## Technical Documentation

## High Temperature Characterized Control Valves (HTCCV)

Effective February 2010

Belimo Project: Aetna Headquarters, Hartford, Connecticut

## High Temperature

 Characterized Control Valves

## BENEFIT OF THE BELIMO CHARACTERIZING DISC

- Equal percentage flow characteristic.
- Excellent control stability assured with the characterizing disc.
- $C_{v}$ values equal to $C_{v}$ values for globe valves of the same size.
- The need for multiple pipe reduction is usually eliminated.
life span of actuator and valve.

## FEATURES

- Thermal isolating adapter between flange and actuator.
- Easy direct coupling of actuator with a single screw.
- Perpendicular mounting flange and square drive head eliminate lateral forces on the stem.
- Blow-out proof stem with thrust-bearing Teflon ${ }^{\circledR}$ disc and double 0 -ring design for long service life.*
- Stainless steel ball and stem.
- Vent holes reduce condensation build-up.
- Forged dezincificated brass valve body - no pin-hole leaks.
- Characterizing disc - made of Tefze ${ }^{\boxplus}$ known for excellent strength and chemical resistance.
- Teflon ${ }^{\circledR}$ seats with 0 -rings provide constant seating force against the ball and reduce torque requirement.
- Actuator can be mounted in four different positions.

## EQUAL PERCENTAGE VALVE CHARACTERISTIC

In order to ensure good stability of control, it is essential for a control valve to have an equal percentage characteristic. This type of characteristic produces a linear variation in thermal output according to the amount of opening of the valve (also known as the system characteristic). Under normal testing conditions a conventional ball valve exhibits an S -shaped characteristic. When it is installed in a real system, however, this characteristic is seriously deformed because, compared with its nominal size, a ball valve possesses an extremely high flow coefficient. Whether used with or without pipe reducers or a reduced bore, they do not normally allow stable regulation of the thermal capacity.

Belimo's unique High Temperature Characterized Control Valve (HTCCV) is very different. A special characterizing disc inside the valve gives it an equal percentage characteristic which makes it out perform a globe valve of the same nominal size. The flow (the $C_{v}$ value) is reduced to the required value by a combination of the hole in the ball and the shaped aperture in the disc. The increase in flow as the valve is opened is very slow and controlled, and it also reduces turbulence.
This produces better part-load behavior and improved stability of control while also optimizing energy consumption.

[^0]
## COORDINATED MOTORIZED OPERATION

The optimum functionality of the Belimo HTCCV is assured by properly coordinating its actuation with MFT. Specially developed rotary actuators provide the necessary precision for modulating, floating-point, and on/off methods of control.

All HTCCVs are supplied with the appropriate rotary actuator to provide the close-off and operation desired.

## OPTIMIZED FOR CONTROL

The Belimo HTCCV marries known technology with an innovative development - the unique fluid dynamical designed characterizing disc.
The marriage of HTCCV and MFT technologies has produced a range of valuable features which surpass the capabilities of globe valves at a very attractive price level:

- An equal-percentage valve characteristic
- Unlike a globe valve, no sudden change in inlet flow upon opening
- Excellent stability of control
- $C_{V}$ values comparable with those of globe valves of the same size
- Higher close-off ratings than standard globe valves
- $100 \%$ tight shut-off on two-way valves means NO leak-by unlike globe valves that have ANSI IV shutoff (leakage rate of $0.01 \%$ of the $\mathrm{C}_{\mathrm{v}}$ rating)

Flow Characteristics of Conventional Ball Valves versus BELIMO CHARACTERIZED CONTROL VALVES

Set-up High Temperature Characterized Control Valves ${ }^{\text {TM }}$ (CCV)

## SET-UP

|  |  | TWO-WAY VALVE (Specify upon ordering) |  |
| :---: | :---: | :---: | :---: |
|  | TR24-3 US | Power to pin 2 will drive valve CCW. Power to pin 3 will drive valve CW. |  |
|  | TR24-SR US | NC: Closed A to AB, will open as voltage increases. | NO: Open A to AB, will close as voltage increases (Can be chosen with switch inside terminal block of actuator). |
|  | LRB24-3, <br> LRB24-SR, <br> LRX24-MFT | Power to pin 2 will drive valve CW. Power to pin 3 will drive valve CCW. The above will function when the directional switch is in the " 1 " position, to reverse select the "0" position. | NO: Open A to AB, will close as voltage increases or power applied. (Can be chosen with CW/CCW switch ). |

| $\geq$ | TFX24 US LF24 US | NO/FO Valve: Open A to AB will drive closed. Spring Action: Will spring open A to $A B$ upon power loss. | NC/FC Valve: Closed $A$ to $A B$ will drive open. Spring Action: Will spring closed A to AB upon power loss. |
| :---: | :---: | :---: | :---: |
|  | TF (-3), MFT, SR LF ( -3 ), MFT, SR Floating or Proportional type actuators | NC/FO Valve: Closed $A$ to $A B$ will drive open. Spring Action: Will spring open A to AB upon power loss. | NC/FC or NO/FC Valve: Closed $A$ to $A B$ or Open A to $A B$ <br> (Can be chosen with CW/CCW switch). <br> Spring Action: Will spring closed A to AB upon power loss. <br> NO/FO Valve: Open A to AB <br> Spring Action: Will spring open A to AB upon power loss. <br> ( NO action can be chosen with CW/CCW switch). |

| Service | potable hot water, $60 \%$ glycol, steam |
| :--- | :--- |
| Flow characteristic | A-port equal percentage |
| Media temp range | $60^{\circ} \mathrm{F}$ to $266^{\circ} \mathrm{F}\left[15.6^{\circ} \mathrm{C}\right.$ to $\left.130^{\circ} \mathrm{C}\right]$ Water <br> $\operatorname{max~} 250^{\circ} \mathrm{F}\left(120^{\circ} \mathrm{C}\right)$ Steam |
| Maximum differential pressure <br> $(\Delta \mathrm{P})$ | 60 psi typical application <br> 116 psi full open only (Model \# B215HT455) <br> steam: 15 psi |
| Maximum inlet | steam: 15 psi |
| Leakage | $0 \%$ for A to AB |

## FLOW PATTERN

2-way High Temperature Characterized Control Valves ${ }^{\text {TM }}$

Upstream A
Downstream AB
Valve should be installed with the disc downstream unlike the CCV.

## ASSEMBLY

(1) One screw attaches to valve

2
Four actuator mounting positions
(3)

2-way flow pattern
(4)

Top of valve stem indicates direction of flow (Flow A to AB shown)

## OPERATION/INSTALLATION

Assembly can be mounted horizontally or vertically for water applications. For steam applications the valve can be mounted vertically but if mounted horizontally the valve must be $90^{\circ}$ off center of the pipe. Do not install with actuator below pipe.

(Steam or water application)

## ORDERING EXAMPLE

4 Complete Ordering Example: B215HT186+TR24-SR US+NO

[^1]
# B2...HT... Two-way High Temperature Characterized Control Valve Stainless Steel Ball and Stem 

## Application

This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box re-heat coils and bypass loops. This valve is suitable for use in a hydronic system with variable flow.

This valve is designed to fit in compact areas where on/off or floating point control is required using 24 VAC.

| Technical Data |  |
| :--- | :--- |
| Service | potable water/low pressure steam, $60 \%$ glycol |
| Flow characteristic | A-port equal percentage |

[^2]

## Applications

- Water/low pressure steam control of air handling apparatus in ventilation and air-conditioning systems
- District heating
- Humidifier

## Mode of Operation

The control valve is operated by an electronic actuator that responds to a standard voltage for on/off control, by a proportional VDC/4... 20 mA , or 3-point control system. The actuator will then move the ball to the valve to the position dictated by the contol signal and change the flow.

## Product Features

Equal-percentage characteristic of the flow; models with * have modified equal percentage characteristic.

Actuator Specifications

| Control type | On/Off, Floating Point, 2-10 VDC <br> Multi-Function Technology (MFT) |
| :--- | :--- |
| Manual override | (only LR, TR Series) |
| Electrical connection | $3 \mathrm{ft}[1 \mathrm{~m}]$ cable with <br>  <br> $1 / 2^{\prime \prime}$ conduit fitting (except TR) |

Valve Specifications

| Service | potable hot water, 60\% glycol, steam |
| :---: | :---: |
| Flow characteristic | A-port equal percentage |
| Controllable flow range | $75^{\circ}$ |
| Sizes | $1 / 2^{\prime \prime}$ - ${ }^{\prime \prime}$ |
| Type of end fitting | NPT female ends |
| Materials |  |
| Body | brass (DZR) P-CuZn35Pb2 |
| Ball | stainless steel |
| Stem | stainless steel |
| Seats | Tefzel ${ }^{(8)}$ |
| Characterizing disc | Tefzel ${ }^{\circledR}$ |
| Packing | EPDM 0-rings |
| Pressure rating | 600 psi |
| Media temp range |  |
| Steam | $250{ }^{\circ} \mathrm{F}$ |
| Water | $60^{\circ} \mathrm{F}$ to $266{ }^{\circ} \mathrm{F}$ |
| Close off pressure | 200 psi |
| Maximum differential pressure (DP) | 60 psi partially open ball 116 psi full open only (Model \#B215HT455) |
| Steam | 15 psi |
| Maximum inlet pressure |  |
| Steam | 15 psi |
| Leakage | bubble tight 0\% |
| $\mathrm{C}_{V}$ rating | see above product chart for values |

## Wiring Diagrams

## $\underset{ }{3}$ INSTALLATION NOTES

2
The common connection from the actuator must be connected to the Hot connection of the controller. Actuators with plenum rated cable do not have numbers on wires; use color codes instead.

The actuator Hot must be connected to the control board Hot.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

NOTE: TR24-3 US cannot be wired in parallel with themselves or any other actuator.

## Models <br> TR24-SR US

## > Installation notes

CAUTION Equipment damage!
Actuators may be connected in parallel.
Power consumption and input impedance must be observed.
3
Actuators may also be powered by 24 VIC.
5
Only connect common to neg. (-) leg of control circuits.
\& APPLICATION NOTES
$\nabla$
The ZG-R01 $500 \Omega$ resistor converts the 4 to 20 mA control signal to 2 to 10 VDC, up to 2 actuators may be connected in parallel.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

2 to 10 VDC control

4 to 20 mA control

## Model

LRX24-MFT

| Technical Data |  |
| :---: | :---: |
| Power supply | $\begin{aligned} & 24 \mathrm{VAC} \pm 20 \% 50 / 60 \mathrm{~Hz} \\ & 24 \mathrm{VDC} \pm 10 \% \\ & \hline \end{aligned}$ |
| Power consumption | 2 W |
|  | 1.2 W |
| Transformer sizing | 3.5 VA (class 2 power source) |
| Electrical connection | 18 GA plenum rated cable 1/2" conduit connector - 3 ft [ 1 m ] $10 \mathrm{ft}[3 \mathrm{~m}] \quad 16 \mathrm{ft}[5 \mathrm{~m}]$ |
| Overload protection | electronic throughout $0^{\circ}$ to $95^{\circ}$ rotation |
| Operating range Y | 2 to 10 VDC, 4 to 20 mA (default) Variable (VDC, PWM, Floating Point, On/Off) |
| Input impedance | $\begin{array}{\|l\|} \hline 100 \mathrm{k} \Omega(0.1 \mathrm{~mA}), 500 \Omega \\ 1500 \Omega \text { (PWM, Floating Point, On/Off) } \\ \hline \end{array}$ |
| Feedback output U | 2 to 10 VDC, $0.5 \mathrm{~mA} \max$ VDC Variable |
| Angle of rotation | max. $95^{\circ}$, adjust. with mechanical stop electronically variable |
| Torque | $45 \mathrm{in}-\mathrm{lb}$ [5 Nm] |
| Direction of rotation | reversible with protected $\cap / \curvearrowleft$ switch |
| Position indication | handle |
| Manual override | external push button |
| Running time | 150 seconds (default) Variable ( 35 to 150 secs) |
| Humidity | 5 to $95 \%$ RH non condensing (EN 60730-1) |
| Ambient temperature | $-22^{\circ} \mathrm{F}$ to $122^{\circ} \mathrm{F}\left[-30^{\circ} \mathrm{C}\right.$ to $50^{\circ} \mathrm{C}$ ] |
| Storage temperature | $-40^{\circ} \mathrm{F}$ to $176{ }^{\circ} \mathrm{F}\left[-40^{\circ} \mathrm{C}\right.$ to $\left.80^{\circ} \mathrm{C}\right]$ |
| Housing | NEMA 2/IP54 |
| Housing material | UL94-5VA |
| Agency listings $\dagger$ | cULus acc. to UL60730-1A/-2-14, CAN/CSA E60730-1, CSA C22.2 <br> No. 24-93, CE acc. to 89/336/EEC |
| Noise level | <35 dB(A) |
| Quality standard | ISO 9001 |
| Weight | 1.5 lbs [ 0.7 kg ] |

$\dagger$ Rated impulse voltage 800V, Control pollution degree 3,
Type of action 1 (1.B for -S models)

## Wiring Diagrams

## $>$ <br> INSTALLATION NOTES

2
CAUTION Equipment damage!
Actuators may be connected in parallel. Power consumption and input impedance must be observed.
Actuators may also be powered by 24 VC.
Position feedback cannot be used with Triac sink controller. The actuator internal common reference is not compatible. Control signal may be pulsed from either the Hot (source) or the Common (sink) 24 VAC line.
Contact closures A \& B also can be triacs.
$A \& B$ should both be closed for triac source and open for triac sink. For triac sink the common connection from the actuator must be connected to the hot connection.

## 4 <br> APPLICATION NOTES

The ZG-R01 $500 \Omega$ resistor converts the 4 to 20 mA control signal to 2 to 10 VDC , up to 2 actuators may be connected in parallel.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

## Wiring Diagrams

## INSTALLATION NOTES

CAUTION Equipment damage!
Actuators may be connected in parallel.
Power consumption and input impedance must be observed.
The common connection from the actuator must be
connected to the Hot connection of the controller.
The actuator Hot must be connected to the control board common.
For end position indication, interlock control, fan startup, etc.,
TF24-3-S US incorporates one built-in auxiliary switch: $1 \times$ SPDT, 3A (0.5A) @250 VAC, UL listed, adjustable $0^{\circ}$ to $95^{\circ}$.

Actuators with plenum rated cable do not have numbers on wires; use color coded instead. Actuators with appliance rated cable use numbers.

## APPLICATION NOTES

Meets cULus or UL and CSA requirements without the need of an electrical ground connection.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. ## x INSTALLATION NOTES

CAUTION Equipment damage!
Actuators may be connected in parallel.
Power consumption and input impedance must be observed.
Up to 4 actuators may be connected in parallel. With 4 actuators wired to one $500 \Omega$ resistor, a $+2 \%$ shift of control signal may be required.
Power consumption must be observed.
Actuators may also be powered by 24 VDC.
Only connect common to neg. (一) leg of control circuits.
Actuators with plenum rated cable do not have numbers on wires; use color codes instead.
For end position indication, interlock control, fan startup, etc., TF24-SR-S US incorporates one built-in auxiliary switch: $1 \times$ SPDT, 3A (0.5A ) @250 VAC, UL listed, adjustable $0^{\circ}$ to $95^{\circ}$.

## Wiring Diagrams

## X installation notes

## CAUTION Equipment damage!

Actuators may be connected in parallel.
Power consumption must be observed.

3
Actuators may also be powered by 24 VDC .
The common connection from the actuator must be connected to the Hot connection of the controller.

The actuator Hot must be connected to the control board common.
For end position indication, interlock control, fan startup, etc.,
LF24-3-S US incorporates one built-in auxiliary switch: $1 \times$ PDT, 6 A
(1.5A) @ 250 VAC, UL listed, adjustable $0^{\circ}$ to $95^{\circ}$.

Actuators with plenum rated cable do not have numbers on wires; use color coded instead. Actuators with appliance rated cable use numbers.

## \& 7 APPLICATION NOTES

Meets ocULus or UL and CSA requirements without the need of an electrical ground connection.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

## Models

| Control signal | 2 to 10 VDC <br> 4 to 20 mA (with $500 ~$ |
| Power resistor) |  |

## Wiring Diagrams

## K <br> INSTALLATION NOTES

## CAUTION Equipment damage!

Actuators may be connected in parallel. Up to 4 actuators may be connected in parallel. With 4 actuators wired to one $500 \Omega$ resistor, a $+2 \%$ shift of control signal may be required. Power consumption must be observed.

Actuators may also be powered by 24 VDC.
Actuators with plenum rated cable do not have numbers on wires; use color codes instead.

Only connect common to neg. (-) leg of control circuits.
For end position indication, interlock control, fan startup, etc., LF24-SR-S US incorporates one built-in auxiliary switch: $1 \times$ SPDT, 6A (1.5A) @ 250 VAC, UL listed, adjustable $0^{\circ}$ to $95^{\circ}$.

The LF24-SR-S US wire 5 is white.

## - APPLICATION NOTES

- The ZG-R01 $500 \Omega$ resistor converts the 4 to 20 mA control signal to 2 to 10 VDC , up to 2 actuators may be connected in parallel.
Meets cULus or UL and CSA requirements without the need of an electrical ground connection.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

## Wiring Diagrams

## x <br> INSTALLATION NOTES

2
CAUTION Equipment damage!
Actuators may be connected in parallel if not mechanically mounted to the same shaft. Power consumption and input impedance must be observed.
$\qquad$ Actuators may also be powered by 24 VDC.
IN4004 or IN4007 diode (IN4007 supplied, Belimo part number 40155).
Triac A and B can also be contact closures.
Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 VAC line.
Position feedback cannot be used with Triac sink controller. The actuators internal common reference is not compatible.

## APPLICATION NOTES

The ZG-R01 $500 \Omega$ resistor converts the 4 to 20 mA control signal to 2 to 10 VDC, up to 2 actuators may be connected in parallel.

## WARNING Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

* P -10001 is the default configuration.

Example: AF24-MFT US is the basic model. Add the P... pre-set MFT configuration number and list price to the actuator when ordering, as needed.
Note: V-codes used for NV...Series actuator. All other MFT actuators use P-codes.
Note: Most popular configurations available at no additional cost.
Note: If the configuration needed is not listed, please fill in pg 239 or call Customer Service.
Note: For Non-Spring Return Actuators the 3-digit code can be used in place of the P... pre-set MFT configuration number.

## \#2 Create a Custom Configuration

(1) Angle of rotation setting

| $\square$ | Deactivated (Default) | The following settings 2-5 refer to the full angle of rotation of $95^{\circ}$. |
| :--- | :--- | :--- |
| Activated | The following settings $\mathbf{2}$ - (5) are automatically adapted to the effective <br> mechanical angle of rotation. |  |

Manual triggering by pressing the push button twice.
Automatic triggering each time the unit is powered up or by pressing the push button twice.
(2) Control Types
(3) Feedback Signals $\mathrm{U}_{5}$

| $\square$ | Position Feedback U | DC $2 \ldots . .10 \mathrm{~V}$ (Default) |  |  |
| :--- | :--- | :--- | :--- | :--- |
| $\square$ | Position Feedback U | DC $0 \ldots . .10 \mathrm{~V}$ |  |  |
| $\square$ | Position Feedback U | Start $\quad \mathrm{DC}$ <br>  | $\square \cdot \square \mathrm{V}(0 \ldots .8 \mathrm{~V})$ | The finish must <br> be at least 2 V <br> above the start! |

150 seconds (Default)
Running time $\square \square \square$
seconds ( $75 \ldots . .300$ seconds) (in 5 second increments)
(4) Running Time

Note: The sound power level [ $\mathrm{dB}(\mathrm{A})]$ increases when the running time is below 150 seconds.

| LM | $35 \ldots 150$ seconds |
| :--- | :--- |
| NM | $45 \ldots 170$ seconds |
| AM | $90 \ldots 300$ seconds |
| GM | $90 \ldots 300$ seconds |

## Section 230900 - INSTRUMENTATION AND CONTROL FOR HVAC

### 2.15 ACTUATORS

A. Electronic Damper Actuators:

1. Manufactured, brand labeled or distributed by BELIMO.
2. Size for torque required for damper seal at load conditions.
3. Coupling: V-bolt dual nut clamp with a V-shaped, toothed cradle.
4. Mounting: Actuators shall be capable of being mechanically and electrically paralleled to increase torque if required.
5. Overload Protection: Electronic overload or digital rotation-sensing circuitry without the use of end switches to prevent any damage to the actuator during a stall condition.
6. Fail-Safe Operation: Mechanical, spring-return mechanism. Internal chemical storage systems, capacitors, or other internal nonmechanical forms of fail-safe operation are not acceptable.
7. Power Requirements (Two-Position Spring Return): 24 [120] [230] VAC.
8. Power Requirements (Proportional): Maximum 10 VA at 24 VAC or 8 W at 24 VDC.
9. Proportional Actuators shall be fully programmable. Control input, position feedback and running time shall be factory or field programmable by use of external computer software Diagnostic feedback shall provide indications of hunting or oscillation, mechanical overload and mechanical travel. Programming shall be through an EEPROM without the use of actuator mounted switches.
10. Temperature Rating: -22 to $+122^{\circ} \mathrm{F}-30$ to $+50^{\circ} \mathrm{C}\left[-\mathbf{5 8}\right.$ to $+122^{\circ} \mathrm{F}-50$ to $\left.+50^{\circ} \mathrm{C}\right]$
11. Housing: Minimum requirement NEMA type 2 / IP54 mounted in any orientation.
12. Agency Listing: ISO 9001, cULus, and CSA C22.2 No. 24-93.
13. The manufacturer shall warrant all components for a period of 5 years from the date of production, with the first two years unconditional.
B. Electronic Valve Actuators:
14. Manufactured, brand labeled or distributed by BELIMO.
15. Size for torque required for valve close off at $150 \%$ of total system (head) pressure for 2-way valves; and $100 \%$ of pressure differential across the valve or 100\% of total system (pump) head differential pressure for 3-way valves.
16. Coupling: Directly couple end mount to stem, shaft, or ISO-style direct-coupled mounting pad.
17. Mounting: Actuators shall be capable of being mechanically and electrically paralleled to increase torque if required.
18. Overload Protection: Electronic overload or digital rotation-sensing circuitry without the use of end switches to deactivate the actuator at the end of rotation.
19. Fail-Safe Operation: Mechanical, spring-return mechanism. Internal chemical storage systems, capacitors, or other internal nonmechanical forms of fail-safe operation are not acceptable.
20. Power Requirements: Maximum 10 VA at 24 VAC or 8 W at 24 VDC.
21. Maximum 1 VA at 24 VAC or 1 W at 24 VDC
22. Temperature Rating: -22 to $+122^{\circ} \mathrm{F} .-30$ to $+50^{\circ} \mathrm{C}\left[-\mathbf{5 8}\right.$ to $+\mathbf{1 2 2 ^ { \circ }} \mathrm{F}-\mathbf{5 0}$ to $\left.+50^{\circ} \mathrm{C}\right]$
23. Housing: Minimum requirement NEMA type 2 / IP54 mounted in any orientation.
24. Agency Listing: ISO 9001, cULus, and CSA C22.2 No. 24-93.
25. The manufacturer shall warrant all components for a period of 5 years from the date of production, with the first two years unconditional.
C. Terminal Unit Actuators
26. Manufactured, brand labeled or distributed by BELIMO.
27. Close-off (Differential) Pressure Rating: 200 psi.
28. Coupling: V-bolt dual nut clamp with a V-shaped, toothed cradle or an ISO-style direct-coupled mounting pad.
29. Power Requirements: Maximum 1 VA at 24 VAC or 1 W at 24 VDC.
30. Temperature Rating: -22 to $+122^{\circ} \mathrm{F} .-30$ to $+50^{\circ} \mathrm{C}$.
31. Housing Rating: Minimum UL94-5V(B) flammability.
32. Agency Listing: CE, UL 60730-1A/-2-14, CAN/CSA E60730-1, CSA C22.2 No. 24-93, CE according to 89/336/EEC.
33. The manufacturer shall warrant all components for a period of 5 years from the date of production, with the first two years unconditional.
D. Industrial Actuators
(ONLY TO BE USED WITH BUTTERFLY VALVE SECTION)
34. Manufactured, brand labeled or distributed by BELIMO.
35. The combination of valve and actuator shall meet the close-off requirements as specified in Section 2.16.F - Butterfly Valves.
36. Coupling: ISO 5211 mounting standards.
37. Overload Protection: A self resetting thermal switch embedded in the motor.
38. Manual Override: Actuator shall be equipped with a hand wheel or shaft for manual override to permit operation of the actuator in the event of an electrical power failure
39. Auxiliary Switches: 2 SPDT rated $3 A$ at 250 VAC.
40. Temperature Rating: -4 to $+150^{\circ} \mathrm{F} .-20$ to $+65^{\circ} \mathrm{C}$.
41. Housing: Minimum requirement NEMA type 4X/ IP67. Actuator shall have an internal heater. A visual indication beacon shall indicate position status of the device
42. Agency Listing: ISO, CE, CSA
43. The manufacturer shall warrant for 2 years from the date of production.

### 2.16 CONTROL VALVES

A. Manufacturer

1. Manufactured, brand labeled or distributed by BELIMO.
B. Control Valves: Factory fabricated of type, body material, and pressure class based on maximum pressure and temperature rating of piping system, unless otherwise indicated.
C. The manufacturer shall warrant all components for a period of 5 years from the date of production, with the first two years unconditional (except as noted).
D. Pressure Independent Control Valves
2. NPS 2 and Smaller: Forged brass body rated at no less than 400 psi , chrome plated brass ball and stem, female NPT union ends, dual EPDM lubricated 0 -rings and TEFZEL ${ }^{\circledR}$ characterizing disc.
3. Accuracy: The control valves shall accurately control the flow from 0 to $100 \%$ full rated flow. The flow shall not vary more than $\pm 5 \%$ due to system pressure fluctuations across the valve with a minimum of 5 psid across the valve.
4. Flow Characteristics: Equal percentage characteristics.
5. Close-off Pressure Rating: 200 psi.
6. All actuators shall be electronically programmed by use of externa computer software. Programming using actuator mounted switches or multi-turn actuators are NOT acceptable. [Actuators for 3-wire floating (tri-state) on $1 / 2$ " to 1 " pressure independent control valves shall fail in place and have a mechanical device inserted between the valve and the actuator for the adjustment of flow.] [Actuators for two-position $1 / 2$ " to 1 " pressure independent control valves shall fail in place and have a mechanical device inserted between the valve and the actuator for the adjustment of flow.] [Actuators shall be provided with an auxiliary switch to prove valve position.]
7. The actuator shall be the same manufacturer as the valve, integrally mounted to the valve at the factory with a single screw on a four-way DIN mounting-base.
8. The control valve shall require no maintenance and shall not include replaceable cartridges.
9. The manufacturer shall warrant all components for a period of 5 years from the date of production, with the first two years unconditional.
10. The use of pressure independent valves piped in parallel to achieve the rated coil flow shall be permitted. Actuators shall be electronically programmed to permit sequencing the flow with a single control output point. The use of external devices to permit sequencing is NOT acceptable.

## SPECIFYING PRESSURE INDEPENDENT CONTROL VALVES REQUIRE THE FOLLOWING ADDITIONS TO SECTIONS 232113 AND 230593.

To be inserted into Section 232113 - HYDRONIC PIPING

### 2.6 CONTROL VALVES

K. Calibrated Balancing Valves and Automatic Flow-Control Valves shall not be required on devices where pressure independent control valves are installed.

To be inserted into Section 230593 -
TESTING, ADJUSTING, AND BALANCING FOR HVAC

### 3.11 PROCEDURE FOR HYDRONIC SYSTEMS

H. Systems installed with pressure independent control valves shall not require hydronic system balancing. [Flow shall be verified for [10\%] [20\%] [25\%] < Insert Percentage> of the total installed product. Exact locations of tested product to be coordinated with the design engineer.]
E. Characterized Control Valves:

1. NPS 3 and Smaller: Nickel-plated forged brass body rated at no less than 400 psi, stainless steel ball and blowout proof stem, NPT female end fittings, with a dual EPDM 0 -ring packing design, fiberglass reinforced Teflon ${ }^{\circledR}$ seats, and a TEFZEL ${ }^{\circledR}$ flow characterizing disc. [NPS $3 / 4$ " and Smaller for Terminal Units: Nickel plated forged brass body rated at no less than 600 psi , chrome plated brass ball and blowout proof stem, NPT female end fittings, with a dual EPDM 0-Ring packing design, fiberglass reinforced Teflon ${ }^{\circledR}$ seats, and a TEFZEL ${ }^{\circledR}$ flow characterizing disc.]
2. Sizing:
a. Two-Position: Line size or size using a pressure differential of 1 psi .
b. 2-way Modulating: [3 psig] 5 psig or twice the load pressure drop, whichever is greater.
c. 3-way Modulating: Twice the load pressure drop, but not more than [3 psig] 5 psig.
3. Close-off Pressure Rating: 100 psi. [NPS $3 / 4$ " and Smaller for Terminal Units: 200 psi.]
4. The actuator shall be the same manufacturer as the valve, integrally mounted to the valve at the factory with a single screw on a four-way DIN mounting-base.
F. Hydronic system globe valves shall have the following characteristics:
5. NPS 2 and Smaller: ANSI Class 250 bronze body, stainless steel stem, brass plug, bronze seat, and a TFE packing.
6. NPS $2-1 / 2$ and Larger: ANSI Class 125 [250] cast iron body, stainless steel stem, bronze plug, bronze seat, and a TFE V-ring packing.
7. Sizing:
a. Two-Position: Line size or size using a pressure differential of 1 psi .
b. 2-way Modulating: [ 3 psig ] 5 psig or twice the load pressure drop, whichever is greater.
c. 3-way Modulating: Twice the load pressure drop, but not more than [3 psig] 5 psig.
8. Flow Characteristics: 2-way valves shall have equal percentage characteristics; 3-way valves shall have linear characteristics.
9. Close-off Pressure Rating: Combination of actuator and trim shall provide minimum close-off pressure rating of $150 \%$ of total system head pressure for 2-way valves and $150 \%$ of the design pressure differential across the 3-way valves.
10. 2- and 3-way globe valves shall be used only if characterized control valves do not fit the sizing criteria or application.
G. Steam system globe valves shall have the following characteristics:
11. NPS 2 and Smaller: ANSI Class 250 bronze body; stainless steel seat, stem and plug; and a TFE packing.
12. NPS $2-1 / 2$ and Larger: ANSI Class 125 [250] cast iron body; stainless steel seat, stem and plug; and a TFE V-ring packing.
13. Sizing:
a. Two-Position: Line size or sized using $10 \%$ of inlet gauge pressure.
b. Modulating: 15 psig or less inlet steam pressure, the pressure drop shall be $80 \%$ of inlet gauge pressure. Higher than 15 psig inlet steam pressure the pressure drop shall be $42 \%$ of the inlet absolute pressure.
14. Flow Characteristics: Linear or equal percentage characteristics.
15. Close-off Pressure Rating: Combination of actuator and trim shall provide minimum close-off pressure rating of $150 \%$ of operating (inlet) pressure.
H. Butterfly Valves - Resilient Seat:
16. NPS 2 to 12: Valve body shall be full lugged cast iron 200 psig body with a 304 stainless steel disc, EPDM seat, extended neck and shall meet ANSI Class 125/150 flange standards. Disc-to-stem connection shall utilize an internal spline. External mechanical methods to achieve this mechanical connection, such as pins or screws, are not acceptable. The shaft shall be supported at four locations by RPTFE bushings.
17. NPS 14 and Larger: Valve body shall be full lugged cast iron 150 psig body with a 304 stainless steel disc, EPDM seat, extended neck and shall meet ANSI Class 125/150 flange standards. Disc-to-stem connection shall utilize a dual-pin method to prevent the disc from settling onto the liner. The shaft shall be supported at four locations by RPTFE bushings.
18. Sizing:
a. Two-Position: Line size or size using a pressure differential of 1 psi .
b. Modulating: 3 psig [ 5 psig ] or twice the load pressure drop, whichever is greater. Size for the design flow with the disc in a $60^{\circ}$ open-position with the design velocity less than 12 feet per second.
19. Close-off Pressure Rating: NPS 2" to 12 " 200 psi bubble tight shutoff. NPS 14" and larger, 150 psi bubble tight shut-off.
I. Zone Valves (On/Off, Two-Position Applications):
20. NPS 1 and Smaller: Forged brass body rated at no less than 300 psi, stainless steel stem, female NPT union or sweat with a stainless steel stem and EPDM seals.
21. Sizing:
a. Two-Position: Line size or size using a pressure differential of 1 psi .
22. Close-off Pressure Rating: Combination of actuator and trim shall provide minimum close-off pressure rating of $150 \%$ of total system head pressure for 2-way valves and $125 \%$ of the design pressure differential across the 3-way valves.
23. The actuator shall be the same manufacturer as the valve, integrally mounted to the valve at the factory.
24. The manufacturer shall warrant all components for a period of 2 years from the date of production.

Actuator/Valve Specification

## To be inserted into Section 233300 - AIR DUCT ACCESSORIES

### 2.8 SMOKE DAMPERS

Replace with the following:
I. Damper Motors:

1. Manufactured, brand labeled or distributed by BELIMO.
2. Size for torque required for damper seal at load conditions.
3. Coupling: V-bolt dual nut clamp with a V -shaped toothed cradle. Aluminum clamps or set screws are not acceptable.
4. Overload Protection: Microprocessor or an electronic based motor controller providing burnout protection if stalled before full rotation is reached. The actuator shall be electronically cut off at full open to eliminate noise generation with the holding noise level to be inaudible.
5. Power Requirements (Two-Position Spring Return): 24 [120] [230] VAC
6. Power Requirements (Proportional): Maximum (running) 12 VA at 24 VAC or 8 W at 24 VDC. Maximum (holding) 5VA at 24 VAC or 3 W at 24 VDC holding.
7. Proportional Actuators ( 24 VAC/VDC): Control signal shall be 2-10 VDC or 4-20 mA, with a 2-10 VDC position feedback signal.
8. Actuator timing shall meet 15 seconds [ 75 seconds] [local codes].
9. Temperature Rating: Actuator shall have a UL555S listing by the damper manufacturer for $350^{\circ} \mathrm{F}\left[250^{\circ} \mathrm{F}\right]$.

The following replaces item 2.8.K. 1
10. Auxiliary switches for [signaling] [fan control] [or] [position indication].

### 2.9 COMBINATION FIRE AND SMOKE DAMPERS

Replace with the following:
0. Damper Motors:
11. Manufactured, brand labeled or distributed by BELIMO.
12. Size for torque required for damper seal at load conditions.
13. Coupling: V -bolt dual nut clamp with a V -shaped toothed cradle. Aluminum clamps or set screws are not acceptable.
14. Overload Protection: Microprocessor or an electronic based motor controller providing burnout protection if stalled before full rotation is reached. The actuator shall be electronically cut off at full open to eliminate noise generation with the holding noise level to be inaudible.
15. Power Requirements (Two-Position Spring Return): 24 [120] [230] VAC.
16. Power Requirements (Proportional): Maximum (running) 12 VA at 24 VAC or 8 W at 24 VDC. Maximum (holding) 5VA at 24 VAC or 3 W at 24 VDC holding.
17. Proportional Actuators ( 24 VAC/VDC): Control signal shall be 2-10 VDC or 4-20 mA, with a 2-10 VDC position feedback signal.
18. Actuator timing shall meet 15 seconds [ 75 seconds] [local codes]
19. Temperature Rating: Actuator shall have a UL555S listing by the damper manufacturer for $350^{\circ} \mathrm{F}$ [ $250^{\circ} \mathrm{F}$ ].

The following replaces item 2.9.Q.1
20. Auxiliary switches for [signaling] [fan control] [or] [position indication].

## NOTE TO SPECIFIER <br> Any (or all) of the following manufacturers are listed per UL555S with Belimo actuators: Air Balance, Arlan, E.H. Price, Greenheck, Leader, Lloyd Industries, Nailor, Pottorff, Prefco, Ruskin and Safe-Air.

21. Housing: Steel housing, aluminum is unacceptable.
22. Agency Listing: ISO 9001, UL873, or UL60730.
23. The manufacturer shall warrant all components for a period of 5 years from the date of production, with the first two years unconditional.

## I. General

1.1. The following Terms and Conditions of Sale ("Terms") apply to the sale of products described in this Product Guide ("Products"). As used herein, "Seller" or "Belimo" refers to Belimo Aircontrols (USA) Inc. or Belimo Aircontrols (CAN) Inc., as applicable, and "Client" refers to the individual or business entity that purchases the Products from Seller. These Terms shall apply unless the parties mutually agree to different terms and memorialize such agreement in a writing signed by both Client and Seller.

## II. Price

2.1. The Seller's price for Products (the "Price") is net, F.O.B. Point of Origin, and is calculated in US currency for sales made by Belimo Aircontrols (USA), Inc. and calculated in Canadian currency for sales made by Belimo Aircontrols (CAN) Inc.
2.1. The Price, unless otherwise agreed upon, does not include freight and packaging (wooden crates, pallets, etc), the costs of which will be charged to Client at cost for each shipment and shall be payable with payment of the Price.
2.3. Orders for Products with a net value of less than US $\$ 300$ (CAN $\$ 450$ ) will be subject to a US\$20 (CAN\$35) handling fee (the "Handling Fee"). The Handling Fee will not be charged for orders of Products with a net value equal to or greater than US\$300 (CAN\$450) or for Products ordered through Seller's internet ordering system at: www.belimo.com.
2.4. Seller reserves the right to make partial deliveries of orders of Products, each of which deliveries may be invoiced separately by Seller.
2.5. The Price does include charges for wiring diagrams, installation, and commissioning, which will be charged to Client separately and will be payable on demand.

## III. Payment

3.1. Invoices are payable in US currency for sales made by Belimo Aircontrols (USA), Inc. and in Canadian currency for sales made by Belimo Aircontrols (CAN) Inc. and are due no later than 30 days from the date of invoice, without any deductions.
3.2. If Client fails to pay the entire invoice balance within 60 days from the date of the invoice, Client will be subject to an interest charge of $2 \%$ per month (or the maximum rate permitted by law, whichever is less) on the outstanding unpaid balance due to Seller.
3.3. Clients who maintain outstanding balances for 45 days or more after the date of invoice may be subject to restricted shipments of Products or may be required to pay for all future deliveries of Products on a cash-on-delivery basis.
IV. Title and Risk
4.1. Title to all Products shall remain with Seller and shall not pass to Client until Seller has received full payment for the Products.
V. Damage or Loss in Transit
5.1. Seller assumes no liability for damage or loss of shipment of Products, which risk shall at all times remain with the carrier. All shipments must be unpacked and examined by Client immediately upon receipt. Any external evidence of loss or damage must be noted on the freight bill accompanying the shipment of Products or carrier's receipt and signed by the carrier's agent at the time of delivery. Failure to do so will result in the carrier's refusal to honor any claim relating to damage of Products. Client must also notify Seller of such damage by providing Seller with a copy of the freight bill or damage report so that Seller can file a claim for loss or damage in transit with the carrier. If the damage does not become apparent until the shipment is unpacked, customer must make a request for inspection by the carrier's agent and file with the carrier within 15 days after receipt of product and notify Seller of the same. Seller is not liable for consequential damage to Client's property or a third-party's property resulting from the installation of damaged Products.
VI. Delivery
6.1. Seller undertakes to make every attempt to adhere to its stated delivery parameters and to make a timely delivery of the Products but does not guarantee any delivery specifications. Each contract entered into for the purchase of Products is not cancelable nor is Seller liable for any direct or indirect losses that may arise, for any reason whatsoever, due to Seller's failure to meet any stated or assumed delivery schedules.
VII. Return of Goods
7.1. Products received by Client cannot be returned unless: (i) Client alerts Seller that it intends to return such Products, (ii) Seller agrees to accept the return of such Products, (iii) Client obtains a Return Material Authorization ("RMA") number from Seller for the return of such Products, and (iv) Client follows all return instructions provided by the Seller. The RMA number must be clearly written on the outside of all packaging for any returned Products. Only Products returned to proper the location as instructed by Seller and identified with an RMA number will be considered for credit.
7.2. Only Products that are returned in original packaging may be accepted for return. Such returned Products must be received in good condition, adequate for resale as new Products to qualify for credit. Client will be responsible for payment of a restocking charge for all returned Products in an amount no less than $20 \%$ of the invoice value of the Products ("Restocking Charges"). All return Products must be shipped to Seller at Client's cost.
7.3. Returns that result from Seller errors will be credited in full and will not be subject to Restocking Charges.

## VIII. Warranty

VIII.A 5-year Warranty
8.1. Products that are listed in this Product Guide as carrying a 5 -year warranty and shipped after May 1, 2000 to a location in the United States or Canada shall carry a 5 -year warranty. The 5 -year warranty is unconditional for the first two years from the date of production of the Products. After the first two years from the date of Production, the warranty shall be conditional and the warranty coverage shall not apply to damage to Products caused by ordinary wear and tear, negligence or improper use by Client, or other causes beyond the control of the Seller. Product -specific terms of warranty with regard to warranty period or conditions of warranty may apply to certain specified Products as stated in the documentation for those Products.

## VIII.B 2-year Conditional Warranty

8.2. Products that are listed in this Product Guide as carrying a 2-year warranty and shipped after May 1, 2005 to a location in the United States or Canada shall carry a 2 -year warranty. The 2-year warranty is conditional and the warranty coverage shall not apply to damage to Products caused by ordinary wear and tear, negligence or improper use by Client, or other causes beyond the control of the Seller. Product -specific terms of warranty with regard to warranty period or conditions of warranty may apply to certain specified Products as stated in the documentation for those Products.

## VIII.C General Warranty Terms

8.3. Seller's warranty may be null and void in the event of any: (a) modification or unauthorized repairs of Products by Client, (b) unauthorized incorporation or integration of Products into or with Client's equipment, (c) use of Products in an unauthorized manner, or (d) damage to Products not caused by Seller.
8.4. Client must promptly notify Seller of Products' alleged defect and provide Seller with other evidence and documentation reasonably requested by Seller. Before removing Products from service, Client should contact a Seller-authorized support technician by calling Belimo customer service. The contact information for Belimo customer service is listed on the back page of Belimo's Product Guide and Price List ("PGPL") or may be found at www.belimo.com. Belimo customer service will work with field technicians to troubleshoot problems. Many problems can be resolved over the phone.
8.5. If a problem cannot be resolved over the phone, an RMA number will be issued by Seller for return of the Products. Prior to returning any Products under a warranty, Client must obtain an RMA number from Seller, along with shipping instructions for the return. The RMA number must be clearly written on the outside of the box containing the returned Products. Only Products returned to the proper location and identified with an RMA number will be accepted by the Seller.
8.6. All returned Products should be packaged appropriately to prevent further damage. Seller reserves the right to refuse any returned material if improperly packaged or labeled (without an RMA number). Products returned without proper RMA documentation will void Seller's warranty.
8.7. Products found to be defective for which a warranty is applicable will either be replaced or repaired at the Seller's discretion. Seller is not responsible for charges that Client may incur as a result of the removal or replacement of Products.
8.8. Repaired or replacement Products are shipped from Seller via ground shipment. Other shipping methods are available at the sole expense of the Client.
8.9. Repaired, replaced or exchanged Products will carry a warranty for a period of time equal to the greater of: (i) the remainder of the original 5 -year warranty or 2-year warranty that was applicable to the repaired, replaced or exchanged Products, or (ii) six months, effective from the date the repaired, exchanged or replaced Products are shipped by Seller (the "Replacement Warranty Period").
8.10. Advanced replacement Products for Products covered under warranty may be obtained from Seller after the Belimo customer service troubleshooting process has been completed. For industrial products (such as butterfly valves), a purchase order is required. The purchase order will be credited upon the receipt and verification by Seller of the returned defective Products. For non-industrial products, an invoice will be issued and shall be due and payable is the returned Products are not received by Seller within 60 days from the date of that the replacement Products are shipped. Additional charges may apply if the nature of the problem has been misrepresented by Client.
8.11. Both the conditional and unconditional warranties cover the Products only, and do NOT cover labor associated with the troubleshooting, removal or replacement of such Products.
8.12. New Products ordered in an attempt to circumvent the warranty process may NOT be reimbursed if, upon receipt of returned Products, it is determined that the defect in the returned Products is actually field related, or the Products have been returned for cosmetic reasons only.
8.13. Advanced replacement Products for butterfly valve actuators may not be new, but have been verified by the Seller for electrical and mechanical operation. Such Products carry the full warranty for the entire Replacement Warranty Period.

## IX. No Warranty for Non-HVAC Application

9.1. All Seller warranties shall extend only to HVAC use of the Products. If Products are used in non-HVAC application (e.g., aircraft, industrial processes, etc.), Seller's warranties shall not cover such Products. Client will be solely responsible for any damage to or malfunction of Products or for any damage resulting from such use of Products.
X. Liability Disclaimer
10.1. These Terms constitute the entire understanding and agreement between Seller and Client regarding the warranties that cover Products and supersedes all previous understandings, agreements, communications and representations. Seller shall not be responsible for and Client does not have any right to make any claim for, damage that occurs to any property other than Products. Seller shall in no way be responsible for any costs incurred by Client in the determination of the causes of damage to any of Client's property, for expert opinions, or for any punitive or special, incidental or consequential damages of any kind whatsoever.
10.2. Seller shall not be liable for any damage resulting from or contributed by Client or third parties acting within the scope of responsibility of Client or such third party when:

1. Products are used for non-HVAC applications, such as in aircrafts, industrial processes, etc.;
2. Client uses the Products without complying with applicable law or institutional regulations or Belimo data and installation sheets or Client uses the Products without following good industry practice;
3. Products are used by personnel who have not received suitable instruction; or
4. Products are modified or repaired without the written approval of Seller. When requested to do so, Client shall immediately release Seller in full from any possible third party claims resulting in connection with the circumstances listed above. This also applies to claims in connection with product liability.
10.3. If Client becomes aware that any third party has made or appears likely to make any claim regarding Products (including, without limitation, regarding Product defects or rights infringed by Products), then Client shall immediately inform Seller and afford to Seller all assistance that Seller may require to enforce its rights and defend such claim.

## XIII. Proper Law and Jurisdiction

11.1. All sales of Products under these Terms and the warranties described herein shall be governed by the laws of the State of Connecticut, and the parties agree to submit to the exclusive jurisdiction of the Federal and state courts located in the State of Connecticut with respect to any dispute arising from the subject matter hereof. The parties hereby waive all rights to a jury trial in connection with any claims relating to the subject matter hereof.
