

R-290 Refrigerant Grade Propane

R-290 is refrigerant grade propane that is growing in use due to its low environmental impact. R-290 is highly flammable and is only acceptable for use by the EPA in small charge applications. It is illegal to convert any existing ACR system designed for use with CFCs, HCFCs, or HFCs, to R-290, or any other flammable refrigerant. Always refer to the EPA's SNAP List (Significant New Alternatives Policy) for a complete list of acceptable uses. Go to www.EPA.gov and search SNAP.

ASHRAE Designation	Trade Name	Chemical Formula	Liq °F NBP	Chemical Formula
