When you look at your window-mount air conditioner, you will see louvers on the sides and/or top. These are designed to bring in fresh air that is then directed across the coils inside the unit. It is important that the air conditioner be correctly installed, especially leaving the side louvers and back grille unobstructed.

The chart on the last pages of this catalog shows the maximum thickness of the wall through which the air conditioner should be installed. These widths assure that the side or top louvers will be unobstructed so that adequate fresh air is available for heat transfer to occur.

Double Hung Window

Each carton shows the minimum and maximum size of the window in which that specific unit will fit.

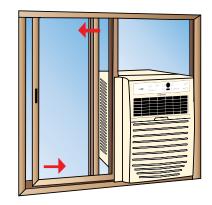

Measure the width of the window opening and the maximum height when the window is open to determine if the unit you've chosen will fit the available window, in addition to checking the wall thickness.

Window-mount air conditioners come with adjustable side panels that slide open to completely fill the window opening; allow 3 to 4 inches of width for the accordian-type side panels to open. The window sash closes onto the bracket located on the top of the air conditioner.

IMPORTANT: Because so much of the weight of the air conditioner is on the outside, it is necessary to have a support bracket installed for safety. See page 6 for details on our two sizes of support brackets.

Casement/Slider Windows

These windows which slide open to the side or open outward require a different type of window air conditioner. Our CD models are ideal for casement or slider windows. The window can close onto the sides of the unit, and a support platform is included. A plastic window filler panel is included with the unit—it can be cut to size and fits into an adjustable window panel frame. For a casement window, the window crank must be removed.

Slider Window

Filler panel fits into frame that is installed above the unit.

Casement Window

Window opens outward or the exterior pane may be removed. Crank mechanism is removed.

Always follow the installation instructions included with the unit.

8,000 BTUH **Nominal**

- · Interior trim kit included

FEATURES

- · Electronic controls with full feature remote and auto restart
- · Four-way adjustable air direction

• Energy saver function and 24-hour

- on/off timer · Auto and sleep modes

AS080 & AS160

Window Support Brackets

Easy-to-install brackets add a full measure of safety to window-mounted air conditioners. Manufactured from heavy gauge steel with a durable baked-on epoxy finish, the brackets have stainless steel hardware to resist weather damage. Unique bubble level helps ensure proper installation angle.

AS080—For room air conditioners up to 80 pounds

AS160—For room air conditioners up to 160 pounds

EA448F Wall Sleeve

For BG and BGE Series

Sleeve is manufactured of G-90 steel and powder coated for durability and corrosion resistance; color matches unit color. The sleeve utilizes the aluminum back grille of the BG/BGE units, and front gaskets eliminate air.

EA448F—Wall Sleeve (inches) 15¹/₄" H x 25¹/₂" W x 17¹/₂" D

IMPORTANT!

Always wait to cut a hole in structure until unit arrives and dimensions can be verified.

Advantages of Portables

Portable air conditioners and heat/ cool models are ideal for any area where temporary cooling (or heating) is needed, or in situations where a window air conditioner isn't an option.

Historical properties are ideal candidates for portables since the aesthetics of the building's exterior are maintained.

Also, additions to existing homes can be conditioned without upgrading the entire HVAC unit to accommodate the added square footage.

Some other applications that can benefit from the efficiency and portability of these units:

- · Apartments
- · College dormitory rooms
- · Bedrooms and sunrooms
- · Cottages/vacation homes
- · Home workshops
- School and church classrooms
- · Warehouse offices

Installation

Installing a portable unit takes only a few minutes. Hot air from the unit should be exhausted from the room, and a window adapter for the exhaust hose comes with the unit. It has sliding sides to fit a variety of windows, but with its low profile, light from the window isn't blocked. The adapter fits many sizes of double hung windows, and can also be used on certain casement windows and even patio doors—some on-site adjustments may be needed.

Since no ductwork or special wiring is required, the unit can be easily moved from one room to another. Heavy duty casters and handholds built into the sides of the cabinet facilitate location changes.

Ease of installing the window adapter is a primary reason the portable unit can be used throughout the house. However, if the portable is being used only for air circulation (fan), it's not necessary to use the hose hook-up.

A large diameter, 48" flexible hose effectively exhausts hot air to the outside.

Operation

Portable models feature cooling, dehumidification and air circulation (fan only) modes; the PSH-141A adds supplemental heating capability. The 24-hour on/off timer can be used to save energy by operating only at set times when residents are at home. The sleep mode also saves energy by increasing the temperature periodically through the night (so there is less cooling), which also increases the comfort level for many people.

A handy wireless remote controls all functions of the Comfort-Aire portable units.

Room air units are an economical and practical means of adding comfort to a home, commercial space, warehouse office, or other area. For best results, the air conditioner or room heat pump should be correctly sized for the space. The specifications in this catalog show the approximate square footage which each unit effectively cools. However, other factors should be considered in selecting model size—it would be a good idea to choose the next size up if there are multiple doors and windows in the space. if ceilings are exceptionally high, if heat-generating equipment is used, or if several people occupy the space.

Use the chart below as a quick reference in determining which unit(s) will fit your needs.

Square Feet to be conditioned	Square Meters to be conditioned	Capacity Needed (BTUH)
100 - 150	9.3 - 13.9	5,000
150 - 250	13.9 - 23.2	6,000

1,400 - 1,500	130.1 - 139.4	25,000
1,500 - 2,000	139.4 - 185.8	30,000

Guidelines from www.energystar.gov

Energy Star recommends increasing capacity by 10% for a sunny room, decreasing by 10% for shaded room.

If used in a kitchen, add 4,000 BTUHs to the total.

If more than two people regularly use the room, add 600 BTUH for each additional person.

Portable Dehumidifiers

- Automatic Water Level Shut-Off—When the drain bucket is full. unit automatically shuts off, then displays a "Full" light
- Drain Options—Condensed water can be collected in the removable bucket that has a convenient handle, or continously drained using the adapter kit that's included
- BHDP Models—Built-in pump quickly and effectively removes condensate
- Easy to Use Controls—All controls are located on the top of the unit so they're easy to see and adjust; actual room humidity/relative humidity set point is displayed
- · Auto Restart—Automatically resumes operation after a power outage, ideal for second homes or offices, as well as primary residences

• Slide-Out Filter—Filter is easily removed from unit so it can be cleaned and reused; check filter light is a reminder to clean the filter

Ductless Mini-Splits

Our "SVH" Series, rated up to 16 SEER, offers economical zone control because only the room or area being used is conditioned. Also inverter technology matches the compressor speed to the room's changing temperature requirements.

Optional 115 or 230 volt available on 9k and 12k.

S Series 15 SEER

Single Zone Heat Pumps 9,000 - 24,000 BTUH Inverter technology Up to 16 SEER!

Multi-Zone Mini-Split Heat Pumps—Inverter Technology

Cool and heat one to five separate rooms or areas, depending on the capacity of the outdoor unit. Each zone has an independently controlled air handler with remote; ceiling cassettes and ducted units also have a wired wall thermostat. Built with enhanced filtration, quiet operation, multiple modes, low ambient cooling and "Follow" function.

Mix 'n' match indoor units

May be sized up to 150% of outdoor unit capacity, but may not provide full capacity for all indoor units. Total capacity of all indoor units should not be less than 50% of the outdoor unit's capacity.

Mix & match indoor units up to maximum capacity of outdoor condenser!

B-VFH09FA-1	9,000 cool, 9,500 heat, 383 max. CFM
B-VFH12FA-1	12,000 cool, 13,000 heat, 441 max. CFM
B-VFH18FA-1	18,000 cool, 19,000 heat, 494 max. CFM
Floor/Ceiling Indoor Unit	Capacity BTUH per unit
B-VFH09UA-1	8,500 cool, 9,500 heat, 383 max. CFM
B-VFH12UA-1	11,900 cool, 13,100 heat, 383 max. CFM
B-VFH18UA-1	17,000 cool, 18,700 heat, 559 max. CFM
B-VFH24UA-1	22,800 cool, 27,400 heat, 736 max. CFM

PTACs—A/C and Heat Pump

- Condensate Dispersal System—"Slinger" system throws condensation onto the condenser coil for evaporation
- Electronic Thermostat Control—LED display makes it easy to select set point
- Modes—Cool, fan only and auto; heat pump models alternate between reverse cycle heat mode and electric heat mode
- Compressor Restart Time Delay—Prevents short cycling of the compressor
- Freeze Protection—Automatically activated when needed to keep the evaporator from freezing
- **Memory**—Restarts operation in the mode that was operating when power was lost
- Fits Most Wall Sleeves—Matching wall sleeve and grille available as optional accessories
- Electric Heat—Designed for supplemental heating only, automatically switches to electric heat when the temperature reaches 44° F or below

Also available in 265V models, see brochure CA-PT. Some series available in Sea Coast coating.

7,000 to 15,000 BTUH

Dimensions: 42"W x 16¹/₁₆"H x 21¹/₁₆"D

Electric Heat Standard-3 kW on 7K & 9K, 3 or 5 kW on 12K & 15K

7602-500B—Wall Sleeve, insulated, assembled **7602-500F**—Wall Sleeve, insulated, knock-down: saves room, easily assembled

Sizing Guidelines

Use the chart below as a quick reference in determining which unit(s) will fit your needs

Square Feet to be conditioned	Square Meters to be conditioned	Capacity Needed (BTUH)		
100 - 150	9.3 - 13.9	5,000		
150 - 250	13.9 - 23.2	6,000		
250 - 300	23.2 - 27.9	7,000		
300 - 350	27.9 - 32.5	8,000		
350 - 400	32.5 - 37.2	9,000		
400 - 450	37.2 - 41.8	10,000		
450 - 550	41.8 - 51.1	12,000		
550 - 700	51.1 - 65.1	14,000		
700 - 1,000	65.1 - 92.9	18,000		
1,000 - 1,200	92.9 - 111.5	21,000		
1,200 - 1,400	111.5 - 130.1	23,000		
1,400 - 1,500	130.1 - 139.4	25,000		
1,500 - 2,000	139.4 - 185.8	30,000		

Guidelines from www.energystar.gov

Energy Star recommends increasing capacity by 10% for a sunny room, decreasing by 10% for shaded room.

If used in a kitchen, add 4,000 BTUHs to the total.

If more than two people regularly use the room, add 600 BTUH for each additional person.

IMPORTANT!

Always wait to cut an opening until the unit arrives and dimensions can be verified.

The Quality Leader in Conditioning Air

There's the confidence that comes from dealing with a company that's been around for generations. Founded in 1933, we can actually trace our beginnings to the Wingert Furnace Company which began building coal, gas and oil furnaces in 1907. Headquartered in Jackson, Michigan, since 1955, our facility, our staff and our product offerings have grown over the years to meet changes in the HVAC industry, including emerging technologies and regulatory requirements.

MARS is known throughout the industry for efficient, reliable products and in-season availability. Whether for heating or cooling, these products meet or exceed industry standards for energy efficiency. Added to that, the line is constantly being updated to add the features and new technology customers demand.

Due to ongoing product improvements, specifications and dimensions are subject to change and correction without notice or incurring obligations. Determining the application and suitability for use of any product is the responsibility of the installer. Additionally, the installer is responsible for verifying dimensional data on the actual product prior to beginning any installation preparations.

Incentive and rebate programs have precise requirements as to product performance and certification. All products meet applicable regulations in effect on date of manufacture; however, certifications are not necessarily granted for the life of a product.

Therefore, it is the responsibility of the applicant to determine whether a specific model qualifies for these incentive/rebate programs.

REST ASSURED: VALUE-ADDED PROGRAMS

When you buy
Comfort-Aire products,
you're purchasing the
peace of mind that comes
from dealing with a
company that's been in
business for over 75 years.
We have a well-deserved
reputation not only for
quality products, but also
for standing behind those
products with excellent
warranty and support
programs.

Comfort-Aire backs all its products with some of the strongest warranties in the industry. For details see the warranty card packed with the unit, or refer to our web site for copies of warranty details.

Our products are built to exacting standards, but should you experience a problem, you can rely on our nationwide network of service providers.

Our room air products are accompanied by detailed, comprehensive installation and operating manuals and these, along with other technical data, are also available on our website.
