FLOATING SUCTION LINE FOR OIL TANKS

The Oventrop Floating Suction Kit is a device used for the supply of #1 and #2 heating oil and diesel fuel from any oil supply tank having a height of no more than 68". It floats 1 1/2" below the surface of the top of the oil inside the tank, thus drawing clean oil into the heating system. It helps to prevent service problems due to dirty tank bottoms (sludge), cold (viscous) fuel and water in the fuel tank.

OIL BURNER SAFETY LABELS

These safety labels are used by service technicians to alert homeowners of the proper procedures to follow in case of burner failure. They are printed on fluorescent orange label stock which has high visibility. The peel-and-stick label stock is easily affixed to equipment.

IF OIL BURNER FAILS TO OPERATE

1. Be sure the oil burner switch is on.
2. Thermostat should be set above the room temperature.
3. Be certain there is oil in the tank.
4. Check fuse or circuit breaker.
5. Press red reset button on relay - ONCE ONLY. If burner still fails to operate, call for service.

OIL BURNER COUPLINGS

SSC's flexible Oil Burner Couplings offer tough neoprene sleeves (1" wide) with high density plastic end pieces. This combination gives you a strong, lightweight connector which is unaffected by most humidity, oil, temperature and chemical extremes. In addition, the molded end pieces require no set screws and the sleeve is easily cut for a proper installation every time.

BOILER HANDHOLE / MANHOLE GASKETS

BOILER HANDHOLE & MANHOLE GASKETS - DIE CUT

All SSC Boiler Gaskets are made of 1/4" thick EPDM Rubber. Whether using SSC's Boiler Gaskets or someone else's, always make sure the material is 1/4" EPDM rubber. EPDM has excellent resistance to steam and high temperature, while other types of rubber may not.

Inside measurements are used.

BOLT PACKS

SSC's Bolt Packs include any of the above listed Pipe Flange Gaskets individually packed with the appropriate ASTM-A307 Grade 2 hex head bolts with finished hex nuts. These kits offer the convenience of having all flange parts in one package. To order a kit just add the letters "BP" to the end of the gasket number listed above. For example to order a 4" full faced flange gasket (1/8" Red Rubber) bolt pack, use part #PF-400RF9BP. See our price list or website for details.

SEAL SETTING TOOL

This makes setting seals a snap. Works on pumps up to 3 HP.

ST-379
SEAL SETTING TOOL

Please see our Bell & Gossett and Taco sections on pages 28-41 for seals and replacement parts for those manufacturers. Also, please see our separate 117 page Pool & Spa Parts Catalog for our complete listings of seals, gaskets, O-rings and motor parts for the Pool & Spa Industry.

GASKET SHEETS

GASKET SHEETS

Available in various thicknesses, SSC's gasket sheets are perfect for emergency repairs and for replacing hard to find gaskets and washers. All materials can be cut into any shape or size. Available in the following materials and sizes:

CORK-RUBBER

The highest quality material of its kind, it can be used to seal applications involving oil or water. It will not shrink, stretch or lose bolt tension. **Temperature Rating: -20° F to 250° F**

SSC#	SIZE
GS-1A	6" x 6" x 1/32" TH
GS-1B	6" x 6" x 1/16" TH
GS-1C	12" x 12" x 1/32" TH
GS-1D	12" x 12" x 1/16" TH
GS-1E	24" x 24" x 1/32" TH
GS-1F	24" x 24" x 1/16" TH
GS-1G	20" x 40" x 1/32" TH
GS-1H	20" x 40" x 1/16" TH

BUNA-N RUBBER

This black rubber is ideal for sealing oil applications. It has a high nitrile content which means it is oil resistant. **Temperature Rating: -40° F to 180° F**

SSC#	SIZE
GS-2A	6" x 6" x 1/32" TH
GS-2B	6" x 6" x 1/16" TH
GS-2C	6" x 6" x 3/32" TH
GS-2D	6" x 6" x 1/8" TH
GS-2E	12" x 12" x 1/32" TH

GS-2P	20" x 36" x 3/32" TH
GS-2Q	20" x 36" x 1/8" TH

RED RUBBER (RAINBOW PACKING)

The most popular rubber for sealing water applications, it can be used on everything from pipe flanges to pump housings. Not to be put in contact with any petroleum product. **Temperature Rating: -20° F to 170° F**

SSC#	SIZE
GS-3A	6" x 6" x 1/16" TH
GS-3B	6" x 6" x 1/8" TH
GS-3C	12" x 12" x 1/16" TH
GS-3D	12" x 12" x 1/8" TH
GS-3E	12" x 24" x 1/8" TH
GS-3F	18" x 36" x 1/8" TH
GS-3G	24" x 24" x 1/16" TH
GS-3H	24" x 24" x 1/8" TH
GS-3I	20" x 36" x 1/16" TH

TAN FIBER (FOR OIL)

This has been used successfully in the oil industry for over 20 years. It will seal oil or water.

Temperature Rating: -20° F to 250° F

SSC#	SIZE
GS-4M	6" x 6" x 1/64" TH
GS-4A	6" x 6" x 1/32" TH

GS-4G	20" x 40" x 1/32" TH
GS-4H	20" x 40" x 1/16" TH

HIGH DENSITY CORK-RUBBER

This high grade material can be used in oil or water applications. It forms to imperfections on the flange and is very durable. **Temperature Rating: -20° F to 250° F**

SSC#	SIZE
GS-5A	6" x 6" x 1/32" TH
GS-5B	12" x 12" x 1/32" TH
GS-5C	24" x 24" x 1/32" TH
GS-5D	20" x 36" x 1/32" TH

GASKET CUTTING SHEARS

These high leverage shears give you extra powerful cutting power to make gasket cutting easy, especially when working with thick material.

GS-100SH
HEAVY-DUTY SHEARS
FOR CUTTING GASKET
MATERIAL
Made of hot drop forged
nickel-plated steel.

TAN FIBER (FOR WATER)

This fiber material is designed to be used in applications involving the sealing of water. Especially good for pump housings and flanges. Not to be used in oil applications.
Temperature Rating: -20° F to 250° F

<u>SSC#</u>	<u>SIZE</u>
GS-6A	6" x 6" x 1/32" TH
GS-6B	6" x 6" x 1/16" TH

GS-6G	20" x 40" x 1/32" TH
GS-6H	20" x 40" x 1/16" TH

BLACK FIBER

This material for higher temperatures can be used in oil or water. It is frequently used for applications like steam and hot water. **Temperature Rating: -20° F to 350° F**

<u>SSC#</u>	<u>SIZE</u>
GS-7A	6" x 6" x 1/32" TH
GS-7B	6" x 6" x 1/16" TH

BLACK FIBER WITH ANTI-STICK COATING

Same as black fiber except with the added feature of anti-stick coating. This allows easy removal from flanges.
Temperature Rating: -20° F to 350° F

<u>SSC#</u>	<u>SIZE</u>
GS-8A	6" x 6" x 1/32" TH

NON-ASBESTOS

This is the most popular material used for pipe flange gaskets and gaskets used in higher pressure applications. Excellent with water but not with oil/petroleum product.
Temperature Rating: -200° F to 572° F

<u>SSC#</u>	<u>SIZE</u>
GS-9A	6" x 6" x 1/16" TH

NEOPRENE

This black rubber is the most popular rubber in the world. Automobile tires are made of neoprene. Very effective in sealing water, it will not dry out or harden as fast as Red Rubber. Do not use this rubber in oil/petroleum product as it will swell up and then break down.

Temperature Rating: -20° F to 170° F

EPDM

The "Cadillac" of rubber, this black rubber will withstand higher heat and tends not to dry out or harden in extreme environments. This is the material of choice for higher heat steam applications such as boiler handhole and manhole gaskets. **Temperature Rating: -40° F to 225° F**

<u>SSC#</u>	<u>SIZE</u>
GS-11A	6" x 6" x 1/8" TH

PRESSURE, VACUUM & COMPOUND GAUGES

SSC's gauges are constructed with a steel case painted black, all brass internals and a glass lens. Competitively priced, the styles to choose from are pressure, vacuum or compound.

PLASTIC CASE GAUGES

Our plastic case gauges are corrosion and weather resistant. They can be used in extreme environmental situations such as outdoor use or very wet areas where a standard gauge might rust. These economical gauges are constructed with a plastic case, a plastic lens and all brass internals.

GAUGES

LIQUID (GLYCERIN) FILLED GAUGES

SSC's glycerin filled gauges are good for applications where there is a lot of movement. The liquid inside the gauge acts as a vibration and pulsation damper giving the technician a more accurate read. They are constructed with a stainless steel case, a plastic lens and all brass internals.

WITH LAZY HAND

The regular pressure hand pushes the lazy hand to the peak operating or surge pressure point where it remains until you manually reset it. The lazy hand comes in handy when you have to determine if equipment is malfunctioning due to intermittent surging pressure.

DIA. GAGE/TRIDICATORS/THERMOMETERS

LOW PRESSURE DIAPHRAGM GAUGES (MANOMETERS)

These gauges feature a highly sensitive capsule type diaphragm to measure extremely low positive or negative pressure applications such as gas feed systems. These are a required test gauge for building code inspection in many municipalities.

TRIDICATORS (PRESSURE / TEMPERATURE GAUGES)

SSC's Tridicators are designed to withstand the extreme conditions found in all hot water heating boilers. These combination temperature and pressure gauges give you an accurate temperature and pressure read simultaneously.

WINTERIZING EXPANSION PLUGS

Our Winterizing Plugs are made of a high quality rubber for maximum expandability which ensures a tight seal. These plugs are perfect for pressure testing the system for leaks as well as normal winterizing applications. They are made of a stainless steel slotted screw, washers, a rubber plug and a nylon wing nut for easy tightening.

**TIP-TOE DRAIN ASSEMBLIES
AND CARTRIDGES**

Screw in the tip-toe drain to replace the trip lever assembly. This ends the difficult process of tearing down walls and reaching into tight places to fix or replace the old trip lever assembly. Use the blank face plate with two holes, shown on previous page, to fill the hole left by the old trip lever face plate.
