Electronic Whole-House Air Cleaners

PRODUCT DATA SHEET

How Electronic Air Cleaners Work:

The *HE Plus* Electronic House Air Cleaner uses a high-voltage ionizer within the air cleaner that electrically charges airborne pollutants and particles. TRION® electronic air cleaners feature electrostatic precipitators - a series of metal collection plates that are oppositely charged to the ionized particles. The negative filter plate then attracts and captures these microscopic particles, preventing them from being recirculated in the home. TRION® systems offer high performance and efficiency, ultra-quiet operation and no filters to replace.
