

ULTRALITE® LIGHTWEIGHT CONCRETE EQUIPMENT PADS

A true concrete equipment pad at the weight of plastic (about 2.5 lbs. per square foot). UltraLite® is strengthened by miles of fiber in each square foot of fiber-cement coating. This fiber allows the pad to flex instead of cracking or breaking. The textured surface prevents the condensing unit or portable generator from sliding, and allows water drainage, while the engineered expanded polystyrene (EPS) core prevents warping and provides a solid bottom to resist settling. Unaffected by soil conditions, ultraviolet (UV) light, temperature extremes, and other weather conditions.

2" UltraLite® Pads

The 2" thick UltraLite® pad is the industry standard. Used across a wide variety of applications. Codes have moved toward requiring 3" pads, check local codes for your requirements.
