

Fast and easy cutting. Notcher makes a clean 30° "V" shaped cut in sheet metal. 13/16" (20.6 mm) maximum throat depth. Upper cutting jaw is drop forged high impact alloy steel. Hook design of cutting jaw facilitates notching corners or take-off tabs to desired depth without slipping. Rust resistant nickel plate and black oxide finishes. Tool also features vinyl grips with hand stops for added comfort and resistance to elements.

One-Inch Notcher

The N2 Notcher punches a big 1 inch (25.4 mm) deep "V" notch in common 24 to 30 (0.71-0.41 mm) gauge galvanized sheet metal quickly and easily. A narrower handle opening provides additional user comfort while still allowing a full throat opening. Folding and fabricating metal ductwork is easier than ever with the full 1 inch clearance that the N2 single operation notcher provides.

Snap Lock Punches

Join sheet metal, duct and pipe sections economically. No need for extra hardware. Punches raise a louvered shaped projection on metal edge for locking into rolled edge of sheet or piece to be joined. Metal pieces snap together and are fastened securely. Compound Handle

Leverage for maximum ease of operation. Punch impression spaced 3/8" from edge of metal. Heavy forged cutting jaw. Rust resistant nickel plate and black oxide finishes. Tool also features vinyl grips with hand stops for added comfort and resistance to elements.

Pipe Crimpers

Easy Hand Motion and Greater Control:

A superior compound leverage mechanism offers maximum ease of operation. Comfortable opening, spring-actuated handles, and vinyl cushioned grips, give additional comfort and control.

Longer Lasting Performance

Wear resistant, hardened steel construction features heavy duty linkage between handles and jaws. Hardened steel also produces greater handle strength to resist abuse and collapsing. Nickel plating resists elements.

5-Blade Crimper

Longer, shallower crimps produced with the C5 result in a tighter fitting, more self supporting, leak-proof connection in sheet metal pipe and duct.

Offset Crimper

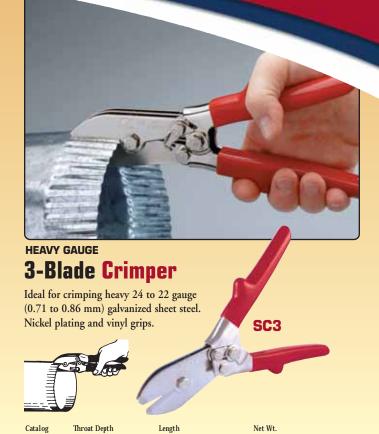

Ideal crimping tool wherever you encounter tight working quarters or working over-head. A unique blade design keeps handles offset and keeps hands off work obstacles such as floor joists and underlayments. The handle design also promotes correct gripping of tool resulting in less wrist fatigue.

Locking Duct Stretcher

Frees Hands and Frees up Time!

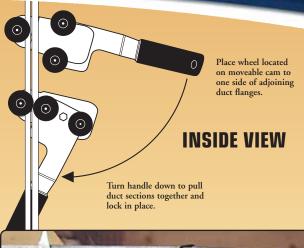

The DS3 locks on from either side of duct connection. No need to adjust

wheels! Simply place wheel located on moveable cam to one side of adjoining duct flanges. Turn handle downward to pull duct sections together and lock in place. Greater wheel clearance makes capturing the ends of duct sections, even misshapen flanges, easier than ever. The versatile shape of the DS3 frame also lets you hook and pull duct from above as the drive cleat is coaxed along the remainder of flanged track. The durable all steel frame extends beyond wheel edges, making it safe to push, hammer and bend drive cleats as necessary to complete installation. An offset handle design eliminates knuckle contact with work.

Pipe & Duct Holders Like an extra pair of hands!

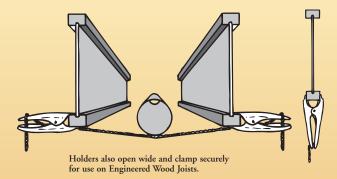

Clamps and chain are nickel plated steel.

Holds duct in place, either between or under joists until properly secured.

Two powerful clamps and four feet of 125 lb. tensile strength linked chain. Set holds duct in place, either between or under joists until it is properly secured. Also ideal for installing fiberglass duct, link chain will not puncture foil skin.

Metal Duct Tools & Accessories

Damper Regulator Hardware

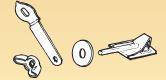

- Fast installing hammer-on design.
- For use on 30-24 gauge (0.41-0.71 mm) galvanized steel.
- Standard 5/16" (8 mm) threads.
- Packaged 12 sets per bag.
- Not for stove pipe: Use only for air handling applications where temperature does not exceed 350°F (176°C).

Bulk Components

28 Gauge Dampers

1/4" (6.4 mm) bearings allow bearing holes to be made in round duct with the use of a scratch awl. Squeeze pipe so that it is oval shaped. Insert damper into pre-punched bearing hole(s). Pipe will spring back to round when released. Secure with wing nut(s) provided. Damper may be adjusted with screwdriver or optional damper handle. Available with or without handles. See below.
