

THE WORLD LEADER IN CLEAN AIR SOLUTIONS

EZ Flow[®]

DISPOSABLE PANEL FILTERS

- Designed for protection of furnace and central air units in residential and light commercial applications
- Economically and environmentally friendly frame has a one-piece design
- Features a metal media retainer on downstream side
- Available in 1" and 2" models
- Available in all standard sizes and custom sizes
- UL Classified

Heavy-Duty Construction

The frame is made from heavy chipboard in a one-piece design that eliminates corner separation.

The filtering media is continuous filament spun glass. A resinous bonding agent provides rigidity and resistance to media compression. Media support of the EZ Flow filter is provided by one metal retainer on the downstream side, either punched metal plate or expanded metal, depending on face size.

Sealing is accomplished with a resilient hot-melt adhesive running the full perimeter of the frame on both upstream and downstream sides.
