

Safe-T-Locks POL, Flare, NPT, Acme

ME530

ME532-50

ME531-50

ME533

Purpose: Prevents tampering, product theft and/or accidental discharge

Features:

- Available in male POL, 1/2" & 3/4" female pipe threads, 3/8" & 1/2" male flare, and 1-3/4" female Acme
- All brass body construction for maximum durability; corrosion and spark resistance
- Durable chrome plated locking mechanism & key
- Universal key for all sizes and styles
- Locking mechanism swivels 360 degrees when installed to prevent tampering or removal
- Locking mechanism cannot be removed without key

Application: Securely install plug/cap into the valving or plumbing using the appropriate wrench. Snap locking mechanism into place over plug/cap. Locking mechanism will cover the installation hex and swivel freely until key is inserted and lock is removed.
