# **Nest Learning Thermostat**

Programs itself. Then pays for itself.

## Meet the Nest Learning Thermostat.

It learns what temperatures you like, turns itself down when you're away and connects to your phone. It has a big, sharp display. And it's proven to help save energy. In independent studies, the Nest Thermostat saved an average of 10% to 12% on heating bills and 15% on cooling bills. We've estimated average savings of \$131 to \$145 a year.

# How does it work?

#### Auto-Schedule

No more confusing programming. It learns the temperatures you like and programs itself.

# Remote control

Connect the Nest Thermostat to Wi-Fi to change the temperature from your phone, tablet or laptop.

# Nest Leaf

You'll see the Leaf when you choose a temperature that saves energy. It guides you in the right direction.

### Early-On

Nest learns how your home warms up and keeps an eye on the weather to get you the temperature you want when you want it.

#### Home/Away Assist

 $\bigcirc$ 

(i)

The Nest Thermostat automatically turns itself down when you're away to avoid heating or cooling an empty home.

### **Energy History**

See when heating and cooling were on and what affected your energy use.

### Safety Temperature Alerts

Get an alert on your phone or tablet if your home gets dangerously hot or cold.

### Farsight

When the Nest Thermostat spots you across the room, it lights up beautifully to show you the time, temperature or weather.
