**SECTION 4: FIRST AID MEASURES****Description of First Aid Measures****General:** Never give anything by mouth to an unconscious person. If you feel unwell, seek medical advice (show the label if possible).

**Inhalation:** Remove to fresh air and keep at rest in a position comfortable for breathing. Obtain medical attention if breathing difficulty persists.

**Skin Contact:** Rinse immediately with plenty of water. Obtain medical attention if irritation develops or persists.

**Eye Contact:** Rinse cautiously with water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Obtain medical attention.

**Ingestion:** Do NOT induce vomiting. Rinse mouth. Immediately call a POISON CENTER or doctor/physician.

**Most Important Symptoms and Effects Both Acute and Delayed**

**General:** Vapors are heavier than air and may cause asphyxia by reduction of the oxygen content.

**Inhalation:** May cause respiratory irritation.

**Skin Contact:** May cause skin irritation. Liquid contact may cause frostbite.

**Eye Contact:** May cause eye irritation.

**Ingestion:** Ingestion is likely to be harmful or have adverse effects.

**Chronic Symptoms:** None expected under normal conditions of use.

**Indication of Any Immediate Medical Attention and Special Treatment Needed**

If you feel unwell, seek medical advice (show the label where possible).

## SECTION 5: FIRE-FIGHTING MEASURES

**Extinguishing Media**

**Suitable Extinguishing Media:** Use extinguishing media appropriate for surrounding fire.

**Unsuitable Extinguishing Media:** None known.

**Special Hazards Arising From the Substance or Mixture**

**Fire Hazard:** RS - 44 is not flammable at atmospheric pressure and in air at temperatures up to 100 °C (212 °F). RS - 44 should not exist with air/excess oxygen at elevated pressures and high temperatures. RS - 44 Can become combustible with high concentrations of air at elevated pressure and/or temperature and in the presence of an ignition source. These substance can also become combustible in an oxygen enriched environment (oxygen concentrations greater than that in air). For example, do not mix RS - 44 with air under pressure for leak detection purposes.

**Explosion Hazard:** Product is not explosive. Heat may build pressure, rupturing closed containers, spreading fire and increasing risk of burns and injuries.

**Reactivity:** Hazardous reactions will not occur under normal conditions.

**Advice for Firefighters**

**Precautionary Measures Fire:** Exercise caution when fighting any chemical fire.

**Firefighting Instructions:** Use water spray or fog for cooling exposed containers.

**Protection During Firefighting:** Do not enter fire area without proper protective equipment, including respiratory protection.

**Hazardous Combustion Products:** Carbon oxides (CO, CO<sub>2</sub>). Halogenated hydrocarbons. Hydrogen Fluoride (HF).

**Reference to Other Sections**

Refer to section 9 for flammability properties.

## SECTION 6: ACCIDENTAL RELEASE MEASURES

**Personal Precautions. Protective Equipment and Emergency Procedures**

**General Measures:** Avoid all contact with skin, eyes, or clothing. Avoid breathing vapors.

**For Non-Emergency Personnel**

**Protective Equipment:** Use appropriate personal protection equipment (PPE).

**Emergency Procedures:** Evacuate unnecessary personnel.

**For Emergency Personnel**

**Protective Equipment:** Equip cleanup crew with proper protection.

**Emergency Procedures:** Stop leak if safe to do so. Ventilate area.

**Environmental Precautions**

Avoid release to the environment.

**Methods and Material for Containment and Cleaning Up**

**For Containment:** Ventilate area.

**Methods for Cleaning Up:** Isolate area until gas has dispersed.

**Reference to Other Sections**

See Heading 8. Exposure controls and personal protection.

## SECTION 7: HANDLING AND STORAGE

**Precautions for Safe Handling**

**Additional Hazards When Processed:** Ruptured cylinders may rocket.

**Hygiene Measures:** Handle in accordance with good industrial hygiene and safety procedures. Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work.

**Conditions for Safe Storage, Including Any Incompatibilities**

**Technical Measures:** Comply with applicable regulations.

**Storage Conditions:** Store in a dry, cool and well-ventilated place. Keep container closed when not in use. Keep/Store away from direct sunlight, extremely high or low temperatures and incompatible materials.

**Incompatible Materials:** Strong acids. Strong bases. Strong oxidizers. Chlorine.

**Storage Area:** Store in a well-ventilated place.

### Exposure Controls

**Appropriate Engineering Controls:** Ensure adequate ventilation, especially in confined areas. Ensure all national/local regulations are observed.

**Personal Protective Equipment:** Protective goggles. Gloves. Protective clothing.

**Materials for Protective Clothing:** Chemically resistant materials and fabrics.

**Hand Protection:** Impervious butyl rubber gloves.

**Eye Protection:** Chemical goggles or safety glasses.

**Skin and Body Protection:** Wear suitable protective clothing.

**Respiratory Protection:** Use a NIOSH-approved respirator or self-contained breathing apparatus whenever exposure may exceed established Occupational Exposure Limits.

**Environmental Exposure Controls:** Do not allow the product to be released into the environment.

**Consumer Exposure Controls:** Do not eat, drink or smoke during use

## SECTION 4 – FIRE AND EXPLOSION DATA

---

---

**Conditions of flammability:** Non-flammable

**Means of extinction:** n/ap

**Sensitivity to mechanical impact/static discharge:** not susceptible

**Flash point (Method):** n/ap

**Lower/upper flammable limits (% by volume):** n/ap

**Auto-ignition temperature:** not determined

**Extinguishing media:** As appropriate for combustibles in area

**Hazardous combustion products:** may decompose and form toxic gases

**Fire fighting procedures:** Use self contained breathing apparatus and protective clothing

---

---

## SECTION 5 – REACTIVITY DATA

---

---

**Stability: Stable at normal conditions:** No decomposition if stored and applied as directed.

**Incompatible materials:** Strong oxidizing agents, alkali metals, alkaline earth metals, finely divided aluminium.

**Conditions of reactivity:** It has been reported that industry experience shows that alkali and alkaline earth metals (i.e., sodium, potassium and barium) in their free metallic form may react violently with fluorocarbons. It has been noted that since materials become more reactive when finely ground, metals such as magnesium and aluminium in the powdered form may also react, especially in high temperatures. Avoid conditions where RS-44 may contact open flames or extremely hot metal surfaces as product may decompose to form Hydrogen Fluoride (HF).

**Hazardous decomposition products:** Hydrogen Fluoride (HF)

---

---

## SECTION 6 – TOXICOLOGICAL PROPERTIES

---

---

**Occupational Exposure limits:** 1000 ppm (TWA)

**Inhalation:** RS-44 is relatively non-toxic following acute exposure. Although no long term comprehensive studies have specifically investigated acute overexposure of humans to RS-44, experience indicates the cardiovascular and respiratory are the primary systems affected. Abuse (intentional inhalation) may cause death. Human exposure to high concentrations (e.g. 20%) may cause confusion, lung (respiratory) irritation, tremors and perhaps coma, but these affects are generally short lived and reversible without late after effects when removed to fresh air, LC50 values for rats and mice range from 500,000 to 800,000 ppm (vol.) over varying time periods of 15 minutes to 2 hours. High atmospheric concentrations of RS-44 produce stimulation and then depression and finally asphyxiation.

**Eyes/skin contact:** Contact of RS-44 vapour should not cause injury. Contact of liquid will result in freezing and frostbite of contacted tissue.

**Ingestion:** Not probable. At atmospheric pressure, the liquid RS-44 boils at  $-38.7^{\circ}\text{C}$ . Freezing and severe frostbite of contacted tissue will result.

**Human poisoning potential:** Sniffing of fluorocarbon propellants for their intoxicating effects has produced over 100 deaths. Fluorocarbon exhibit very toxic properties (asphyxiation, cardiac arrhythmias) when sniffed; however, because of variations in response, it is difficult to predict which symptoms will be exhibited following exposure. It is possible that individuals with heart and respiratory disorders may prove especially susceptible.

**Chronic effects:** None known

**Sensitization to material:** Product is not known to cause allergies.

**Cardiac Sensitization Threshold:** 50,000 ppm

**Carcinogenic Effects:** None known

**Synergistic materials:** Not Available.

---

---

## SECTION 7 – FIRST AID MEASURES

---

---

**Inhalation:** Vapour contact – primary route of exposure. If inhaled, remove to fresh air. Keep warm and at rest. If breathing is difficult (laboured), give oxygen. If not breathing, give artificial respiration and check for pulse. At high levels cardiac arrhythmia may occur. If no pulse, start CPR (cardiopulmonary resuscitation). DO NOT give stimulants (adrenaline, epinephrine, or hand held asthma aerosols). Call physician. Keep patient at rest for 24 hours after exposure. No long-term effects are expected.

**Skin and/or eyes:** Vapour contact – flush with fresh water for at least 20 minutes. Liquid contact – flush exposed area with lukewarm water or otherwise warm skin slowly. Frostbite is probable. Treat accordingly. Call a physician.

**Ingestion:** Liquid – Not probable – if ingested however, keep patient calm, if conscious, and get a physician immediately – frostbite is probable, indicated by necrosis of lips and tongue (contacted tissue), blanching of skin, pain, tenderness. Warm skin slowly.

---

---

## SECTION 8 – PREVENTIVE MEASURES

---

---

**Spill, leak or release:** Keep upwind. Ventilate enclosed spaces until gas is dispersed.. Do not smoke or operate internal combustion engines in immediate vicinity.

**Waste disposal:** Consult federal, provincial and local regulations for allowed means of disposal.

### \*\*\*PROTECTIVE EQUIPMENT\*\*\*

**Respiratory protection:** Respiratory protection is not needed if concentrations are controlled. If concentrations exceed TLV 1,000 ppm, use an approved respirator for organic vapour. In very high concentrations, self contained breathing equipment should be used.

**Engineering Controls:** Local or mechanical ventilation to keep concentrations below exposure limits.

**Protective Gloves:** Cloth lined rubber.

**Eye Protection:** Goggles are recommended. A full face shield if splashing possible.

**Other protective equipment:** Depending on exposure and on workplace standards.

### \*\*\* STORAGE AND HANDLING\*\*\*

**Handling procedures and equipment:** Do not breathe vapours. Avoid contact with eyes, skin and clothing. Wear protective clothing. Not for food, drug or cosmetic use. Store and use adequate ventilation. Never use in closed or confined space. RS-44 is shipped and stored as a liquefied compressed gas under pressure.

**Storage requirements:** Cylinder's to be stored in the upright position in a cool, dry place.

**Special shipping instructions:** TDG – Refrigerant gases N.O.S.\*, class 2.2 UN3163 (refrigerant blend containing: pentafluoroethane, 1,1,1,2-tetrafluoroethane, butane, isobutane, iso-pentane mixture)
