

# RECEIVERS

Refrigeration Research Receivers have been made continuously for over 50 years. They are used widely by original equipment manufacturers throughout the industry. They are backed by a reputation for quality and service.

Available in a broad range of types and sizes, these receivers with valves and fittings attached are hydrogen brazed for cleanliness and pressure tested for reliability. A 430°F Fusible plug is installed on all receivers except #2030, #2039, and #9028. All valves are supplied with steel stem caps with copper gaskets and brass flare nuts and caps. All receivers are powder coated for excellent corrosion resistance. Pressure tested for 500 p.s.i. maximum working pressure.
