with water. Soak up spills with adsorbent material and dispose according to Federal or State laws. KEEP OUT OF REACH OF CHILDREN.
