Toluene	Not Recommended	Fair	Fair
Toluene Diisocyanate	Good	Fair	Fair
Trichloroethylene	Fair	Good	Good
Triethanolamine	Good	Very Good	Very Good
Tung Oil	Not Recommended	Very Good	Very Good
Turpentine	Fair	Fair	Fair
Xylene	Not Recommended	Very Good	Fair

The above chart is intended to be used only as a guide. Its intent is to direct and educate qualified professionals responsible for assuring a safe work environment. Because the conditions and circumstances of the end use of our products are beyond our control and knowledge, and because it would be impossible to test permeation in all work environments and across the broad spectrum of chemicals and solutions, these recommendations should only be used for advisory purposes. The ultimate suitability of a products use in any environment must be pre-determined through thorough testing of the purchaser. The data contained within this guide is subject to revision as we gain additional knowledge and experience from field testing under varying conditions of use. The testing data herein contained reflects laboratory performance of the glove material and not necessarily the complete glove. Anyone using this guide should first determine if the glove selected is appropriate for the intended use and meets all applicable health and safety standards.

Neither this guide nor any other statement made herein by or on behalf of BlackMambaGloves.com or any of its distribution partners should be misconstrued as a warranty of merchantability or that any BlackMambaGloves.com product is suitable for a particular purpose. BlackMambaGloves releases itself of responsibility for the suitability or efficacy of an end-user's selection of a product for a particular application.
