Notes: 1] Not all drain pan sizes are currently available in heavy duty plastic. Check with your local Aspen representative for current availability. 2] Do not use heavy duty plastic drain pans on oil furnaces or other applications where outlet temperatures may exceed 290°F +/-5°F. Specify metal drain pans for these applications. 3] Metal drain pan. Slab is rotated 90° inside cabinet. Refrigerant and plumbing connections still exit cabinet front. 4] Top duct opening size can be obtained by subtracting 1-1/2 from width or depth. 5] Metal drain pan.
