

PROFESSIONAL AIR CONDITIONING & REFRIGERATION PRODUCTS

CPS Products is a world leader in the design and manufacture of tools and test equipment used in the Automotive and HVACR industries. Founded in 1975, CPS has grown from a single employee and a single product to over 200 employees and 1200 products. CPS maintains 5 fully staffed subsidiary locations strategically located around the world. These global locations provide the loyal CPS customer base with unsurpassed service of our expansive product line. The success of CPS can be attributed to a basic philosophy of providing our customers with the very best our industry has to offer. This includes the best service, the best products and most importantly the best overall quality.

Supported by state-of-the-art mechanical and electronic manufacturing facilities, CPS is able to actively develop, maintain and continually improve our respected product lines in our wholly owned facilities. This ability is quite unique in today's rapidly changing manufacturing community providing CPS with a decisive edge when developing new innovative products that solve our customer's service needs. When one of our products becomes a trusted tool that a service professional will recommend to their friends, then our job is complete.

After all, we make our living by manufacturing the tools you rely on to make yours!

ELECTRONIC REFRIGERANT LEAK DETECTION

THE ELIMINATOR™ LS3000B - Electronic Refrigerant Leak Detector

Fully automatic electronic refrigerant leak detector for all HFC, HCFC, CFC, SF6 gases & blends. Exclusive POWERSHIFT software automatically monitors, controls & adjusts all critical instrument settings to ensure maximum leak search results under any job environment. Two separate visual LED displays enable user to pinpoint the exact location of leak source & the approximate size of that leak.

LS3000B

| SENSOR TYPE: | Cold Cathode Diode: Patented design allows fast, accurate detection of refrigerant leaks maintaining maximum sensitivity throughout the life of the sensor. Highly resistant to background contaminants including heavy condensation, oils, leak solutions, brake oils, radiator coolants, washer fluids, etc. |
|-------------------------------|---|
| SENSITIVITY: | Fully automatic selection better than 0.10oz/yr (3g/yr) leak rate of HFC. |
| LEAK INDICATION: | Audible Alarms: Two user-selectable audible alarm options (HIGH and LOW intensity) |
| TACHOMETER DISPLAY: | Visual tachometer-like bar graph display: Eight high intensity LEDs |
| GEARSHIFT VISUAL DISPLAY: | Arranged in a gearshift pattern, 7 LEDs indicate the current sensitivity range of the unit and subsequent leak size |
| FLEX PROBE: | 14" / 35.6cm long, 0.25"/6.4mm diameter |
| OPERATING TEMPERATURE: | 0 to 140°F / -18 to 60°C |
| POWER: | 75 hours battery life using three size "C" alkaline batteries. Auto OFF after 10 minutes of inactivity. |
| LOW BATTERY INDICATOR: | Right most LED on Tachometer display illuminates to indicate low battery condition. |
| WEIGHT: | 1lb 2oz / 500g |
| WARRANTY: | 2 years excluding sensors and batteries |

Automotive Application

EXCLUSIVE POWERSHIFT Automatically controls all sensitivity

related settings, eliminating guesswork and maximizing unit performance.

HIGHLY RESISTANT TO BACKGROUND CONTAMINANTS Including heavy condensation, oils, leak solutions, brake fluid, radiator coolants, washer fluids, etc.

8 LED TACHOMETER DISPLAY Enables user to pinpoint exact location of leak

EASY ONE BUTTON OPERATION Depress once to turn unit ON.

Depress again to CLEAR the unit. Double-click to change sensitivity. Depress and hold to turn unit OFF.

1

ART COLD CAT OR TECI Delivers quick response to leaks and maintains maximum sensitivity throughout the life of the sensor.

HIGH OUTPUT ALARM SPEAKER Delivers clear crisp alarm tones

UNIQUE "GEARSHIFT" LED DISPLAY for LEAK SIZI allows user to determine the

approximate size of a leak. Neutral - Unit is ready for operation Leak Size: Small, Medium, Large

F-Gas Compliant (EN 14624:2005)

ELECTRONIC REFRIGERANT LEAK DETECTION

LEAK SEEKER[®] - LS780B / LS790B Electronic Refrigerant Leak Detectors

LS790B

Combines the most advanced microcomputer circuitry with field proven lon-pump[®] sensor technology creating a highly sensitive, accurate electronic refrigerant leak detector. Over 100 computer generated tones and a high intensity bar graph display quickly alerts the user to varying halogen concentrations. Patented automatic calibration design eliminates the need for manual balance or tick rate adjustments while the user selectable 10 sensitivity ranges enables the *LS790B* to detect leaks of all refrigerants.

Specifications for the LS780B and LS790B

| SENSOR TYPE: | Patented Ion-Pump [®] sensor with built-in selective filter housing |
|--------------------|---|
| SENSITIVITY: | Better than 0.25oz/yr (7g/yr) leak rate of HFC. |
| AUDIBLE ALARMS: | Over 100 computer generated tones varying in intensity with leak size |
| VISUAL DISPLAY: | 10 high intensity bar graph display (LS790B) / High intensity LED display (LS780B) |
| LOCK-OUT MODE: | Unique feature enables quick & easy locating of refrigerant leaks in highly contaminated search zones. In this mode, the unit will automatically & systematically store the recorded concentration levels of background refrigerant while initiating leak search, alarming only in the area of the highest recorded concentration level, the actual leak source. (LS790B only). |
| FLEX PROBE: | 18" / 45.7cm long metal cable probe |
| OPERATING TEMP: | 0 to 140F / -18 to 60C |
| POWER: | 40 hours battery life using 4 "AA" alkaline batteries. Auto OFF after 15 minutes of inactivity. |
| LO BATT INDICATOR: | 5th LED constantly illuminates dimly indicating low battery condition. |
| WEIGHT: | 1lb 2oz / 500g |
| WARRANTY: | 2 years (LS790B). 1 year (LS780B). Excludes sensors and batteries |

LS780B

A rugged, three position slide switch is used to turn the instrument on & select either LO or HI sensitivity ranges. Visual indication of the leak size is provided by a high intensity LED varying in brightness with the concentration of the refrigerant detected.

ELECTRONIC REFRIGERANT LEAK DETECTION

<u>Refrigerant Monitor</u>

Compact, highly reliable, yet economical refrigerant leak monitoring systems. Designed to monitor a single refrigerant in a single zone providing early warning of costly and environmentally damaging refrigerant leakage. Adjustable sensitivity settings between 100 to 1000PPM with an auxiliary 1/2 HP N.O. and N.C dry contact control function for operating an additional alarm or other safety device. Replacement sensors are interchangeable enabling the replacement of a failed sensor directly in the field without recalibration, minimizing "downtime."

GAS SEEKER[®] GS30 - Portable Combustible Gas Detector

The *GS30* is a low maintenance, easy-to-use portable combustible gas leak detector engineered to pinpoint leaks in residential, commercial and industrial appliances. Advanced semiconductor sensor and electronic control package enables detection of gases commonly found in service applications including; Carbon Monoxide, Natural Gas, Propane, Ammonia, Methane, Acetone, Hydrogen and Iso-Butane, with a virtually instantaneous alarm response period. Measuring just over 7" long and 0.72" in diameter its compact tubular shape enables testing in limited access areas and conveniently fits into a serviceman's pocket. Applications include the inspection of furnaces, valves, regulators, pipelines, meters and other devices associated with combustible gases.

3

WARNING: THE GS30 IS NOT INTRINSICALLY SAFE IN CLASS 1 (EXPLOSIVE) TYPE ATMOSPHERES AND IS NOT SUITABLE FOR THE DETERMINATION OF HUMAN SAFETY OR HABITABILITY CONDITIONS.

| Detecting Range | 0 - 100% LEL referenced to Methane. |
|------------------------|--|
| Alarm Indication | Both visual and audible (>40db) alarm indicators |
| Low Level Alarm | Preset at 10% LEL. |
| High Level Alarm | Preset at 30% LEL |
| Operating Conditions | 0°F to 104°F / -20°C to +40°C at less than 98% RH |
| | (non-condensing) |
| Power | Working voltage is 3VDC using two 1.5V AA batteries. |
| Battery Life/Indicator | 5 hrs continuous use. Orange LED constantly |
| | illuminates when battery is low |
| Sampling | Natural diffusion |
| Dimensions | 7.2 x 0.71in / 183 x 18mm |
| Weight | 5.3oz / 150g (including battery) |

Carbon Monoxide, Natural Gas, Propane, Ammonia, Methane, Acetone, Hydrogen, Iso-Butane Acetone, Acetylene, Benzene, Butane, Ethanol, Ethylene Oxide, Gasoline, Hexane, Industrial Solvents, Paint Thinners, and Naptha.

Actual Size

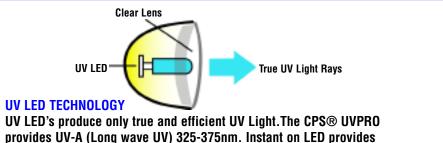

UV REFRIGERANT LEAK DETECTION

UVPRO UV Flashlight & Enhancing Glasses

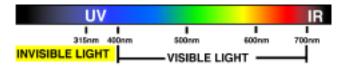

UVPRO

Don't forget the "UV" when selecting your next UV light.

Ultra Violet (UV) dye additives are specially formulated to fluoresce in the presence of UV light rays. Hence the common industry names for the two major components used with this technology, "UV" dye and "UV" lights. Referring to the light spectrum chart below you can see that true "UV" light is invisible to the human eye, with the closest visible light colors being purple and blue respectively. The overall intensity of UV light diminishes as you move from the invisible UV light range to purple, then to blue and so on down the chart. Take care not to confuse a lamp that emits high intensity visible blue light as superior to a lamp tuned more efficiently to emit true UV light.

UV LED's produce only true and efficient UV Light. The CPS® UVPRO provides UV-A (Long wave UV) 325-375nm. Instant on LED provides the fastest leak inspection of any light available. Light spectrum wavelengths in nanometers

Why **BLUE** is NOT Necessarily Cool

A correctly tuned Ultra Violet (UV) lamp should predominantly emit invisible UV light waves with only a trace of visible "purple" or "blue" light. The small amount of visible light is required to direct the user's eyes to the leak search area, while the invisible UV light rays actually illuminate the leaking dye. Lamps that emit large amounts of visible blue light have been marketed heavily as being more powerful and more effective at fluorescing leaks, backed by the obvious high output of visible light. Knowing that UV dye additives requires invisible true UV light rays to effectively fluoresce dispels this claim altogether. In fact, special "blue blocking" glasses are required for use with these high output blue lamps in order to remove the nuisance blue light from the vision of the user during the leak search process. Otherwise, the high output of light will mask the actual leak or illuminating dye additive.

UVPRO

The new and improved UVPRO light is the most compact and efficient UV light we have ever designed. The nine high intensity true UV LED's are specifically engineered to maximize the fluorescing capabilities of today's most commonly used dyes while greatly reducing the amount of "nuisance" background blue light emitted. Its rugged anodized aluminum body and o-ring sealed battery compartment allows it to handle harsh field conditions while small enough to conveniently fit in your pocket.

UVPRO - UV LED Light/Glasses Kit

- 9 True UV emitting LED technology
- Rugged anodized aluminum body
- Works with all common dye additives
- Ultra Compact and lightweight
- Instant "ON" with no heat produced
- Operates on (3) AAA batteries (included)

UV REFRIGERANT LEAK DETECTION

UV55 LED Refrigerant Leak Detection Kit

UV55 Includes: UVPRO LED flashlight, squeeze gun injector w/ hose, R-134a 90° low coupler, safety glasses, UVS2 dye cartridge and carrying case.

UV55

- UVPRO True UV emitting LED light technology
- Compact & Rugged anodized aluminum body
- Mess-free and easy to use Squeeze Gun[™] injector
- 1 UVS2 universal OEM approved dye cartridge
- Includes 90° low side snap coupler • Operates 8 continuous hours on (3)
- AAA batteries (included)

UV Dichroic Refrigeration Leak Detection Kits

UV150

REFRIGERANT CHARGING / RECOVERY SCALES

CC220 COMPUTE-A-CHARGE® High Capacity Charging Scale

High capacity 220lb/100kg **Compute-A-Charge**[®] refrigerant charging/recovery scale, calibrated to strict NIST standards. Fully enclosed and removable metal scale platform enables use of product in or out of the protective case. Large, highly visible 1 1/2" x 2"/37mm x 48mm high resolution LCD readout displays either Imperial or Metric measurements in .25oz / 10g increments. The ergonomic hand held remote incorporates 6ft coil cord, a hanging hook and is backed with a magnet for attaching to metal surfaces. Full mechanical and visual overload protection. Operates 60 continuous hours on two 9V alkaline batteries. Includes automatic off feature.

REFRIGERANT CHARGING / RECOVERY SCALES

Programmable High Capacity Charging Scale

Programmable high capacity 220lb/100kg Compute-A-Charge® refrigerant charging/recovery scale, calibrated to strict NIST standards. Operating exclusively on two 9V alkaline batteries, the CC800A is the only fully automatic refrigerant scale that does not require line voltage and is R-410A compatible. Using the keypad controls, simply program the CC800A to transfer or recover a pre-set amount of refrigerant, hit "go" and walk away. The scale's advanced microcomputer circuitry will constantly monitor the progress of the job, shutting off the refrigerant flow when the pre-set amount is reached and audibly alert the user. A large, highly visible 1 1/2" x 2" / 37mm x 48mm high resolution LCD readout displays either Imperial or Metric measurements in .25oz / 10g increments. The ergonomic hand held remote incorporates a 6ft coil cord, a hanging hook and is backed with a magnet for attachment to metal surfaces. Full mechanical and visual overload protection. Operates 30 continuous hours on two 9V alkaline batteries. Automatic off feature.

TEMPERATURE MEASUREMENT INSTRUMENTS

CDS' TM350

MP SEEKE

TM350

TEMP-SEEKER[®] Humidity/Temperature/Wet Bulb Diagnostic Analyzer

The TM350 is a professional grade thermo-psychrometer adaptable to accommodate all your temperature, humidity, dry/wet bulb and dew point measurements. The unit incorporates 4 discrete temperature ports all capable of min/max and memory functions including temperature differential between any 2 of the 4 available ports. Press the SCAN key and the display will alternate between all 4 ports in three second intervals providing continuous monitoring of multiple probe points during critical system diagnosis. A dedicated special purpose port accommodates an optional state of the art silicon humidity transducer probe for fast and accurate measurements during superheat calculations. Designed in a rugged polyethylene case the TM350 is engineered to provide laboratory accuracy in rough field conditions. A generous probe storage area is provided for housing all your job specific probes directly in the unit itself.

Features:

- Ideal for critical superheat calculations
- High accuracy silicon humidity transducer probe humidity probe port
- Large easy-to-read backlight display
- Min / Max and memory functions
- Temperature differential between any 2 ports
- Direct relative humidity and wet bulb measurements
- Auto-off after 15 minutes of non-use or continuous ON mode
- Integrated battery eliminator jack
- Rugged polyethylene carrying case w/ large probe storage area
- Large probe storage area
- Switchable °F/°C
- 1 year warranty

Instrument Specifications:

- Calibrated to NIST traceable standards
- Operating temperature range:
 - 15°F to 120°F (-10°C to +50°C) at 95% RH non condensing

±0.4°F (14°F to 158°F)

±0.2°C (10°C to 70°C)

• Accuracy:

TM350 includes (1) TMX2A, (1) TMX2S, (1) TMX2G TM350A includes (1) TMX2C, (1) TMX2GA, (1) TMX2FP TM350C includes (1) TMX2C, (1) TMX2S, (1) TMX2A

- Resolution: ±0.1 degree from -40 to 99.9, ±1.0 degree from 100 to 300
- Auto power off after 10 minutes of non-use or selectable continuous ON mode
- 30 hrs battery life on (1) 9V alkaline
- Optional AC adaptor for 100 to 240 VAC mains, 2.1 mm center positive

TEMPERATURE MEASUREMENT INSTRUMENTS

TEMP-SEEKER® Non-Contact Infrared Thermometer

The *TMINI12* infrared thermometer provides instant temperature measurement over a wide range of applications. The unit offers simple one-handed operation, laser point sighting, a backlit display, °C/°F select ability and an automatic power off feature. Use the TMINI12 to quickly measure temperatures of registers, ductwork, furnaces, evaporators, condensers, compressors, relays, manifolds, radiators, exhaust systems, thermostats, bearings and more. Leather carrying case and 9V alkaline battery are included.

| TEMPERATURE RANGE: | -76°F to 932°F or -60°C to 500°C |
|------------------------------|---|
| D:S (Distance to Spot Size): | 12:1 |
| EMISSIVITY: | Emmisivity pre-set at 0.95 - adjustable |
| ACCURACY: | ±2°C (±4°F) or ±2% of reading |
| DISPLAY: | Digital Backlit LCD |
| RESOLUTION: | 1°C/F° |
| BATTERIES/LIFE: | (2) AAA batteries and auto power off |

The unit offers simple one-handed operation, laser point sighting, a backlit display, °C/°F select ability and an automatic power off feature.

Digital and Analog Pocket Thermometers

A step above the standard pocket thermometer the *TM50* is packed full of features, including a user selectable temperature alarm, a countdown timer, Min/Max, °F/°C selectable and memory functions. The unit incorporates a highly accurate stainless steel 96mm puncture probe with a 4ft/122cm cord. Temperature range is -58° to 500°F / -50° to 260°C. The TM50 operates on a single AAA alkaline battery with 25 hours of battery life and a low battery indicator.

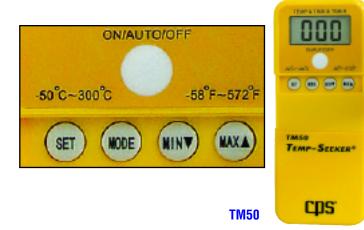

TMDP

Digital pocket thermometer with stainless steel probe and pocket clip. Range: -58° to 302°F / -50° to 150°C

TMAP

Analog pocket thermometer with 1" dial and Stainless steel probe and pocket clip TMAP: Range: 0° to 220°F

TMAPC: Range: -40° to 80°C

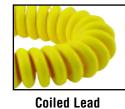

TEMPERATURE MEASUREMENT INSTRUMENTS

K-TYPE TEMPERATURE PROBES

The TMXSK90 is the fastest and most accurate handheld K-type surface probe providing accurate readings in less than 5 seconds. The sensor is made from flat-spring ribbons of thermocouple material for contact on uneven surfaces. An angled head for measuring hard to reach surfaces and a 3 foot coiled lead for durability and long reach. The exposed junction provides for fast response and is compatible with any other instrument with a K-Type input.

Flat-Spring Ribbons

Angled Head

The TMXSK is the fastest and most accurate handheld K-type surface probe providing accurate readings in less than 5 seconds. The sensor is made from flat-spring ribbons of thermocouple material for contact on uneven surfaces. A ribbed handle for grip and a 3 foot coiled lead for durability and long reach. The exposed junction provides for fast response and is compatible with any other instrument with a K-Type input.

TMXSK Max Temp: 752°F (400°C)

Coiled Lead

Bead

Ribbed Handle

Flat-Spring Ribbons

Covered Lead

Exposed Junction

The TMXKBEAD is a standard K-type bead probe ideally suited for getting fast results when measuring temperature in a variety of media. This 36" long (1 meter) probe provides accurate readings in less than 5 seconds over the range of -58°F to 400 °F (-50 °C to 204 °C).

TMXKBEAD Max Temp: 400°F (204°C) Min Temp: -58°F (-50°C)

Precision vane type anemometer provides fast, accurate air velocity measurements for use in balancing HVAC systems or determining CFM calculations. A convenient TYPE K thermocouple is built-in to the remote vane providing quick measurement of grille/duct outflow temperatures from 32 to 122 F / 0 to 50 C. Included, is an easy-to-read laminated conversion chart that allows the user to quickly convert air velocity measurements into CFM calculations at a glance. Shipped with a rugged carrying case and is CE approved.

Sound Level Meter

Professional grade sound level indicator designed to measure noise levels from 35 to 130dB. The unit incorporates a large LCD, maximum hold function, Over and Under range indicator, peak and average response settings and A-C weighing for checking compliance with standard safety regulations. Applications include the monitoring of HVAC/R compressors, blowers, health and safety requirements, environmental quality issues, offices, factory machinery, airports, auditoriums and studio acoustics. Unit is CE approved and includes carrying case.

ELECTRONIC GAUGES & METERS

VACROMETER™ Digital Vacuum Gauge

Advanced measurement instrument providing continual digital readout of evacuation process on large 5 digit LCD. Measurement units are user selectable to read in Microns, Torr, in/hg or mBar at the touch of a key. Advanced surface mount technology automatically compensates for ambient changes in the environment ensuring accuracy and consistency in performance. Advanced field-cleanable sensor is able to withstand 400 PSI of positive pressure. Unit operates 30 hours on 9V alkaline battery with low battery indicator and auto off feature. Includes carrying case, hanging hook, AVT45, 9V battery and is CE approved.

VG201 = VG200 + 1/8" NPT Thread Connection

| BATTERY INDICATOR | Battery symbol with 3 segment Power Level Bar Graph. (VG200). LED Low Battery Indicator (VG100) |

VACROMETER™ Vacuum Gauge

Compact self-contained instrument designed to provide constant indication and monitoring of the evacuation process from start to finish. Nine discrete high intensity LED's are preset to illuminate upon achieving industry standards for proper system evacuations. Advanced surface mount technology automatically compensates for ambient changes in the environment ensuring accuracy and consistency in performance. Advanced field-cleanable sensor is able to withstand 400 PSI of positive pressure. Unit operates 25 hours on 9V alkaline battery with low battery indicator and auto-off feature. Includes carrying case.

The CPS anti-siphon valve is an essential accessory to any vacuum pump application. The anti-siphon valve prevents the cross-contamination of vacuum pump oil and the compressor oil in the A/C or refrigeration system being serviced. Mixing of vacuum pump oil and compressor oil can cause premature failure in the A/C or refrigeration system. CPS makes three models that fit all CPS and other brands of vacuum pumps. Add to any brand of vacuum pump to prevent the cross-contamination of vacuum pump oil and the compressor oil of the system being serviced.

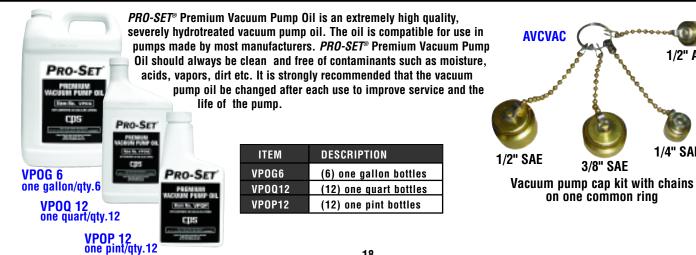

Premium Vacuum Pump Oils

Connects directly to intake port of pump.

PRO-SET® Oil-Less Refrigerant Recovery Machine

- Fastest overall ARI certified recovery rates in its class
- Powerful 1HP oil-less reciprocating recovery compressor
- Exceptional compressor, condensing & cooling systems allow fast recovery in high temperature environments
- Automatic Low Pressure shut-off feature turns unit off when recovery is completed
- Rugged high density double walled plastic housing with easy view top mounted controls
- R-410A ready with 550psi high pressure shut-off switch
- Ergonomic well balanced design for easy transport including shoulder strap weighs 36 lbs/16.2kg
- Built-in suction filter located under suction port
- Worldwide patents pending

- Compact modular design with easy access 4 bolt latching system
- Complete compressor rebuilt in minutes
- Externally serviceable valves and gauges
- Integrated component moorings for quiet operation
- Fewer components equals more reliability

Oversized Piston

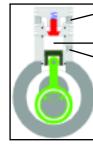

Larger discharge port

e port

- Powerful 1HP oil-less reciprocating recovery compressor
- Oversized piston head & cylinder combined with a larger discharge port
- No suction valve eliminates failures caused by liquid slugs
- Heavy duty components with special long-lasting composite seals

Outgoing refrigerant flow (Discharge Valve)

- -Low pressure expansion chamber
- Incoming refrigerant flow (Suction Port)

Unique suction port design eliminates suction valve & precisely meters incoming refrigerant.

Refrigerant Recycling Module

FEATURES:

- Easy access one bolt cover with 42 cubic inch solid core drier.
- High efficiency coalescent oil separator to remove oil and other contaminates from refrigerant.
- Ball Valves on the hoses for easy hook up and safe disconnection.
- Built in manifold with self clearing valve. Prepares the unit for the next refrigerant.
- Manifold utilizes CPS exclusive Triple Seal piston valves.
- Suction and discharge gauges for monitoring operation.
- 1/4" SAE Male flare oil drain port to remove recovered oil and contaminants.
- Light weight (15lbs) and ergonomically designed handle for portability.
- Heavy duty powder coated aluminum chassis surrounded by a tough high-density polyethylene case.
- 1/4" SAE Male flare fittings.

VORTECH SERIES

VORTECH VALVE ∕STEM™ PATENT PENDING

- Advanced VVS diaphragm valve system
- Certified 15 micron vacuum rating
- Red & blue protective gauge boots
 New 45° fittings for easy hose storage (2 valve series only)
- Anodized aircraft aluminum block body
- Precision flutter-free metal cased gauges
- Heavy duty plastic valve handles
- Oversized refrigerant sight glass

- Advanced diaphragm valve design
- Superior refrigerant metering capabilities
- Certified 5 year trouble-free valve life
- Maximum unrestricted refrigerant flow
- Light touch valve operation

BLACKMAX[™] 2-Valve Piston Valve Manifolds With 1/4" SAE Fittings

BLACKMAX™ Manifold For R-410A

- Exclusive TripleSeal[™] valve system
- Valve stems retract fully for maximum flow
- Back seating o-ring seals valve nut when fully open
- No flutter gauges with rugged Metal housings
- Aluminum block
- Additional Schraeder® valve "T" port
- Large easy-to-grip knobs

Gas Test Gauge / Fuel Oil Test Kit

Gas Pressure Test Assemblies

The GT1 and GT2 are designed to test the integrity of new installations for pressure leaks. Available with either a 3/4" or 1" FPT brass bell. Simply connect the test assembly, pressurize the system using the supplied access port and monitor the easy-to-read 3 1/2" / 80mm gauge for potential pressure drops that would indicate a leak.

<u>Fuel Oil Test Kit</u>

The GT3 is a comprehensive test kit which includes the components necessary to test oil fuel pump performance while diagnosing related burner efficiency issues such as cleaner light-offs and coasting stops.

FUEL OIL TEST KIT Includes:

- 2 1/2" gauge, scale 30", 0-150 lbs.
- 2 1/2" gauge, scale 30", 0-300 lbs
- 12" hose 1/4" Fem swivel x 1/4" Fem 45° swivel
- 1/8 NPT x 1/4 Male SAE adapter
- 1/8 NPT x 1/4 Male SAE 90° adapter
- 1/4 NPT x 1/4 Male SAE adapter
- 1/4 NPT x 1/4 Male SAE 90° adapter
- Carrying Case

STANDARD

•All-weather flexibility and strength •Extra deep knurling on nuts for easy grip •750 psi working pressure; 3000 psi burst

•1/4" SAE fittings with 45° bend on one end

•Available with MicroSeal™ or ball valve fittings

Leak-proof eight-sided crimp

•Blow-off grooves channel refrigerant to prevent spray back

Adjustable Valve Core Depressor with a 1/16" larger

I.D. for maximum refrigerant flow Extra deep knurling Extra long swivel barb assures Maximum holding power 8 sided crimp

PREMIUM

- R-410A Compatible
 - 800 psi working pressure; 4000 psi burst
- Environment friendly Nylon Permeation Barrier meets SAE J2196

STANDARD CHARGING HOSES

- Compatible with CFC, HCFC and HFC refrigerants & blends
- Available with MicroSeal™ or ball valve fittings

Adjustable valve core depressor opens all out of tolerance Schraeder® valves.

- Multi-faceted interchangeable heads ensure equal linear • expansion of tubing and uniformed wall thickness.
- Extended handle length provides added leverage for ease of operation.
- Re-round deformed tubing and fabricate couplings.
- · Components are heat treated for durability.
- Ideal for copper, aluminum and soft steel tubing.
- Includes storage case for long-term protection.

PRO-SET® Metric Torque Wrench Set

Professional interchangeable jaw torque wrench set ensures compliance with OEM torque settings for high pressure **R-410A** systems.

- Interchangeable 17, 22, 24, 26, 27 & 29mm jaw sizes.
- Corresponding settings clearly marked on torque wrench in Newton Meters (10-75Nm).
- Provides consistently accurate readings and rugged, trouble free performance.
- Includes storage case for long-term protection.
- 1 year product warranty.

SPECIALTY HAND TOOLS

The *TLMKC18* is designed to manually open solenoid valves by magnetically lifting the stem assembly and plunger. Simply slide the TLMKC18 over the valve's enclosing tube and the industrial grade magnets incorporated inside the rugged ABS plastic housing does the rest. It is an ideal tool for trouble shooting/servicing both direct connected or pilot operated 2-way solenoid, 3-way reclaim or 4-way reversing valves.

* 0.75"/18mm opening fits all common manufactured valves

• Instantly Magnetize or Demagnetize Steel Tools & Parts

Use the TLMAG1 to magnetize tools in order to keep small screws and nuts

in position, especially helpful when working in confined spaces, or

demagnetize tools when working on or near electronic circuit boards. Simply insert a screwdriver or nut driver into the (+) opening, slowly draw

it out and it's magnetized. Leave the magnetizer on the tool for extra strength. To demagnetize, slowly draw the tool through the smallest area of

the (-) opening. The TLMAG1 is an essential tool for the professional and

- Incorporates Two C5 Industrial Strength Magnets
- Impact Resistant ABS Molded Plastic
- No Batteries or Electricity Required
- Compact Design: 2" x 2" x 1"
- compact Design. 2 X 2 X 1

do-it-yourselfer alike.
